Danielle Bockme, Federal GSA, 415-522-3396

She is calling about analyses performed.

Wanted to cut costs of sample collection, so collected samples & had them analyzed. Had results from lab & lab says they are background

What references can she use to compare the results?

Told her she needs to have consultant perform work at site, collect samples appropriately, evaluate results, make conclusions & recc & submit report. Report needs to be uploaded to our ftp site & to Geotracker, need to upload lab EDFs to Geotracker also.

She will arrange to have results submitted to us.
