Jerry,

I still need some direction on this issue. Also, can you tell us when can expect your comments/approval on the PMP we submitted for this project? I believe the developer will need to start construction in late November and there's some work to be done before that of course.

Global Identification Number T06019794669

Jerry,

I'm trying to put together the Phase I we just completed for this Site so I can upload it to your system, but I can't incorporate all the pdf's that I downloaded from the ACEH website and DTSC's website, and there's a lot of them. My only other option would be to print and then scan them all, but I really don't want to do that. The file would probably be over a GB in size, not to mention the hours of labor to do it. All of the files for the Site are referenced in the report by file name, but the off-site files are not. I could send you a CD of the records. What is your preference?
