Re: CITADEL Project No. 0222.1002.0

Phase I Environmental Site Assessment

1396 5th Street

Oakland, California 94607

Dear Mr. Fernebok:

Enclosed please find Citadel Environmental Services, Inc.'s Phase I Environmental Site Assessment report for the above-referenced project. One (1) electronic copy is provided herein.

The Phase I Environmental Site Assessment was conducted based on Citadel's Proposal 0222.1001.P, dated May 17, 2011.

If you have any questions or require additional information, please do not hesitate to telephone the undersigned at (714) 547-4301.

Sincerely,

CITADEL ENVIRONMENTAL SERVICES, INC.

Jay Schneider

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

1396 5th Street
Oakland, California 94607

CITADEL Project Number 0222.1002.0

June 7, 2011

EXECUTIVE SUMMARY

Citadel Environmental Services, Inc. (Citadel) was contracted by Oakland Housing Investors, LP (client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 1396 5th Street in the City of Oakland, Alameda County, California; hereinafter referred to as the "site."

The site inspection focused on general site conditions, on-site hazardous materials (use and storage), hazardous waste (generation, storage, and disposal), the presence of surface impoundments, underground and/or aboveground storage tanks (USTs and ASTs), the use of hydraulically operated equipment, and the presence of on-site power transformers.

The site property is located at 1396 5th Street in the City of Oakland, Alameda County, California. Formerly, the site was also affiliated with the street address of 1384 5th Street. The site property is situated to the north of 5th street, to the east of Mandela Parkway and to the west of Kirkham Street. The northern boundary of the site underlies an elevated Bay Area Rapid Transit (BART) light rail track. The site property consists of one (1) trapezoidal-shaped parcel of land, identified by Alameda County Assessor's Parcel Number 04-0069-04, containing a total approximate area of 0.88 acres (38,333 square feet).

The site currently consists of vacant land. There are no permanent structures located on the site. The site perimeter contains a fence which restricts pedestrian and automotive site access.

The site vicinity is characterized by commercial, mixed-use and residential developments, as well as an elevated light rail track. An easement for the elevated light rail track, the Bay Area Rapid Transit (BART) exists along the northern site boundary. North of the BART easement is a large surface paved parking lot. The neighboring property to the east of the site, across Kirkham Street, is a vacant lot. The neighboring property to the south of the site, across 5th Street, consists of a large commercial building and an associated paved parking lot. The neighboring properties to the southwest of the site are developed with commercial structures. An older single-family residential community is located to the southwest of the site, along 5th Street. The neighboring property to the west of the site, across Mandela Parkway, is developed with a BART station and associated surface parking.

Citadel inspected the site for chemical and hazardous waste storage and handling practices. At the time of the inspection, the site was unoccupied and no visual evidence of chemical spills or leaks was observed.

According to the historical sources reviewed, the site was occupied by a yeast and vinegar factory (western portion of the site) and a brewery (eastern portion of the site, extending off-site) from at least 1902 through 1966. Prior to 1902, no Sanborn Maps, aerial photographs or other environmentally-related historical sources could be located, however, a land deed for a portion of the site dated circa 1880 was identified, indicating that the site, or immediate site vicinity, was somewhat developed at that time. The combined site usage of yeast factory and brewery continued until approximately 1966, when the brewery was demolished and the yeast factory expanded throughout the site property. The yeast factory operations were

discontinued in 2003 (in conjunction with a sale of factory ownership) and the former structures removed in 2004. The site has remained vacant since that time.

Historic Recognized Environmental Conditions (RECs) identified at the site include aboveground and underground fuel tanks, the use of various chemicals with several documented releases, and an unauthorized release of mercury to the sewer system with apparent impacts to the subsurface soil. These issues were initially addressed at the time of incident or by previous on-site investigations / remedial actions. However, current RECs at the site include a surficial layer of artificial fill that appears to be 3-5 feet thick and extends across much of the property and elevated TPH in the in groundwater at one (1) location. Previous soil testing indicated the fill had elevated levels of lead in some areas, and detectable but, generally low, levels of mercury. Groundwater is present at about 4 feet below grade and previous sampling indicated that the groundwater beneath portions of the site was impacted with diesel and oil-range petroleum hydrocarbons.

The lead regulatory agency, Alameda County Environmental Health Services (ACEHS) contains an active Spills, Leaks, Investigations and Cleanups (SLIC) case file for the investigation and proposed remediation currently being coordinated by site ownership. The ACEHS file includes the previously approved Property Mitigation Plan (PMP) submitted by SCS Engineers in October 2008, as well as a recent Subsurface Investigation Report (dated March 18, 2011) and Remedial Action Plan (dated April 4, 2011) prepared by Citadel. The subsurface investigation was performed at the direction of the ACEHS, to further characterize the impact to the site and included a geophysical survey of the site to locate potential underground tank, impoundments and/or wells. The Remedial Action Plan was developed following the subsurface investigation, to identify the measures required to prepare the site for residential redevelopment. In response to the April 2011 Remedial Action Plan, the ACEHS published a public notice regarding the proposed remediation and requested some additional documents and evaluations from Citadel. At this time, an addendum / revision to the Remedial Action Plan is awaiting final submittal and approval by the ACEHS. A prompt start to the soil excavation / remediation is anticipated following approval.

Citadel recommends that the final Remedial Action Plan, when approved by the ACEHS, be implemented. The implementation of the approved Remedial Action Plan should be completed with continued agency communication and oversight until the receipt of a "no further action" status by the ACEHS.

Citadel has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 and the All Appropriate Inquiries (AAI) Rule published in 40 CFR Part 312, of the property identified as 1396 5th Street in the City of Oakland, Alameda County, California. Any exceptions to, or deletions from, this practice are described in the Scope of Services section of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the aforementioned property, with the exception of a surficial layer of artificial fill which appears to extend across much of the site property and TPH detected in groundwater at one location, which will be addressed under a remediation plan to be implemented pending approval by the ACEHS.

1.0 INTRODUCTION

Citadel Environmental Services, Inc. (Citadel) was contracted by Oakland Housing Investors, LP (client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 1396 5th Street in the City of Oakland, Alameda County, California; hereinafter referred to as the "site."

1.1 Purpose

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the site. A site visit was also conducted to observe existing site conditions. This report provides the results of the Phase I ESA performed.

1.2 Involved Parties

The involved party(s) in this study, to the best of our knowledge, are the Oakland Housing Investors, L.P., RBC Tax Credit Equity, LLC its successors and assigns, Citibank, N.A. and it successors and assigns, California Pollution Control Finance Authority, California Department of Housing and Community Development, LINC Housing Corp., and Federal Home Loan Bank of San Francisco.

1.3 Scope of Services

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-05 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- A Perform a site inspection to verify current site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.
- Δ Conduct a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites pose a significant environmental threat to the property site.

- A Review currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.
- Δ Consult with appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.
- Δ Prepare a report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the subject site based on the data search, reasonably ascertainable documents, and site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 Location

The site property is located at 1396 5th Street in the City of Oakland, Alameda County, California. Formerly, the site was also affiliated with the street address 1384 5th Street. The site property is situated to the north of 5th street, to the east of Mandela Parkway and to the west of Kirkham Street. The northern boundary of the site underlies an elevated Bay Area Rapid Transit (BART) light rail track. The site property consists of one (1) trapezoidal-shaped parcel of land, identified by Alameda County Assessor's Parcel Number 04-0069-04, containing a total approximate area of 0.88 acres (38,333 square feet).

According to the U.S. Geological Survey (USGS) Oakland West, Quadrangle (7.5 Minute Series), dated 1980, the site is at an elevation of approximately 10 feet above mean sea level (MSL). The site is located at approximate coordinates of 37° 48' 14" North Latitude and 122° 17' 38" West Longitude. The site property is trapezoidal in shape and generally flat.

2.2 Site Description

The site currently consists of vacant land. There are no permanent structures located on the site. The site perimeter contains a fence which restricts pedestrian and automotive site access.

A site plan is included in the report as Figure 2 in Appendix A. Photographs of the site and neighboring properties are included as Appendix B.

2.3 Adjacent Properties

The site vicinity is characterized by commercial, mixed-use and residential developments, as well as an elevated light rail track. An easement for the elevated light rail track, the Bay Area Rapid Transit (BART) exists along the northern site boundary. North of the BART easement is a large surface paved parking lot. The neighboring property to the east of the site, across Kirkham Street, is a vacant lot. The neighboring property to the south of the site, across 5th Street, consists of a large commercial building and an associated paved parking lot. The neighboring properties to the southwest of the site are developed with commercial structures. An older single-family residential community is located to the southwest of the site, along 5th Street. The neighboring property to the west of the site, across Mandela Parkway, is developed with a BART station and associated surface parking.

Based upon Citadel's observations and the information provided in the environmental database report, operations at the current surrounding properties do not represent an environmental concern to the subject site. Photographs depicting adjacent property conditions can be found in Appendix B.

2.4 Utilities

The site is not currently supplied with drinking water, electric or natural gas service.

3.0 ENVIRONMENTAL SETTING

3.1 Physical Site Characteristics

Based upon the National Geodetic Vertical Datum (NGVD) of 1929, the site is at an elevation of approximately 10 feet above mean sea level (MSL). The site property is trapezoidal in shape and generally flat. Local topography in the area of the site appears to slope shallowly to the west, toward the San Francisco Bay. The surface drainage is to the south, toward 5^{th} Street.

3.2 Geologic Conditions and Soils

The site lies within the central portion of the Coast Ranges Geomorphic Province, which extends approximately 550 miles in a northwest to southeast direction along the coast of California. The Coast Ranges Province comprises a series of northwest to southeast trending ridges and narrow valleys, whose orientations are controlled by the fault-dominated geologic structure of the region.

The City of Oakland has identified three Oakland-specific soil types, including Merritt sands, which are primarily located in flatlands to the west of Lake Merritt. They typically consist of fine-grained silty sand with lenses of sandy clay and clay. Merritt sands typically feature low moisture content and high permeability. The second category is the sandy silts, which are found throughout Oakland and consist of

unconsolidated, moderately sorted sand, silt, and clay. These are considered moderate permeability deposits. Clayey silts are found primarily along the bay and estuary and typically contain organic material, peat, and thin lenses of sand. These are typically low permeability deposits.

Based on drilling logs generated during a previous subsurface assessment, the shallow sediments consist of a mixture of silty clay, clayey silt, sandy silt, and silty sand textured material, with varying amounts of brick, glass, gravel and concrete. This material may be characterized as clayey silt in the Oakland definition (though it is apparently imported fill and not a natural sediment unit). This fill layer extends from the surface to an average depth of about 4-5 feet below grade across most of the site and is underlain mostly by silty sand deposits that are taken to represent the Merritt sand unit.

The site is located in an area comprised of fill materials overlying bay mud. The fill materials, which were put into place in the late 1800's, include construction debris, wood, asphalt and concrete. Soil sampling conducted at the site prior to construction of the current structure confirmed the presence of fill materials overlying native bay mud at the site. Please refer to section 6.2, Agency Correspondence, for a discussion of subsurface investigations and the impact of fill materials to the site.

3.3 Groundwater/Hydrogeological Conditions

Groundwater is present at the site at approximately 4 feet below grade and reportedly flows to the southwest. Groundwater in this area is part of the East Bay Sub Basin of the Santa Clara Valley Basin (Number 2-9.04). Existing beneficial uses include municipal, agricultural, and industrial process supply; however, it is probable that the groundwater in the site vicinity is not suitable for these uses due to high total dissolved solid content (reportedly as high as 2,400 mg/L). The TDS levels may be naturally occurring due to the proximity to the bay. Groundwater occurrence, depth and flow direction can be influenced by fluctuations in precipitation, pumping and other seasonal factors, as well as geomorphic features, including joints and fractures in the bedrock and the presence of buried river valleys and stream beds.

3.4 Wetlands and Flood Zone

According to the U.S. Department of the Interior, Oakland West, California, National Wetlands Inventory Map, there are no designated wetlands on-site. The nearest designated wetland is approximately 0.75-miles to the south of the site, near the Oakland Inner Harbor Channel. According to the EDR report, the subject site is located outside of the 500-year flood zones, per the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map No. 06001C.

4.0 SITE RECONNAISSANCE

Citadel representative Mr. Allan Coffee conducted the Phase I ESA inspection on May 19, 2011, including the site reconnaissance and perimeter survey of the surrounding properties, as well as the historical and regulatory research. The site reconnaissance included observations of the site property. The reconnaissance also included observations of exterior portions of neighboring properties from public right of ways.

The findings of the site inspection are presented in the following sections:

4.1 On-Site Storage Tanks

No visual indicators of current underground (USTs) were identified during the site reconnaissance. No aboveground storage tanks (ASTs) were observed on-site. According the Alameda County Environmental Health Services (ACEHS) online mapping resource, there are no current permitted USTs at the site. Please refer to section 5.5 Previous Environmental Reports for a detailed discussion of historic storage tanks on-site.

4.2 Identified Hazardous Materials

Citadel inspected the site for chemical and hazardous waste storage and handling practices. At the time of the inspection, the site was vacant and no usage of hazardous materials was identified. No hazardous waste was observed on-site at the time of the reconnaissance. No visual evidence of chemical spills or leaks was observed during our site reconnaissance.

4.3 Asbestos Containing Materials

As there are no permanent structures or suspect materials were observed on-site, the Phase I ESA completed by Citadel did not include an asbestos survey.

4.4 Lead Paints

As there are no permanent structures or suspect lead paint was currently located onsite, the Phase I ESA completed by Citadel did not include a lead paint survey.

4.5 Polychlorinated Biphenyls

Typical sources of polychlorinated biphenyls (PCBs) include electrical transformer cooling oils, fluorescent light fixture ballasts and hydraulic oil. In 1976, the U.S. EPA banned the manufacture and sale of polychlorinated biphenyl (PCB)-containing transformers. Prior to this date, transformers were frequently filled with a dielectric fluid containing PCB-laden oil. By 1985, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 5.0 meters (40 Code of Federal Regulations 761.30: "Fire Rule").

No transformers or other suspect PCB-containing equipment was observed on-site at the time of Citadel's reconnaissance.

No evidence of additional sources of potential PCB containing equipment was observed at the subject site.

4.6 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were visually observed during the site reconnaissance.

4.7 Septic Tanks and Cesspools

No septic tanks or cesspools were visually observed during the site reconnaissance.

4.8 Wells, Cisterns and Sumps

No sumps, cisterns or wells were visually observed during the site reconnaissance.

4.9 Wastewater Interceptors / Grease Interceptors

No wastewater interceptors or grease interceptors were visually observed on-site during the reconnaissance.

4.10 Drinking Water

Drinking water is not currently supplied to the site.

4.11 Radon

The Federal EPA Radon Zone for Alameda County is Zone 2, which indicates an average indoor concentration between 2.0 picoCuries per liter (pCi/L) of air and 4.0 pCi/L. The EPA action level for radon in a residential setting is 4.0 pCi/L.

A California Statewide Radon Survey was conducted in 1990 by the California Department of Health Services (DHS). San Diego County is in Region 6 of the Survey. A total of 242 homes in Region 6 were surveyed. The average concentration of radon was reported to be 1.1 pCi/L of air. Based on the results of this survey, DHS predicted that approximately 5.5% of homes in Region 6 will have radon concentrations over the USEPA action level of 4.0 pCi/L for residential settings.

Based on documented regional radon levels and the absence of any below-grade occupied spaces, radon gas is not expected to pose an environmental concern at the Site. If accurate levels of radon in the on-Site building need to be documented, Site specific testing by licensed personnel would be required.

5.0 SITE HISTORY

To investigate the history of the subject site, Citadel reviewed select historic aerial photographs, historic building permits, historic city directories and Sanborn Fire Insurance Rate Maps. Results of these investigations are discussed below.

5.1 Historical Aerial Photographs

Historical aerial photographs of the subject site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous materials generation or storage. Nine (10) aerial photographs dating from 1939 to 2005 were reviewed. Below are brief descriptions of observations made from the aerial photographs of the subject site and vicinity.

1939 Aerial Photograph

The site is depicted as fully developed with commercial structures (identified in Sanborn Maps as a yeast factory and a portion of a brewery). The neighboring properties to the north, east, southwest and west of the site are depicted with commercial-industrial structures. The neighboring property to the south of the site is depicted with large warehouses and multiple railroad spur tracks. In general, the site vicinity is densely developed with commercial structures immediately surrounding the site, with residential structures at a distance to the north and west, and an extensive railroad easement to the south.

1946 & 1959 Aerial Photographs

The site appears to be essentially unchanged from the 1939 aerial photograph. The neighboring properties appear to be essentially unchanged from the 1939 aerial photograph. A freeway (Interstate 880) is depicted in the area to the northeast of the site in the 1959 aerial photograph.

1965 Aerial Photograph

The site appears to be developed with the preexisting yeast factory and land recently cleared of structures. The structures formerly associated with the brewery (north of site and on-site) appear to be partially cleared. The neighboring properties to the east, south and west of the site appear to be essentially unchanged from the 1959 aerial photograph.

1972 Aerial Photograph

The site appears to be developed with the preexisting yeast factory, which has expanded throughout the site property. The present-day elevated BART light rail track is depicted adjacent to the north of the site. The neighboring properties to the north, east and west of the site appear to be partially developed with commercial structures and partially vacant. The neighboring property to the south of the site has been cleared of the majority of railroad spurs and is developed with a large storage / distribution building.

1982 & 1993 Aerial Photographs

The site appears to be essentially unchanged from the 1972 aerial photograph. The neighboring properties surrounding the site appear to be essentially unchanged from the 1972 aerial photograph, with the exception of a service station and a parking area to the north of the site, north of the BART easement.

1998 Aerial Photograph

The site appears to be essentially unchanged from the 1993 aerial photograph. The neighboring properties in all directions appear to be essentially unchanged from the 1993 aerial photograph, with the exception of the Interstate 880 Freeway which has been reconstructed a short distance to the south of the site (a reconstruction that occurred due to a large earthquake in the site vicinity which occurred in 1989).

2005 Aerial Photographs

The site appears to consist of vacant land cleared of structures. The neighboring property to the north of the site (north of the BART easement) appears to consist of a large paved parking area and a service station. The neighboring properties to the east of the site, across Kirkham Street, appear to be vacant. The neighboring property to the south of the site, across 5th Street, appears to be developed with a large warehouse structure and a paved parking lot. The neighboring properties to the southwest of the site appear to be developed with commercial structures. The neighboring properties to the west of the site, across Mandela Street, appear to be developed with a paved parking lot associated with a BART train stop.

Copies of the Aerial Photographs can be found in Appendix D.

5.2 Historic Building Permits

Historic building permits on-file with the City of Oakland included permits pertaining to the manufacture of yeast on-site from at least 1946-2008, as well brewery operations. The yeast manufacture and brewery operations were observed in the historical Sanborn Map review, please see section 5.3 below for an overview of operations at the site.

5.3 Historical Sanborn Fire Insurance Rate Maps

Sanborn Fire Insurance Rate Maps of the subject site were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous materials usage, generation or storage. Sanborn Maps dating from 1902, 1912, 1951, 1952, 1957, 1958, 1961, 1967 & 1970 were provided for review.

1902 Sanborn Map

The site is depicted as "Consumers Yeast & Vinegar Works", dwellings and a portion of a facility identified as "Washington Brewery". The yeast & vinegar facility is located in the southwestern portion of the site property, the brewery is located in the eastern

portion of the site property (extending off-site to the north) and the dwellings are depicted near the yeast & vinegar factory. Operations at the yeast & vinegar factory, as well as at the brewery, involve the usage of large tanks for fermenting and storage. One underground oil tank (capacity unidentified) is identified in the eastern portion of the yeast & vinegar facility.

Developed roads depicted in the site vicinity include Cypress Street immediately west of the site (in the approximate location of present-day Mandela Parkway), Kirkham Street immediately east of the site, and 5th Street bounding the site property to the south. The neighboring properties to the north and east of the site are depicted with dwellings. The brewery partially located on-site extends to the north of the site, along Kirkham Street. The neighboring properties to the south of the site are primarily undeveloped, with the exception of two (2) railroad spurs. The neighboring properties to the southwest and west of the site are partially vacant and partially developed with dwellings.

1912 Sanborn Map

The site is depicted with the yeast and vinegar factory, additional dwellings and the southern portion of the brewery, now identified as "Golden West Brewing Co.". The operations at the yeast factory and brewery are depicted as essentially unchanged from the 1902 Sanborn Map, including aboveground tanks and vats, however, the underground oil tank is no longer depicted. The street pattern surrounding the site is essentially unchanged from the 1902 Sanborn Map. The neighboring properties to the north of the site are depicted with additional dwellings and portions of the brewery. The neighboring properties to the east of the site (partially depicted), are identified as dwellings and a standard warehouse for general storage. The neighboring properties to the south of the site are depicted with a "Southern Pacific Freight Depot", a "Southern Pacific Freight Shed" and numerous railroad spurs. The neighboring properties to the southwest and west of the site are depicted with manufacturing facilities, warehouses and dwellings.

1951 & 1952 Sanborn Maps

The site is depicted with the yeast and vinegar factory and an expansion of the brewery previously identified. The brewery, located partially on-site in the central and eastern portions of the site and throughout the area immediately north of the site, is identified as "Goebel Brewing Co. of California." The operations at the yeast and vinegar facility are identified as essentially the same as the 1912 Sanborn Map and brewery operations on-site appear to consist primarily of warehousing. The neighboring properties to the east, southwest and west of the site are depicted with additional warehouses and manufacturing. The neighboring property to the south of the site appears to be essentially unchanged from the 1912 Sanborn Map.

1957 Sanborn Map

The site is depicted with the yeast factory, now identified as "Red Star Yeast Co., Plant No. 4" and the brewery previously identified. The brewery, which extends from the eastern portion of the site to the north and east of the site, is depicted as no longer in

operation, however machinery is identified as in place. The neighboring properties to the south and west of the site are depicted as essentially unchanged.

1958 & 1961 Sanborn Maps

The site is depicted with the yeast factory and a portion of a larger brewery. The brewery is identified as "Pacific Brewing Inc." The brewery operations on-site appear to consist primarily of warehousing. The neighboring properties are essentially unchanged from the 1957 Sanborn Map.

1967 Sanborn Map

The site is depicted with the yeast factory (Red Star Yeast Co.) occupying the entire site property. The former brewery is no longer depicted to the north of the site, which is depicted primarily as vacant land, with a gasoline service station to the north of the site, at the intersection of Cypress Street and 7th Street. The neighboring buildings to the east of the site are depicted as warehouses. The neighboring properties to the south of the site are depicted with railroad spurs, however, the former structures associated with the railroad have been removed. The neighboring properties to the southwest of the site are depicted with factories, warehouses and small commercial buildings. The neighboring properties to the west of the site are depicted as cleared of all former structures.

1970 Sanborn Map

The site is depicted with the yeast factory, now identified as "Universal Foods Corp." Red Star Yeast Division. The neighboring properties are essentially unchanged from the 1967 Sanborn Map, with the exception of the neighboring properties to the south of the site, which are developed with an office building, a few remaining railroad spurs and freight storage.

5.4 Historical City Directories

City Directories were provided by EDR in order to identify previous site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. City Directories dating from 1920 through 2006 (non-inclusive) were researched. The site hotel was not identified in the city directories reviewed, however, a prior site address, 1384 5th Street, was identified as Red Star Yeast manufacturing in the 1967 and 1992 directories.

Neighboring properties identified included numerous commercial facilities, storage and distribution warehouses, manufacturing facilities and trucking operations in the site vicinity.

5.5 Previous Environmental Reports

Citadel reviewed the following previous report in conjunction with this Phase I ESA:

Phase I Environmental Site Assessment, Red Star, APN 004-0069-004, 1384 Fifth Street, Oakland, Alameda County, California 94607. Prepared by RNC Environmental, LLC on December 8, 2009.

In December 2009, RNC Environmental, LLC (RNC) completed a Phase I ESA of the site. The Phase I ESA consisted of a site inspection, a historical records review and an environmental records review. At the time of the Phase I ESA the site was vacant and no environmental concerns regarding site usage at the time were identified. The historical sources reviewed primarily included previous environmental reports, including the following:

- Phase I & II Environmental Site Assessment, Remediation Services, Inc., June 15, 2005;
- Limited Environmental Site Characterization, Treadwell & Rollo, May 16, 2006;
- UST Removal Report, Treadwell & Rollo, October 20, 2006;
- UST Closure Letter, Oakland Fire Department, November 30, 2006;
- UST Soil and Groundwater Confirmation Sample Results, Treadwell & Rollo, December 15, 2006;
- Soil Sampling Report, Treadwell & Rollo, May 30, 2007;
- Geotechnical Report, Geoboden, Inc., July 8, 2008;
- Phase I Environmental Site Assessment, SCS Engineers, August 15, 2008; and
- Property Mitigation Plan, SCS Engineers, October 1, 2008.

Overall, the previous environmental reports concluded that the site was occupied by a yeast and vinegar factory (western portion of the site) and a brewery (eastern portion of the site, extending off-site) prior to 1902. Prior to 1902, no Sanborn Maps, aerial photographs or other environmentally-related historical sources could be located, however, a land deed for a portion of the site dated circa 1880 was identified, indicating that the site, or immediate site vicinity, was somewhat developed at that time. The combined site usage of yeast factory and brewery continued until approximately 1966, when the brewery was demolished and the yeast factory expanded throughout the site property. The yeast factory operations were discontinued in 2003 (in conjunction with a sale of factory ownership) and the former structures removed in 2004. The site has remained vacant since that time.

The Phase I ESA from SCS Engineers (SCS), reviewed by RNC, identified numerous potential and recognized environmental concerns related to the former site operations and the results of previous site investigations. Identified as environmental concerns were the presence of elevated lead concentrations in the site soil, the presence of elevated mercury concentrations in site soil, the presence of total petroleum hydrocarbons in site groundwater, and the presence of historic fill at the site. At the conclusion of the Phase I ESA, SCS recommended that a case be opened with the Alameda County Environmental Health Services (ACEHS) department and that additional assessments be completed. SCS completed the Property Mitigation Plan (PMP) for the site in October 2008, following the Phase I ESA. The PMP was

designed to facilitate the redevelopment of the site into an affordable housing complex. RNC reported that the PMP was approved by the ACEHS department and recommended that the PMP be implemented.

5.6 Interviews

Citadel interviewed Mr. David Lukens, a representative of the current site ownership. Mr. Lukens had no knowledge of current hazardous materials usage or storage on-site. Mr. Lukens provided Citadel with documents pertaining to prior hazardous materials usage at the site.

5.7 Environmental Lien Search

Citadel contracted with EDR to perform an Environmental Lien Search for the site property. The Environmental Lien Search report reviewed did not identify any current environmental liens or other activity and use limitations for the subject site.

5.8 Summary of Site History

According to the historical sources reviewed, the site was occupied by a yeast and vinegar factory (western portion of the site) and a brewery (eastern portion of the site, extending off-site) from at least 1902 through 1966. Prior to 1902, no Sanborn Maps, aerial photographs or other environmentally-related historical sources could be located, however, a land deed for a portion of the site dated circa 1880 was identified, indicating that the site, or immediate site vicinity, was somewhat developed at that time. The combined site usage of yeast factory and brewery continued until approximately 1966, when the brewery was demolished and the yeast factory expanded throughout the site property. The yeast factory operations were discontinued in 2003 (in conjunction with a sale of factory ownership) and the former structures removed in 2004. The site has remained vacant since that time.

6.0 REGULATORY AGENCY REVIEW

6.1 Database Review

Citadel contracted Environmental Data Resources, Inc. (EDR), to conduct a database search of standard environmental records sources to help identify recognized environmental conditions in connection with the subject site. A full description of the regulatory agency lists researched can be found in Appendix C. Lists identifying facilities within the search radii and the subject site are discussed below.

Major Hazardous Waste Sites Databases				
DATABASE	AGENCY	RADIUS		
National Priority List (NPL); Delisted NPL List	United States Environmental Protection Agency (USEPA)	1.0 mile		
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), No Further Remediation Action Planned (NFRAP)	United States Environmental Protection Agency (USEPA)	0.5 mile		
Resource Conservation and Recovery Act (RCRA), Corrective Action Report (CORRACTS), Treatment Storage and Disposal (TSD), Large Quantity Generators (LQG), and Small Quantity Generators (SQG)	United States Environmental Protection Agency (USEPA)	CORRACTS = 1.0 mile; TSD = 0.50 mile; LQG / SQG = 0.25 mile		
Engineering Institutional Control / Engineering Control Registries	United States Environmental Protection Agency (USEPA)	0.50 mile		
Annual Workplan Sites / CAL- Sites	California Environmental Protection Agency (Cal/EPA)	1.0 mile		
Leaking Underground Storage Tank Report (LUST)	California Division of Environmental Protection; Regional Water Quality Control Board (RWQCB)	0.50 mile		
Underground Storage Tank (UST)	State Water Resources Control Board (SWRCB)	0.25 mile		
Spills, Leaks, Investigations, and Cleanups (SLIC)	State Water Resources Control Board (SWRCB)	0.25 mile		
Solid Waste Information System (State Landfill)	Integrated Waste Management Board (IWMB)	0.50 mile		
Cleaner Facilities (Drycleaners)	California Division of Environmental Protection; Department of Toxic Substance Control (DTSC)	0.25 mile		
Indian Reservations Hazardous Waste Sites, Indian Equivalent NPL, CERCLIS, Landfill, Engineering Controls, Brownfields	Indian Reservations	1.0 mile or equivalent State / Federal distances		

Major Hazardous Waste Sites Databases					
DATABASE	AGENCY	RADIUS			
Indian Leaking Underground Storage Tanks (LUST)	Indian Leaking Underground Storage Tanks (LUST)	0.5 mile			
Indian Registered Underground Storage Tank (UST)	Indian Registered Underground Storage Tank (UST)	0.25 mile			

The site is identified on the SLIC case list as an open assessment. The SLIC case was opened on a voluntary basis by site ownership to initiate the site cleanup and redevelopment process. The lead regulatory agency for this SLIC case is the ACEHS, please see section 6.2 below for details regarding the current case status.

The neighboring properties identified on federal and state environmental lists, do not represent an environmental concern to the site, based on previous subsurface site assessments which have not identified the migration of off-site contamination. Additionally, many of the off-site facilities are not a concern due to their distance, current regulatory status (Case Closed, deed restriction, etc.) and/or direction hydrogeologically down or cross gradient from the site, however, several of these properties are identified within a 1/8-mille radius of the site.

6.2 Agency Correspondence

Citadel submitted requests to the following agencies for information regarding the subject site:

- Δ Alameda County Environmental Health Services (ACEHS);
- Δ Bay Area Air Quality Management District (BAAQMD)

ACEHS

The ACEHS contains an active SLIC case file for the investigation and proposed remediation currently being coordinated by site ownership. The ACEHS file includes the previously approved PMP submitted by SCS in October 2008, as well as a recent Subsurface Investigation Report (dated March 18, 2011) and Remedial Action Plan (dated April 4, 2011) prepared by Citadel. The subsurface investigation was performed at the direction of the ACEHS, to further characterize the impact to the site and included a geophysical survey of the site to locate potential underground tank, impoundments and/or wells. The Remedial Action Plan was developed following the subsurface investigation, to identify the measures required to prepare the site for residential redevelopment. In response to the April 2011 Remedial Action Plan, the ACEHS published a public notice regarding the proposed remediation and requested some additional documents and evaluations from Citadel. At this time, an addendum / revision to the Remedial Action Plan is awaiting final submittal and

approval by the ACEHS. A prompt start to the soil excavation / remediation is anticipated following approval.

BAAQMD

At the time of issuance of this report, the BAAQMD has not responded to Citadel's request. Any information received, which alters the conclusions to this report, will be forwarded in a letter of addendum.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Citadel Environmental Services, Inc. (Citadel) was contracted by Oakland Housing Investors, LP (client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 1396 5th Street in the City of Oakland, Alameda County, California; hereinafter referred to as the "site."

The site inspection focused on general site conditions, on-site hazardous materials (use and storage), hazardous waste (generation, storage, and disposal), the presence of surface impoundments, underground and/or aboveground storage tanks (USTs and ASTs), the use of hydraulically operated equipment, and the presence of on-site power transformers.

The site property is located at 1396 5th Street in the City of Oakland, Alameda County, California. Formerly, the site was also affiliated with the street address of 1384 5th Street. The site property is situated to the north of 5th street, to the east of Mandela Parkway and to the west of Kirkham Street. The northern boundary of the site underlies an elevated Bay Area Rapid Transit (BART) light rail track. The site property consists of one (1) trapezoidal-shaped parcel of land, identified by Alameda County Assessor's Parcel Number 04-0069-04, containing a total approximate area of 0.88 acres (38,333 square feet).

The site currently consists of vacant land. There are no permanent structures located on the site. The site perimeter contains a fence which restricts pedestrian and automotive site access.

The site vicinity is characterized by commercial, mixed-use and residential developments, as well as an elevated light rail track. An easement for the elevated light rail track, the Bay Area Rapid Transit (BART) exists along the northern site boundary. North of the BART easement is a large surface paved parking lot. The neighboring property to the east of the site, across Kirkham Street, is a vacant lot. The neighboring property to the south of the site, across 5th Street, consists of a large commercial building and an associated paved parking lot. The neighboring properties to the southwest of the site are developed with commercial structures. An older single-family residential community is located to the southwest of the site, along 5th Street. The neighboring property to the west of the site, across Mandela Parkway, is developed with a BART station and associated surface parking.

Citadel inspected the site for chemical and hazardous waste storage and handling practices. At the time of the inspection, the site was unoccupied and no visual evidence of chemical spills or leaks was observed.

According to the historical sources reviewed, the site was occupied by a yeast and vinegar factory (western portion of the site) and a brewery (eastern portion of the site, extending offsite) from at least 1902 through 1966. Prior to 1902, no Sanborn Maps, aerial photographs or other environmentally-related historical sources could be located, however, a land deed for a portion of the site dated circa 1880 was identified, indicating that the site, or immediate site vicinity, was somewhat developed at that time. The combined site usage of yeast factory and brewery continued until approximately 1966, when the brewery was demolished and the

yeast factory expanded throughout the site property. The yeast factory operations were discontinued in 2003 (in conjunction with a sale of factory ownership) and the former structures removed in 2004. The site has remained vacant since that time.

Historic Recognized Environmental Conditions (RECs) identified at the site include aboveground and underground fuel tanks, the use of various chemicals with several documented releases, and an unauthorized release of mercury to the sewer system with apparent impacts to the subsurface soil. These issues were initially addressed at the time of incident or by previous on-site investigations / remedial actions. However, current RECs at the site include a surficial layer of artificial fill that appears to be 3-5 feet thick and extends across much of the property and elevated TPH in the in groundwater at one (1) location. Previous soil testing indicated the fill had elevated levels of lead in some areas, and detectable but, generally low, levels of mercury. Groundwater is present at about 4 feet below grade and previous sampling indicated that the groundwater beneath portions of the site was impacted with diesel and oil-range petroleum hydrocarbons.

The lead regulatory agency, Alameda County Environmental Health Services (ACEHS) contains an active Spills, Leaks, Investigations and Cleanups (SLIC) case file for the investigation and proposed remediation currently being coordinated by site ownership. The ACEHS file includes the previously approved Property Mitigation Plan (PMP) submitted by SCS Engineers in October 2008, as well as a recent Subsurface Investigation Report (dated March 18, 2011) and Remedial Action Plan (dated April 4, 2011) prepared by Citadel. The subsurface investigation was performed at the direction of the ACEHS, to further characterize the impact to the site and included a geophysical survey of the site to locate potential underground tank, impoundments and/or wells. The Remedial Action Plan was developed following the subsurface investigation, to identify the measures required to prepare the site for residential redevelopment. In response to the April 2011 Remedial Action Plan, the ACEHS published a public notice regarding the proposed remediation and requested some additional documents and evaluations from Citadel. At this time, an addendum / revision to the Remedial Action Plan is awaiting final submittal and approval by the ACEHS. A prompt start to the soil excavation / remediation is anticipated following approval.

Citadel recommends that the final Remedial Action Plan, when approved by the ACEHS, be implemented. The implementation of the approved Remedial Action Plan should be completed with continued agency communication and oversight until the receipt of a "no further action" status by the ACEHS.

Citadel has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 and the All Appropriate Inquiries (AAI) Rule published in 40 CFR Part 312, of the property identified as 1396 5th Street in the City of Oakland, Alameda County, California. Any exceptions to, or deletions from, this practice are described in the Scope of Services section of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the aforementioned property, with the exception of a surficial layer of artificial fill which appears to extend across much of the site property and TPH detected in groundwater at one location, which will be addressed under a remediation plan to be implemented pending approval by the ACEHS.

8.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel Environmental Services, Inc. will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession, but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies, etc.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/31/2010 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
AMCO CHEMICAL	1414 THIRD STREET	SSW 0 - 1/8 (0.037 mi.)	0	9

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive

Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/25/2011 has revealed that there are 3 CERCLIS sites within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/25/2011 has revealed that there are 4 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 05/25/2010 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/11/2011 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2011 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 03/15/2011 has revealed that there are 50 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/11/2011 has revealed that there are 2 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

PG AND E OAKLAND	50 MARKET ST BTWN 1ST A	ESE 1/2 - 1 (0.702 mi.)	AG139	403

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 6 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

Summary Details:

Conditions at Proposal April 30, 2003): The AMCO Chemical site AMCO) is part of a 0.83-acre property at 1414 Third Street in a mixed residential and light industrial area of Oakland, California. The property is bordered on the north by a vacant lot, on the west by residences, on the east by Nelson Mandela Parkway, and on the south by Third Street. A recently constructed elevated portion of the Interstate-880 I-880) freeway is located immediately across Third Street from the property. The property at 1401 Third Street) was historically occupied by Bobo s Junkyard. From the 1960s to 1989, the AMCO site was occupied by AMCO Chemical Company. AMCO operated a chemical distribution facility that included a warehouse, railroadspur, above-ground tanks, underground tanks, and drums used to transfer and store raw materials. In July 1988, the Oakland Fire Department observed leaking/rotting drums on the property. A subsequent emergency response investigation by AlamedaCounty and the U.S. Coast Guard revealed greater than 100 full and empty 5- and 55gallon weathered drums in an open area behind AMCO Chemical s main building. Stenciled labels on the drums indicated that the contents included acetone; 1,1,1-trichloroethane 1,1,1-TCA); methyl ethyl ketone; and dry-cleaning solvent. From 1989 to November 1998, DC Metals operated a scrap metal yard on the site. Cable Moore, Inc., currently uses the site for cable storage. Structures remaining on site include an office building, warehouse, and two small storage buildings. In June 1995, a construction crew noted odors at the intersection of Third Street and Nelson Mandela Parkway, while excavating a trench needed to relocate an underground electrical line in preparation for a freeway project. Subsequent subsurface investigation by California Department of Transportation Caltrans), DC Metals, and EPA revealed the presence of volatile organic compounds VOCs) including vinyl chloride in soil, soilgas, and shallow ground water at the AMCO site, beneath Third Street, and at the 1401 Third Street property former Bobo s Junkyard). On December 5, 1996, the EPA Emergency Response Office initiated a removal action at the AMCO site that involved the construction of a ground water and soil vapor extraction

SVE) treatment system. The EPA treatment system collection trench was excavated from December 5 through December 20, 1996. By December 23, 1996, the trench had been lined with a silt curtain, filled with gravel, and covered with a tarp. Cement was poured to permanently cover the trench on January 8, 1997. The treatment system operated from January 1997 through July 1998 and extracted approximately 7,000 pounds of VOCs, approximately 40 pounds of which were vinyl chloride. Operation of the system ceased in July 1998, due to community concern over the potential for a release of dioxins from the thermal oxidation unit. On December 5 and 14, 1996, during construction of the treatment system collection trench, the EPA On-Scene Coordinator observed shimmering vapors emanating from the open trench. SUMMA tm) canister sampling indicated the presence of vinyl chloride; methylene chloride; 1,1,1-trichloroethane TCA); and trichloroethene TCE) in the immediate area of the trench. In addition, one SUMMA canister sample collected from in front of a residence adjacent to the site contained TCE. The EPA conducted several sampling events on and adjacentto the AMCO site between 1997 and 2000. VOCs continued to be detected in soil, soil gas, and ground water on site. In September 1999, SUMMA canister samples were collected from the crawl spaces of three residences located adjacent to the site. Vinyl chloride was detected in the three crawl spaces at 0.02 to 0.045 parts per billion by volume ppbv). There are 626 people living within a quarter of a mile of the source. There are also approximately three workers on site. Status September 2003):EPA is considering various alternatives for this site. The description of the site release) is based on information available at the time the site was evaluated with the HRS. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices. For more information about the ha ardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at http://www.atsdr.cdc.gov/toxfaq.html or by telephone at 1-888-42-ATSDR or 1-888-422-8737.

Background Info: The site was occupied by AMCO Chemical Corp. until December

1989. DTSC inspected the site on August 4, 1988. An order to Fence and Post the site was issued on August 8, 1988. On February 24, 1989 a Report of Violation was issued to correct violations related to leakage of hazardous waste from piping and containers; storage of hazardous waste in deteriorated or otherwise corroded conditions; and unlabeled waste containers. Soil and groundwater located outside of the site boundary were sampled by Caltrans and Southern Pacific Railroad. Elevated levels of VOC's (vinyl chloride, 1, 1-DCE, PCE, 1, 1, 1-TCA, 1, 2-DCE),

acetone, toluene and xylene have been found in soil and/or

groundwater.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS V

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info: Alexander's Ragtime Auto Wreckers operated an auto wrecking facility at the 0.3 acre Site from approximately 1966 to 1987.

facility at the 0.3 acre Site from approximately 1966 to 1987. Meyer Goldberg and Miriam Goldberg were owners of the Site during Alexander's Ragtime Auto Wrecker's operation at the Site. The Goldbergs sold the Site to the San Francisco Bay Area Rapid

Transit District (BART) in 1987. The Site is located in an industrial neighborhood with residences and other commercial areas located less than one block away. Business activities in the area include manufacturing, food processing, warehousing and offices. Residential areas are located to the north and west of

the the Site. 04242000

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: A waste oil UST was removed from the site in August 1996. Apparently,

a subsurface investigation was conducted; however a report was not submitted. In August 1997, three additional USTs consisting of one 4,000-gallon, one 8,000-gallon, one 9,000-gallon USTs were removed

from the site. No additional work has been conducted.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

both CalTrans and Southern Pacific Transportation Company (SPTCo) in the eastern portion of the site. Soil was found to be contaminated with petroleum compounds, pesticides, arsenic, lead, benzo(a)pyrene and volatile organic compounds. Groundwater was found to contain low-boiling petroleum hydrocarbons and volatile organic compounds. Both CalTrans and SPTCo were required to prepare a Removal Action Workplan (RAW) for the Eastern Portion of the site. The CalTrans RAW addressed the site during construction of the freeway whereas the SPTCo RAW describes post-construction actions. Both RAWs were approved in December 1996. The CalTrans RAW required a design change to the construction of Bent CR23. Three proposed footings were redesigned and located at ground level, and piles were redesigned so that no soil coring was required. In addition, a fourth footing was added to ensure stability in the event of an earthquake. Disposal of groundwater was not required as no excavation occurred. The remaining footings were constructed according to the existing design. Sealed shoring was installed at these footing locations to limit the amount of groundwater infiltration during construction excavations. Excavated groundwater was treated onsite and then either reused onsite or properly disposed off-site. The SPTCo RAW concluded that the site (soil and groundwater) does not pose a risk to human health and the environment under the exposure scenarios identified in the risk assessment (child trespasser and future construction worker). The alternative selected in the RAW requires an asphalt cap (or equivalent) with institutional controls and groundwater monitoring. This alternative was selected as SPTCo desired a useable surface at the site after freeway construction is completed. Two monitoring wells were installed downgradient of where cis-1,2-DCE was detected in groundwater. The purpose of the monitoring wells are to verify that cis-1,2-DCE is not migrating off the site. The Department will re-evaluate the need for additional remediation following the implementation of the U.S. EPA's investigation associated with an upgradient source, and in the event that groundwater concentrations rise significantly at the site. A five-year review of the removal action at the site will also be conducted.

Completed Document Type: Removal Action Workplan
Completed Date: 1996-12-23 00:00:00

Comments: RAWs approved. Soil and groundwater investigations were conducted by

both CalTrans and Southern Pacific Transportation Company (SPTCo) in the eastern portion of the site. Soil was found to be contaminated with petroleum compounds, pesticides, arsenic, lead, benzo(a)pyrene and volatile organic compounds. Groundwater was found to contain low-boiling petroleum hydrocarbons and volatile organic compounds. Both CalTrans and SPTCo were required to prepare a Removal Action Workplan (RAW) for the Eastern Portion of the site. The CalTrans RAW addressed the site during construction of the freeway whereas the SPTCo RAW describes post-construction actions. Both RAWs were approved in December 1996. The CalTrans RAW required a design change to the construction of Bent CR23. Three proposed footings were

redesigned and located at ground level, and piles were redesigned so that no soil coring was required. In addition, a fourth footing was added to ensure stability in the event of an earthquake. Disposal of groundwater was not required as no excavation occurred. The remaining footings were constructed according to the existing design. Sealed shoring was installed at these footing locations to limit the amount of groundwater infiltration during construction excavations.

Excavated groundwater was treated onsite and then either reused onsite or properly disposed off-site. The SPTCo RAW concluded that the site (soil and groundwater) does not pose a risk to human health and the environment under the exposure scenarios identified in the risk assessment (child trespasser and future construction worker). The alternative selected in the RAW requires an asphalt cap (or equivalent) with institutional controls and groundwater monitoring. This alternative was selected as SPTCo desired a useable surface at the site after freeway construction is completed. Two monitoring wells were installed downgradient of where cis-1,2-DCE was detected in groundwater. The purpose of the monitoring wells are to verify that cis-1,2-DCE is not migrating off the site. The Department will re-evaluate the need for additional remediation following the implementation of the U.S. EPA's investigation associated with an upgradient source, and in the event that groundwater concentrations

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Action Completion Report

Completed Date: 1997-09-22 00:00:00

Comments: Per the Feasibility Study/Remedial Action Plan, Caltrans excavated

soils and disposed them at a permitted off-site location.

Groundwater monitoring wells were also installed and have been monitored quarterly. An asphalt cap has also been installed on the

property.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Design/Implementation Workplan

Completed Date: 1996-02-07 00:00:00

Comments: Remedial Design and Implementation plan approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

Completed Document Type: Remedial Action Plan Completed Date: 1995-08-14 00:00:00

Comments: RAP approved. PEA completed in June 1995. Parcel is a candidate for

groundwater non-attainment action. Capping of the entire site is

under discussion with DTSC and RWQCB.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Investigation / Feasibility Study

Completed Date: 1995-07-03 00:00:00

Comments: RIFS conducted. Site investigations have shown that the soil and

groundwater contain elevated levels of petroleum hydrocarbons, arsenic, lead, volatile organic compounds and semi-volatile organic compounds. Site investigation activities, performed prior to the 5/10/1994 VCA, were reported in the oSite Investigation Report u Area 80 dated August 1992. The RI/FS was approved on July 3, 1995 when the

Remedial Action Plan Was approved.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Preliminary Endangerment Assessment Report

Completed Date: 1995-06-19 00:00:00

Comments: PEA approved. Caltrans demolished the existing warehouse building. A

700-gallon underground diesel tank was also removed under the

oversight of Alameda County.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Action Completion Report

Completed Date: 2007-02-20 00:00:00

Comments: Report documents the soil excavation, off-site disposal and capping

of the site.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Completed Document Type: Remedial Action Completion Report

Completed Date: 1996-08-13 00:00:00

Comments: Remedial Action completed. Approximately 4,700 cubic yards of soil

was excavated to six feet below ground surface. The site was paved

for use as a training area for postal vehicles. Caltrans has

installed groundwater monitoring wells and is conducting quarterly monitoring. Since the remediation goals contained in the approved RAP were for an industrial/commercial use, a deed restriction will be

placed on the property restricting use.

Completed Date: 1995-08-14 00:00:00

Comments: Approved RAP requiring soil removal, groundwater monitoring and deed

restriction if levels left are above unrestricted use.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Investigation / Feasibility Study

Completed Date: 1995-07-03 00:00:00

Comments: Approved RIFS. Lead was the only contaminant found in excess of the

acceptable concentrations.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Preliminary Endangerment Assessment Report

Completed Date: 1995-03-15 00:00:00

Comments: Completed PEA found the Site had elevated levels of petroleum hydrocarbons, PCBs, metals, semi-and volatile organic compounds.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Amendment - Order/Agreement

Completed Date: 1999-01-07 00:00:00

Comments: Amendment to the May 10, 1994 VCA, which allows work to continue

under Chapter 6.5 of the Health and Safety Code.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Amendment - Order/Agreement

Completed Date: 2002-08-15 00:00:00

Comments: Amendment to the 5/10/1994 VCA to amend Section 3.16, "Payment" and

Section 3.35, "Time Periods".

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Voluntary Cleanup Agreement

Completed Date: 1994-05-10 00:00:00

Comments: VCA signed with Caltrans. This project is part of the Cypress

Reconstruction Project. In entering into this Agreement, it is the objective of the Parties to conduct Preliminary Endangerment Assessments, removal actions, necessary implementation, risk assessment, design review and/or a Remedial Action Plan as required

on a site by site evaluation.

Completed Document Type: Remedial Action Completion Report

Completed Date: 1996-08-13 00:00:00

Remedial Action completed. Approximately 4,700 cubic yards of soil Comments:

was excavated to six feet below ground surface. The site was paved

for use as a training area for postal vehicles. Caltrans has

installed groundwater monitoring wells and is conducting quarterly monitoring. Since the remediation goals contained in the approved RAP were for an industrial/commercial use, a deed restriction will be

placed on the property restricting use.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Remedial Investigation / Feasibility Study

Completed Date: 1995-07-03 00:00:00

Comments: Completed RIFS. Site investigation was conducted by Caltrans consultants in June 1992. Soil and groundwater samples were

consultants in June 1992. Soil and groundwater samples were collected as part of the investigation. Groundwater was encountered

at a depth of 6-7 feet. Soil samples revealed the following

contaminants: total recoverable petroleum hydrocarbons (TRPH) as high as 6,700 ppm; TPH as diesel as high as 3,800 ppm; acetone-150 ppb; di-n-butylphthalate 0.9 ppm; bis (2-ethylhexyl)phthalate 0.9 ppm; pyrene 0.3 ppm; benzo-a-pyrene 0.3 ppm; lead (840 ppm). The following contaminants were detected in groundwater: arsenic (0.22

ppm); barium (1.1 ppm); and cadmium (0.02 ppm).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 1992-12-28 00:00:00

Comments: Completed Site Screening. It is a RCRA facility with five

underground storage tanks. Of these, two are 10,000-gallon capacity diesel tanks, one is a waste oil tank, one is a fresh oil tank, and one is an abandoned solvent tank. The solvent tank is reportedly filled with water. All the tanks are reported to have tested

File Location: Stored electronically as an E-file

Potential Media Affect: Other Groundwater (uses other than drinking water), Soil

Potential Contaminants of Concern: Diesel, Gasoline

Site History: Between 1932 and 1973 the site was used as a service station. The

number of generations of USTs that have been installed at the site is unknown. A number of USTs were removed in 1973 when the service station was decommissioned. In August 1989 bores B1 to B5 were installed and elevated concentrations were encountered. In 1995 three soil bores were installed, and in October wells MW-1 to MW-4 were installed. Nine additional soil bores were installed in March 1996, and in December offsite wells MW-5 to MW-7 were installed. In 1997 five soil vapor bores were installed. In 1999 u 2000 two more USTs were removed and a buried 55-gallon drum (as a waste oil UST) was removed. Hydraulic hoists were also removed at this time. In January 2002 well MW-8 was installed offsite. Twenty-three Geoprobe bores were installed in June 2002 to profile soil for upcoming over-excavation; elevated concentrations were encountered. In November 2002 approximately 1,584 tons of impacted soil was removed from the site and 900 pounds of ORC was placed in the excavation prior to backfilling with Class II aggregate base-rock. In January 2003 seven soil bores were installed and well MW-1 was replaced with MW-1A; elevated concentrations were detected. In October 2004 installed five CPT bores up to 70 feet bgs, and installed nine soil bores to 25 feet bgs. In preparation for potential additional over-excavation eight additional soil bores were installed in June 2006; ultimately the excavation did not proceed. In April 2007 wells MW-9 to MW-17 were installed to vertically delineate multiple water-bearing zones (and determine the direction of groundwater flow) beneath the site based on the results of the CPT bores installed in 2004. A Feasibility Study was submitted in November 2007, and modified in January 2008. Soil vapor was identified as a data gap in the November 2007 FS; consequently in November 2007 six permanent vapor points were installed at the site. Due to sampling problems, the vapor points were resampled in October 2008. A low flow air

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

U.S. importer of hazardous waste: No Mixed waste (haz. and radioactive): No Recycler of hazardous waste: No Transporter of hazardous waste: No Treater, storer or disposer of HW: No Underground injection activity: No On-site burner exemption: No Furnace exemption: No Used oil fuel burner: Nο Used oil processor: Nο User oil refiner: No Used oil fuel marketer to burner: No Used oil Specification marketer: No Used oil transfer facility: No Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008 Waste name: LEAD

Violation Status: No violations found

containers, and other miscellaneous equipment. The property is fenced. No volatile or semivolatile organic compounds were

detected at significant levels.

Comments Date: 06091997

Comments: SITE SCREENING PREPARED UNDER THE EPA GRANT INDICATES THAT

Comments Date: 06091997

Comments: FURTHER ASSESSMENT OF THIS SITE IS NEEDED.

Comments Date: 06182004

Comments: The Removal Action consisted of removal of approximately 105

Comments Date: 06182004

Comments: cubic yards of above-ground debris including tires, compressed

Comments Date: 06182004

Comments: gas cylinders and heavy equipment and excavation and offsite

06182004 Comments Date:

Comments: disposal of 700 cubic yards of soil and debris contaminated with

Comments Date: 06182004

lead to a Class I landfill. The property was then backfilled Comments:

Comments Date: 06182004

Comments: with clean material. All contamination above residential

Comments Date: 06182004

standards was removed and the site was certified in June 2004. Comments:

Comments Date: 06282002

Comments: DTSC conducted a Preliminary Assessment which found further

Comments Date:

Comments: action was required. Surface samples collected at the site found

06282002 Comments Date:

Comments: lead as high as 1,080 parts per million (ppm).

Comments Date: 10242003

Comments: DTSC approved a Removal Action Workplan (RAW) requiring the

10242003 Comments Date:

Comments: removal of all soils above residential levels. A notice of Comments Date: 10242003

Comments: exemption was approved for removal activities.

Comments Date:

An Imminent and Substantial Endangerment Order was issued to the Comments:

Comments Date: 10282002 Comments: property owner. 11092001 Comments Date:

Comments: DTSC conducted sampling at the site. Lead concentrations in

Comments Date: 11092001

surface soil were as high as 1,080 milligrams per kilogram (ppm). Comments:

Comments Date: 11092001

Comments: No volatile or semi-volatile compounds were found.

Comments Date: 12102002

Comments: The owner was found in non-compliance with the Order in December

Comments Date: 12102002 2002. Comments: Comments Date: 12142003

Comments: The Superior Court of California, County of Alameda issued an

12142003 Comments Date:

inspection warrant which granted DTSC access to sample and Comments:

Comments Date:

Comments: remediate the Lewis property. A warrant was needed since DTSC

Comments Date: 12142003

Comments: could not locate the property owner. Subsequently, DTSC was

Comments Date: 12142003

able to contact the property owner and work with them throughout Comments:

Potential Contaminants of Concern: Gasoline

Site History: In September 1994 three USTs were removed and elevated levels of

petroleum hydrocarbon contamination were detected in soil. Site investigations conducted between 1996 and 2002 confirmed the presence

of a dissolved plume; however the offsite extent of the dissolved

plume is not adequately defined.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

RB Case Number: 01-2322 LOC Case Number: RO0000234

File Location: Stored electronically as an E-file

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: Groundwater monitoring wells were installed at the site in 1996 in

response to a fuel release. In March 1999, two 10,000-gallon diesel USTs, one 10,000-gallon gasoline UST, and one 8,000-gallon gasoline

UST were removed from the site. Interim remedial action was performed during the UST removal to address contaminated soil and ground water. Approximately 2,100 tons of contaminated soil were removed from the excavation. Approximately 33,000 gallons of contaminated water was pumped from the tank pit for off-site disposal. Approximately 1,700 tons of backfill was placed in the

excavation. Site investigations that included soil and

groundwater sampling were conducted at various times between 1999 and 2006. Ozone sparging has been ongoing since September 24, 2005.

Case Worker: BJJ

Local Agency: ALAMEDA COUNTY LOP

RB Case Number: 01-0487 LOC Case Number: RO0000016

File Location: Stored electronically as an E-file

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: In November 1991, one 5,000-gallon gasoline UST, two 10,000-gallon

diesel USTs, one 750-gallon waste-oil UST, dispensers, and associated piping were removed from the site and replaced with two diesel USTs and one aboveground WOT. Elevated petroleum hydrocarbons were reported in soil collected from the excavation sidewalls. In June 1992, one 10,000-gallon diesel UST was removed. Groundwater contained 72,000 |g/L TPHd. Monitoring wells were installed in 1994. Free product was observed in MW-4 in the June 2002 monitoring event.

Free product bailing and adsorbent socks were deployed. Free product was reduced quickly. Groundwater monitoring discontinued

in 2003.

RB Case Number: NA

LOC Case Number: RO0002933

File Location: Stored electronically as an E-file

Potential Media Affect: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Gasoline

Site History: In August 1999 a subsurface investigation was completed in advance of

a potential property transaction, and significantly elevated levels of hydrocarbon contamination was detected in soil and groundwater beneath the site. However, no evidence of USTs were encountered during the investigation and there is no record of the removal of the USTs. Site characterization performed in 2007 and 2008 confirmed the presence of elevated levels of contamination. In November 2008 a DPE

pilot test was completed and results from the pilot test indicate that DPE is feasible and readily implemented. Currently, DPE is proposed to remove contamination in soil and groundwater.

samples were also collected during the pre-construction for the new Cypress replacement project. Groundwater sample analytical results collected in 1988 detected TPH-g and in June 1992. Groundwater sample analytical results collected in August 16, 2006 detected lower

concentrations of TPH-g and benzene.

Comments: Submittal of the Underground Storage Tank Removal Report on June 4,

2006.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets

Completed Date: 1995-07-03 00:00:00

Comments: Approval of Fact Sheet to inform the community of the availabity of

the FS/RAP for review.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 1995-07-03 00:00:00

Comments: Public Notice approval to notify the community of the FS/RAP

availibity for review.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Amendment - Order/Agreement

Completed Date: 1999-01-07 00:00:00

Comments: Amendment to the May 10, 1994 VCA, which allows work to continue

under Chapter 6.5 of the Health and Safety Code.

Hazardous Waste Summary:

Waste code: D00

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Corrective Action Summary:

Event date: 09/27/1990

Event: RFA Completed, Assessment was an RFA.

Event date: 09/27/1990 Event: RFA Completed

Event date: 09/27/1990

Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 03/29/1992 Event: RFI Imposition

Event date: 03/29/1992 Event: CMS Imposition

Event date: 06/16/1993

Event: Stabilization Measures Evaluation, This facility is not amenable to

stabilization activity at the present time for reasons other than 1-it appears to be technically infeasible or inappropriate (NF) or 2-there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at

the facility, or other administrative considerations.

Event date: 06/18/1993

Event: CA Prioritization, Facility or area was assigned a low corrective

action priority.

Event date: 01/01/1996 Event: RFI Imposition

Event date: 02/01/1996

Event: RFI Workplan Received

Event date: 02/23/1996

Event: RFI Workplan Approved

Event date: 05/20/1996 Event: RFI Approved

Event date: 04/06/2000

FINDS:

Registry ID: 110002334046

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

EDR ID Number

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110009329681

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Facility Status: Entered 8/27/04 - The Oakland Service Center is a service and

> operation center which leases and services Safety-Kleen parts cleaning equipment and solvents to Safety-Kleen customers. The service center also collects spent parts washer solvents,

aqueous-based solvents, dry cleaning wastes, spent silver-bearing waste and transfer wastes. Transfer wastes include industrial solvents, Freon, antifreeze, and paint waste/laquer thinners. The facility s hazardous waste storage permit expired in March, 1997. Safety-Kleen submitted a permit renewal application (Application) for the facility on February 14, 1997. Immediately after the completion of technical review of the revised Part B Application with three

Notices of Deficiencies (NODs), Safety-Kleen submitted supplements to the facility s permit renewal application to add three new waste streams (aqueous cleaners, used oil and used antifreeze) to be managed in the underground storage tank (UST) at the facility. The 12,000-gallon UST is currently only permitted for storage of spent parts washer solvent. The Fiscal Year 2004/2005 Annual Work Plan

calls for completion of technical review of the Application, preparation of draft permit, issuance of draft Neg Dec, public participation, and final permit determination. Update 6/29/07 - On April 17, 2006, SK notified DTSC that they intend to terminate their permitted activities and thus close the Oakland facility. The permitted units are: Tank Storage (one nominal 12,000-gallon double-walled underground storage tank used to store spent parts washer solvent), a Return/Fill Shelter (two drum washer units that hold a maximum of 1,500 gallons of sediment), and Container Storage (two container storage areas with a total waste storage capacity of 8,254 gallons). DTSC reviewed the closure plan of April 25, 1994 and determined that it was not up to current standards, and as a result, DTSC provided comments to SK on August 14, 2006. SK submitted a

revised closure plan on September 21, 2006 by a Class 1 Permit Modification. The revised closure plan was deemed complete by DTSC on October 24, 2006. SK began closure activities in the week of March 11, 2007 by decontamination of the units by cleaning the units with a detergent-water solution and high pressure spray. Decontamination wastes were collected using a tanker truck. The UST was pulled on May 23, 2007 with Keith Matthews of the City of Oakland Fire Department (CUPA) present. DTSC staff met with Brian Culnan of SK on 6/5/07 at the DTSC Sacramento Regional Office to discuss corrective action and

Completed Document Type: Site Screening
Completed Date: 1993-05-04 00:00:00

Comments: Completed Site Screening. Earlier site investigations indicated

surface soil contamination. Another investigation was conducted in October 1992 in conjunction with CalTrans activities and revealed presence of the following contaminants in soil: Total Revocerable Petroleum Hydorcarbons (TRPH) as high as 6,350 ppm; and lead as high as 161 ppm. Groundwater samples also showed TRPH as high as 2.6 ppm.

Surface soil staining was also noted during sampling activities.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Action Completion Report

Completed Date: 1996-08-09 00:00:00

Comments: Completed Remedial Action. As part of the Cypress construction

project, the entire site was excavated to a depth of 15 to 20 feet as

part of the construction of the 7th Street undercrossing. All

contaminated soil was removed and the underlying groundwater was

dewatered. No further remedial work was required.

PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported

Completed Document Type: Remedial Investigation / Feasibility Study

Completed Date: 1995-07-03 00:00:00 Completed RIFS. Comments:

PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported Completed Document Type: Site Screening Completed Date: 1993-05-04 00:00:00

Completed Site Screening. The site is a currently operating wrecking Comments:

yard and is fully occupied by abandoned cars, parts, and debris. Earlier site investigation indicated surface soil contamination. Subsequent field investigation conducted in October 1992 in conjunction with CalTrans activities revealed the presence of total recoverable petroleum hydrocarbons (TPRH) as high as 138,000 ppm.

Approximate volume of contaminated soil is 950 cubic yards.

Additional site characterization is necessary.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Voluntary Cleanup Agreement

Completed Date: 1994-05-10 00:00:00

Comments: Signed VCA.

PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported Completed Document Type: Certification Completed Date:

1997-10-17 00:00:00

Comments: Certified Site. Remediation goals were met for all contaminants. After remediation activities were completed, the site was further

excavated by Caltrans to a minimum of 15 feet for the construction of

the 7th Street undercrossing.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Completed Date: 2002-06-28 00:00:00

Comments: PEA - PA/SI - Preliminary Assessment completed for U.S. EPA which

found that no further action was needed at the site. Starting in 1998, the United States Environmental Protection Agency (US EPA) did an emergency removal of the hazardous substances. In October 1999, soil was removed in selected areas from 6 inches to 2 feet. There are no current operations at the site. Francis Plating used various plating solutions for aluminum anodizing, nickel and cadmium plating, and chromic acid passivation for stainless steel parts. Acids, bases, and dyes were used in the operation. Copper, lead, cadmium, nickel, cyanides, silver, zinc, sulfates, phosphates, chlorides, and soap solutions located in tanks and vats were some of the many chemicals used in the plating process. Some of these were located in a stainless steel containment tank 32 feet by 15 feet by 5 feet inside the building. There was a concrete pit area 15 feet by 68 feet by 3.5 feet outside in the "front yard" called the "Frog Pond". In the Front Yard along the 7th Street (east side) and along the fence next to the Shell Gas Station (north side) were limited areas of exposed soil. Most of the site was either paved, or had concrete or buildings on it. Francis Plating had a discharge permit and sent treated wastewater to the municipal sanitary system. East Bay Municipal Utility District (EBMUD) sealed the sanitary connection with concrete in the fourth quarter of 1996. Wastewater was then treated on-site. Wastewater, sent though the boiler to concentrate and precipitate the metals, was then fed into a filter press. The filter cake was spread out on the cement in the northern portion of the site and dried. There are no records of hazardous materials or waste removed from the site after 1993. After 1994, the property was used to store hazardous material picked up by Earthco Environmental for disposal. The trailers located in the "Rear Yard" area were used. Starting in 1994, hazardous substances generated by operations on site were recycled back into the manufacturing process. US EPA led the cleanup after the fire in 1992. Some runoff from the fire reached the Oakland Estuary from storm drains in the area of the Howard Terminal. Much of the runoff was captured and contained and later disposed off site. The Regional Water Quality Control Board (RWQCB) sampled the water and sediments in the estuary for US EPA. In July 1999, eight surface composite samples were taken in the front yard and three in the rear yard area along Brush Street. In addition, there were 12 subsurface borings taken around the site and five waste sediment locations. The results ranged as follows: cadmium up to 2,100 milligarms per kilogram (mg/kg), lead up to 26,000 mg/kg, arsenic up to 26 mg/kg, and chromium up to 84,000 mg/kg. Based on the initial results, exposed soil to the depth of one-foot was

EDR ID Number

removed along Brush Street and in the Front yard. After confirmation sampling, selected areas were excavated an additional six inches. After additional confirmation sampling, the site soil contained cadmium 0.7-7.5 mg/kg, lead 22-450 mg/kg, arsenic 1.2-7.4, and total chromium 13-300 mg/kg. Only one of the confirmation samples was above the residential cleanup levels for chromium and lead.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Background Info: The Gaines Site is a vacant lot located in a mixed residential/

commercial/industrial neighborhood. It has been used to store automobiles, drums, pressurized gas containers and other miscellaneous equipment. Surface samples collected found lead as high as 28,000 parts per million (ppm). No volatile or semivolatile organic compounds were detected at significant

levels.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Date: 1998-08-31 00:00:00

Comments: PEA - PASI - A Field Sampling Plan was prepared to conduct limited

sampling at the site on June 24, 1998 as part of the Site

Reconnaissance Visit. The site had contaminants above US EPA Region 9's Residential Preliminary Remedial Goals (PRG). Substances found were arsenic (5.78 mg/kg), cadmium (12.4 mg/kg), lead (589 mg/kg) and molybdenum (1130 mg/kg) comparing to the PRG's limits of arsenic (0.38 mg/kg), cadmium (9 mg/kg), lead (400 mg/kg) and molybdenum (370

mg/kg) respectively.

AG139 PG AND E OAKLAND Manufactured Gas Plants

ESE 50 MARKET ST BTWN 1ST AND GROVE

1/2-1 OAKLAND, CA 94607

0.702 mi.

13 ft.

3709 ft. Site 1 of 2 in cluster AG

Relative: Manufactured Gas Plants:

Equal

Actual:

The PG AND E Oakland Site is located near the Oakland Inner Harbor along Embarcadero West. The PG AND E Oakland Site is a portion of the former Oakland Manufactured Gas Plant (MGP) site. The Site includes two parcels: a portion of the former MGP at 550 Market Street; and the Station C Electric Generating Substation at 630 Embarcadero West. The MGP operated between 1905 and 1930. Wastes typically associated with MGP included tar residues, sludges, and spent oxides. The Station C property supporteed operations at the off-site historical

MGP site.

No problems noted during site inspection. Comments:

PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported

Completed Document Type: Preliminary Endangerment Assessment Report

Completed Date: 2003-06-26 00:00:00

Comments: Completed PEA. A Site Screening was prepared in 2001 under contract

> with the United States Environmental Protection Agency (U.S. EPA). The site screening consisted of a drive-by and review of available regulatory files, historical information, and ownership information. In 1989, elevated levels of lead were detected beneath paved areas of the Site. The site screening recommended further action based on the fact that elevated levels of lead and possibly other hazardous contaminants existed in the soil at the Site, and that the Site was adjacent to residences. DTSC is currently working with the Site

owner to explore remedial options for the Site.

PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported

Completed Document Type: Preliminary Endangerment Assessment Report

Completed Date: 2005-07-11 00:00:00

Comments: PEA recommends - A land use covenant (LUC or deed restriction) should

> be placed on the property, since the contamination is not at the surface (1-3 feet bgs), the area will be completely paved. There is no onsite risk to workers or the nearby residents. Lead has been detected up to 1,100 mg/kg at 1-3 feet bgs in soils beneath the asphalt at the Site. Using LeadSpread (the lead risk assessment spreadsheet) developed by the DTSC, the screening level for lead at the PRG 99th percent level is 260 ug/g. Analytical testing of soil and ground water for TPHg, TPHd, total lead, BTEX, MTBE, metals, and

VOCs on site did not identify any other contaminants above residential or drinking water standards. An Operation and

Maintenance Plan and Agreement with the property owner will ensure that the pavement is maintained and that financial assurance is in

place.

Background Info: Site has been used as a railyard for approximately 90 years.

Petroleum hydrocarbons and metals have been detected along the rail lines. An Imminent or Substantial Endangerment order was issued in June 1994 to Southern Pacific. In October 1997, the Remedial Investigation Report was approved. Investigations mainly detected high boiling petroleum hydrocarbons (JB oil, motor oil or oil and grease) in the soil (fill material). Other chemicals such as lead, volatile organic compounds, polycyclic aromatic hydrocarbons, and pesticides were detected in isolated area of the Site at low concentrations. Chemicals detected in

the groundwater included cis-1,2-dichloroethene and

trichloroethene in isolated area.

Comments Date: 03201998

Comments: Approved RAW which required that a Deed Restriction be recorded

the property.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Investigation / Feasibility Study

Completed Date: 1997-10-10 00:00:00

Comments: Approved RIFS. Investigations mainly detected high boiling petroleum

hydrocarbons (JB oil, motor oil or oil and grease) in the soil (fill material). Other chemicals such as lead, volatile organic compounds, polycyclic aromatic hydrocarbons, and pesticides were detected in isolated of the site at low concentrations. Chemicals detected in the groundwater included cis-1,2-dichloroethene and trichloroethene in isolated area. The Site was divided into three sections (Northern Elevated, at-grade and Southern Elevated) during the investigation.

EDR ID Number

Project Revenue Source Desc: The responsible parties will pay all costs associated with remedial

investigations and cleanup activities under RWQCB oversight. There are no plans

to utilize Bond funds for this site.

Southern Pacific, Oakland, is a large railyard, switching and maintenance Site Description:

> facility located between the Outer Harbor and Inner Harbor of San Francisco Bay. The site includes two surface impoundments which are separated by approximately a one-half mile distance: an oil/water separator system for waste waters from the cleaning of rail cars and an inactive waste pond for wash waters from the interiors of tank cars (referred to as polychlorinated biphenyl (PCB) sludge pond). There is soil and groundwater contamination at each of the

surface impoundment areas.

Hazardous Waste Desc: This site has been contaminated by PCBs, polynuclear aromatics (PNAs), benzene,

> toluene, xylene, ethylbenzene, waste oils, solvents such as trichloroethylene (TCE) and dichloroethylene (DCE) and heavy metals such as lead and arsenic.

Shallow ground water is contaminated by solvents.

Threat To Public Health & Env: The waste impoundment area is fenced; however, direct contact would present a

> potential health threat. This site is located within one mile of the San Francisco Bay; a drainage ditch is underneath the site. Potential for migration of contaminants to the Bay is low. Solvents are known to have migrated offsite

(at least 200 feet from the site at 3-foot depth) and to shallow ground water. There are no known domestic wells within three miles of the site.

Site Activity Status: Southern Pacific submitted a draft RAP to the RWQCB and DHS in April, 1988. The

RWQCB has determined the RAP to be unacceptable and is requiring additional

HIST Cal-Sites

Background Info: ase which wil be r

ase which wil be redeveloped by the City of Oakland with a variet y of commercial and industrial uses as part of the Gateway Develo pment Area. Also, close to 185 acres (plus roughly 56 acres of s ubmerged lands) will be developed by the Port of Oakland for mari time, rail and other port activities as part of the Port Developm ent Area. No residential uses will be allowed on the former Oakl and Army Base property under the Amended Reuse Plan. The Amended Reuse Plan, draft RAP, and draft RMP are analyzed in the former Oakland Army Base Area Redevelopment Environmental Impact Report pursuant to the California Environmental Quality Act. The Army h as been conducting site environmental investigations and selected remedial actions since 1989. DTSC is the primary agency oversee ing the investigation and cleanup of the former Oakland Army Base , and the Regional Water Qulaity Control Board, San Francisico Ba y Region regulates the removal and closure of petroleum fuel tank s. The Army's remedial activities have included removal of above ground petroleum storage tanks (ASTs) and underground petroleum s torage tanks (USTs), excavation of contaminated soil and removed petroleum hydrocarbons from monitoring wells at former tank locat ions, excavation of pesticide-containing soil from the off-site w etlands area, and replacement of many transformers and electrical equipment containing polychlorinated biphenyls (PCBs). On August 6, 2003, Governor Davis approved Early Transfer of the former Oakland Army Base to the City of Oakland. The U.S. Army r equested that the State of California approve the deferral of rem ediation of hazardous substance contamination and approve the tra nsfer of the 363.5 acre base to the Oakland Base Reuse Author- it y and the City of Oakland acting by and through the Oakland Redev elopment Agency via an Economic Development Conveyance process. The City of Oakland will begin remediation of hazardous substance s in soil and groundwater as required in the Remedial Action Play (RAP). The early transfer advances economic development for Oak land and the region by integrating redevelopment with remediation . The RAP identifies preferred alternatives at seven sites which have been fully investigated and characterized for release of haz ardous substances and for which remediation would proceed upon fi nal approval of the RAP. The Risk Management Plan (RMP), which is an appendix to the RAP, addresses all other areas of known or po tential contamination, which may not yet have been fully investig ated or characterized. The RMP specifies health protective measur es that must be follwed during and after redevelopment at these I ocations. The RMP includes protocols for conducting inspections, performing routine sampling, maintaining institutional and engine ering controls, elevating RMP location to RAP sites as appropriat e, and fulfilling reporting obligations. The former Oakland Arm v Base comprises of approximately 425 acres. Much of the base pr operty was originally tidal flats or shallow open water. During

the first half of 1900s, the area was filled to create the land s ubsequently acquired by the Army 1941. The former Oakland Army B ase served as a major Army cargo port and warehousing facility fr om 1941 until it was closed under the Base Realignment and Closur e program on September 30, 1999. Army activities supported the f ormer Oakland Army Base's primary military mission as a distribut ion center and included maintaining and fueling railroad locomoti ve engines and trucks that transported cargo, draining fluids from vehicles for overseas shipment, and repairing and servicing vehicles equipment, and base facilities. The Amended Draft final Reu se Plan for the Oakland Army Base, Dated July 23, 2001 (Amended R euse Plan), incoudes about 189 acres of the former Oakland Army B

engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 20, 99, and 100. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor?s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 20, 99, and 100 by November 2010.

Completed Area Name: Package E-2 Completed Sub Area Name: Not reported Completed Document Type: Certification

Completed Date: 2010-06-29 00:00:00

Comments:

On June 29, 2010, DTSC issued the Remedial Action Certification for the Package E-2 Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the

Package E-2 Area in accordance with the RAP and RMP.

Completed Area Name: Bldg 99 GW Completed Sub Area Name: Not reported Completed Document Type: Certification

Completed Date: 2009-06-25 00:00:00

Comments: On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Groundwater Remedial Action Plan (RAP) Site (also known

as the VOCs in Groundwater near Building 99 RAP Site). In 2005, the Port of Oakland installed five wells and monitored the groundwater for four guarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential

industrial/commercial human receptors.

Completed Area Name: Bldg 99 Soil Completed Sub Area Name: Not reported Completed Document Type: Certification

Completed Date: 2009-06-25 00:00:00 Comments:

On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: o Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), o Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), o Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and o

Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent

Comments: On February 14, 200

On February 14, 2006, DTSC approved the Remedial Design and Implementation Plan (RDIP) for the Building 1 RAP Site. The RDIP detailed cleanup procedures for contaminated soil and treatment for the Building 1 remediation waste. The City of Oakland commenced site preparatory activities on November 28, 2005, excavated soils and treated hazardous wastes on-site in 2006, and completed site restoration in early 2007. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site. The trigger date for a statutory five-year review was the mobilization date of the Building 1 remedy

implementation, November 28, 2005. Therefore, DTSC should review and

approve the first statutory five-year review report on or before November 28, 2010. As a result, DTSC shall receive the first Draft

Five-Year Review Report in May 2010.

Completed Sub Area Name: Not reported Completed Document Type: Certification

Completed Date: 2010-06-24 00:00:00

Comments: On June 24, 2010, DTSC issued the Remedial Action Certification for

the USTs 11/12/13 and 11A/12A/13A RAP Site. One June 24, 2010, DTSC approved the Completion Report and concluded that the Port of Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in

accordance with the RAP, RMP, and RDIP.

Completed Area Name: Bldg 808 and 823 Not reported Completed Sub Area Name: Completed Document Type: Certification 2009-06-18 00:00:00 Completed Date:

On October 24, 2005, DTSC approved the Pre-Design Investigation Comments: Memorandum (PDIM) for additional four quarters of groundwater monitoring to better define the plume boundary and to aid preparation of the remedial design document. Vinyl chloride is the only COC for the Buildings 808 and 823 RAP Site. The maximum detected concentration of vinyl chloride in groundwater from four recent

quarterly monitoring events was 26 |g/L, which is below the remediation goal of 32 |g/L. All other VOCs were below the respective remediation goals. On March 20, 2009, DTSC issued the oRisk Management Plan Modificationo letter specifying new language for RMP, Section 6.2 regarding vapor intrusion mitigation measures.

This RMP Modification requires additional evaluation and consultation with DTSC if new buildings were to be constructed at the Buildings 808 and 823 RAP Site and vicinity areas. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for the Buildings 808 and 823 RAP Site. The trigger date for a statutory five-year review was the mobilization date of first remedy implementation for the Oakland Gateway

Development Area project (i.e., Building 1 RAP Site on November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. As a result. DTSC shall receive the first Draft Five-Year Review Report in May

Completed Date: 2007-07-16 00:00:00

Comments: On 7/16/07, DTSC approved the Completion Report for the Building 99

Soil Remedial Action Plan (RAP) Site, and four adjacent Risk Management Plan (RMP) Locations listed below: o Potential Lead-Based Paint Impacted Soils outside of Building 99 (NAD83 Northing and Easting Coordinates: 2125825, 6039940), o Hydraulic Lift Cylinders inside Building 99 (NAD83 Northing and Easting Coordinates: 2125712, 6039884), o Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 212570, 6039966), and o

Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent

RMP Locations.

Completed Date: 2007-07-16 00:00:00

On 7/40/07 DTO

Comments: On 7/16/07, DTSC approved the oCompletion Report, VOCs in Groundwater

* Remedial Action Completion or Implementation

near Building 99 RAP Site.o In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil

data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential industrial/commercial human

S106568695

Comments: On May 12, 2009, DTSC concluded that the City of Oakland has

implemented the remedy pursuant to the Remedial Action Plan (RAP) and Remedial Design Implementation Plan (RDIP) at the Building 1 RAP Site and has demonstrated achievement of the remedial action objectives. Approximately 11,642 tons of treated Building 1 remediation waste was disposed of as non-RCRA hazardous waste at the Kettleman Hills Landfill. Approximately 578 tons of overburden soil, that was deemed unsuitable for on-site reuse, was disposed of as non-hazardous daily cover at the Altamont Facility. Approximately 10,000 gallons of wastewater, which included decontamination water and water from utility demolition was discharged to the City of Oakland sewer system in accordance with the East Bay Municipal Utility District Wastewater Discharge Permit and City of Oakland Building Inspection Sewer Permit. No excavation dewatering was conducted. Approximately 1 ton of sediment removed from the decontamination tank during cleaning was sampled and analyzed, and subsequently disposed of as non-hazardous

Completed Document Type: Correspondence
Completed Date: 2008-08-12 00:00:00

Comments: DTSC issued a letter identifying that the trigger date for a

statutory five-year review was the mobilization date of Building 1 remedy implementation (i.e., November 28, 2005). Therefore, DTSC should review and approve the first statutory five-year review report on or before November 28, 2010. The letter specifies that the first

Draft Five-Year Review Report is due in May 2010.

Completed Area Name: Basewide Completed Sub Area Name: Not reported

Completed Document Type: Land Use Restriction Monitoring Report

Completed Date: 2009-01-28 00:00:00

Comments: The City of Oakland and the Port of Oakland provided their Annual

Certification letters for the Gateway Development Area (GDA) and the Port Development Area (PDA), respectively on 1/13/09 and 1/22/09. These letters certify compliance with the environmental restrictions of the Oakland Gateway Development Area (OGDA) as required by the oCovenant to Restrict Use of Property, Environmental Restrictiono Section 4.01(e). DTSC has reviewed and concurred with the Annual

Certification letters.

Completed Document Type: Correspondence
Completed Date: 2008-12-10 00:00:00

Comments: DTSC's Environmental Chemistry Lab recommends 50 to 100 gm of samples

to be extracted (by rinsing with appropriate solvents), followed by methods 6010, 8270, 1664, 8081, 8141, 8028 etc.) for COC mentioned.

Completed Area Name: RMP Location 96
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 2011-02-09 00:00:00

Comments: On February 9, 2011, DTSC issued the Remedial Action Certification

for Risk Management Plan (RMP) Location 96. On February 2, 2011, DTSC approved the Request for Completion and concluded that the City of Oakland (a) had documented the removal of impacted-soil from RMP Location 96, (d) had presented investigation results to demonstrate the achievement of the remedial action objectives, and (c) had implemented the required institutional control remedy for the project

site including RMP Location 96.

Completed Area Name: RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123

Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 2010-07-19 00:00:00

Comments: On July 19, 2010, DTSC determined that all appropriate

removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 23, 24, 25, 87, 88, 113, 114, and 123. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor?s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 23, 24, 25, 87, 88, 113,

114, and 123 by November 2010.

Completed Area Name: RMP Locations 3, 4, 5, and 6

Completed Date: 2010-06-29 00:00:00

Comments: On March 4, 2008, DTSC determined that all appropriate

removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 20, 99, and 100. The City of Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor?s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 20, 99, and 100 by November 2010.

Completed Area Name: Package E-2
Completed Sub Area Name: Not reported
Completed Document Type: Certification

Completed Date: 2010-06-29 00:00:00

Comments: On June 29, 2010, D

On June 29, 2010, DTSC issued the Remedial Action Certification for the Package E-2 Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of remedial action objectives, and (c) had implemented the required remedies for the

Package E-2 Area in accordance with the RAP and RMP.

Completed Area Name: Bldg 99 GW
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 2009-06-25 00:00:00

Comments: On 6/25/09, DTSC completed t

On 6/25/09, DTSC completed the Remedial Action Certification for the Building 99 Groundwater Remedial Action Plan (RAP) Site (also known as the VOCs in Groundwater near Building 99 RAP Site). In 2005, the Port of Oakland installed five wells and monitored the groundwater for four quarters. Soil data from the new well locations do not show VOC concentrations above normal reporting limits. Groundwater data from the monitoring events confirm that the VOC concentrations are below the remediation goals. The cumulative excess cancer risk less than 1.0E-05 and non-cancer hazard index less than 1 for potential

industrial/commercial human receptors.

Completed Area Name: Bldg 99 Soil
Completed Sub Area Name: Not reported

S106568695

Coordinates: 2125712, 6039884), o Former Oily-Water Separator (OWS-4) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125570, 6039966), and o

Decommissioned Washrack (Facility 98) outside the Southeastern Corner of Building 99 (NAD83 Northing and Easting Coordinates: 2125642, 6039973). The Port of Oakland completed further investigation to show that the residual soils contain chemical of concerns meeting the remediation goals at the Building 99 Soil RAP Site and four adjacent

RMP Locations.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported
Completed Document Type: Certification

Completed Date: 2009-06-18 00:00:00

Comments: On February 14, 2006, DTSC approved the Remedial Design and Implementation Plan (RDIP) for the Building 1 RAP Site. The RDIP

Implementation Plan (RDIP) for the Building 1 RAP Site. The RDIP detailed cleanup procedures for contaminated soil and treatment for the Building 1 remediation waste. The City of Oakland commenced site preparatory activities on November 28, 2005, excavated soils and treated hazardous wastes on-site in 2006, and completed site restoration in early 2007. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, five-year statutory reviews are required for this site. The trigger date for a statutory five-year review was the mobilization date of the Building 1 remedy

implementation, November 28, 2005. Therefore, DTSC should review and approve the first statutory five-year review report on or before

November 28, 2010. As a result, DTSC shall receive the first Draft

Five-Year Review Report in May 2010.

Completed Area Name: RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109

Completed Sub Area Name: Not reported Completed Document Type: Certification 2010-04-05 00:00:00

Comments: On April 5, 2010, DTSC determined that all appropriate

removal/remedial actions had been completed and that all acceptable engineering practices were implemented; however, the site requires ongoing operation and maintenance and monitoring efforts. On August 8, 2003, the City of Oakland and DTSC executed and recorded the Covenant to Restrict Use of Property, Environmental Restriction for the Oakland Gateway Development Area, which includes RMP Locations 11, 75, 86, 93, 105, 106, 108, and 109. The City of

Oakland implemented the institutional control remedy by recording the Covenant with the Alameda County Assessor?s Office. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the property not suitable for unrestricted use, the first five-year statutory review is due for RMP Locations 11, 75, 86, 93, 105, 106,

108, and 109 by November 2010.

Completed Date: 2010-06-29 00:00:00

Comments: On June 29, 2010, DTSC issued the Remedial Action Certification for

the Package B Area. On June 29, 2010, DTSC approved the Completion Report and concluded that the Port (a) had adequately investigated the site, (b) had demonstrated achievement of the remedial action objectives, and (c) had implemented the required remedies for the

Package B Area in accordance with the RAP and RMP.

Completed Area Name: Basewide
Completed Sub Area Name: Not reported

Completed Document Type: Land Use Restriction - Site Inspection/Visit

Completed Date: 2010-04-20 00:00:00

Comments: On March 22, 2010 DTSC, City of Oakland, and Port of Oakland

inspected the Oakland Gateway Development Area. DTSC found site

activities consistent with the land use covenant.

Completed Area Name: USTs 11/12/13 & 11A/12A/13A

Completed Sub Area Name: Not reported Completed Document Type: Certification

Completed Date: 2010-06-24 00:00:00

Comments: On June 24, 2010, DTSC issued the Remedial Action Certification for

the USTs 11/12/13 and 11A/12A/13A RAP Site. One June 24, 2010, DTSC approved the Completion Report and concluded that the Port of Oakland (a) had investigated the site adequately, (b) had implemented the required remedial action, (c) had monitored the groundwater for four quarters, and (d) had demonstrated achievement of the remedial action

objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in

accordance with the RAP, RMP, and RDIP.

Completed Area Name: Bldg 808 and 823
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 2009-06-18 00:00:00

Comments: On October 24, 2005, DTSC approved the Pre-Design Investigation

Memorandum (PDIM) for additional four quarters of groundwater monitoring to better define the plume boundary and to aid preparation of the remedial design document. Vinyl chloride is the only COC for the Buildings 808 and 823 RAP Site. The maximum detected concentration of vinyl chloride in groundwater from four recent quarterly monitoring events was 26 |g/L, which is below the remediation goal of 32 |g/L. All other VOCs were below the respective remediation goals. On March 20, 2009, DTSC issued the

oRisk Management Plan Modificationo letter specifying new language for RMP, Section 6.2 regarding vapor intrusion mitigation measures. This RMP Modification requires additional evaluation and consultation with DTSC if new buildings were to be constructed at the Buildings 808 and 823 RAP Site and vicinity areas. The remedial action objectives were based on commercial and industrial land uses. Since residual chemicals in soil and groundwater at the site render the

Distance Elevation Site EDR ID Number

four quarters, and (d) had demonstrated achievement of the remedial action objectives at the USTs 11/12/13 and 11A/12A/13A RAP Site in accordance with the RAP, RMP, and RDIP.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported

Completed Document Type: Remedial Action Completion Report

Completed Date: 2009-05-12 00:00:00

Comments: On May 12, 2009, DTSC concluded that the City of Oakland has

implemented the remedy pursuant to the Remedial Action Plan (RAP) and Remedial Design Implementation Plan (RDIP) at the Building 1 RAP Site and has demonstrated achievement of the remedial action objectives. Approximately 11,642 tons of treated Building 1 remediation waste was disposed of as non-RCRA hazardous waste at the Kettleman Hills Landfill. Approximately 578 tons of overburden soil, that was deemed unsuitable for on-site reuse, was disposed of as non-hazardous daily cover at the Altamont Facility. Approximately 10,000 gallons of wastewater, which included decontamination water and water from utility demolition was discharged to the City of Oakland sewer system in accordance with the East Bay Municipal Utility District Wastewater Discharge Permit and City of Oakland Building Inspection Sewer Permit. No excavation dewatering was conducted. Approximately 1 ton of sediment removed from the decontamination tank during cleaning was sampled and analyzed, and subsequently disposed of as non-hazardous daily cover at the Altamont Facility.

Comments: DTSC approved the c

DTSC approved the oRemedial Design and Implementation Plan for USTs 11/12/13 and 11A/12A/13A RAP Site (RDIP) odated August 2007. The RDIP describes the remedial activities at the USTs 11/12/13 AND 11A/12A/13A RAP Site. The Remedy includes re-excavating the backfill of the former USTs 11/12/13 excavation to one to two feet below the groundwater table (approximately 30? x 37? x 8? depth), pumping out groundwater that accumulates in the excavation, collecting confirmation soil samples on the sidewalls and floor, introducing oxygen release compound to the bottom of the excavation, backfilling

excavation, and conducting quarterly groundwater monitoring at the

site for at least one year.

Completed Area Name: Bldg 1
Completed Sub Area Name: Not reported

Completed Document Type: Design/Implementation Workplan

Completed Date: 2003-11-21 00:00:00

Comments: DTSC approved the Pre-Design Investigation Memorandum on 11/21/03 for

the Building 1 Area. The memorandum describes a focused, pre-design investigation to obtain additional visual descriptions of encountered soil and waste layers, soil physical parameter data, and limited chemical data that will be useful for finalizing design decisions and

to provide information to bidding remediation contractors.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous

waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp. Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

USGS TOPOGRAPHIC MAP

Target Property Map: 37122-G3 OAKLAND WEST, CA

Most Recent Revision: 1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

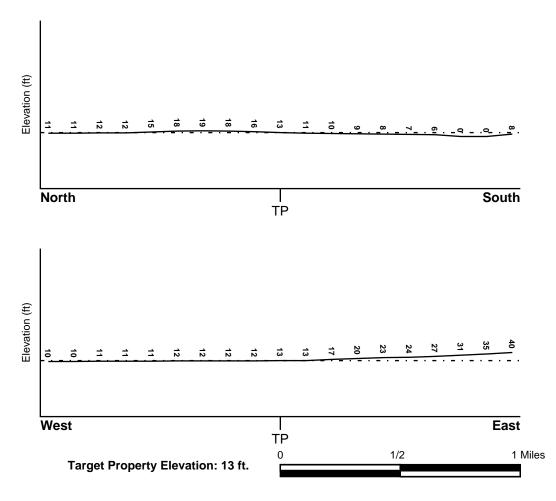

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:

Hydrologic Group: Not reported

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:

Hydrologic Group: Not reported

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map. USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- · search for parcel information and/or legal description;
- · search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.
