Phone call with Tamorah Bryant of Geologic Technics regarding field work. They are starting CPT and wells next week going w/ field work going into first week of March. May need to move boring locations several feet to 10 feet to avoid utilities. They should look at purpose of boring and adjust boring as necessary to avoid utilities but still meet objective. They may want to delete one CPT boring; they should send me an email w/ rationale if boring is deleted. I will not be on site unless I have another project in area at that time. Zone 7 oversees boring permit issues.
