Brian,

Since this action will include some soil removal and confirmation sampling, it will have the characteristics of a Work Plan. Provided the removal of shallow soil with lead >80 mg/kg where accessible is included, I have no objection to broadening the scope and calling it a soil management plan. In order for the action to be coordinated with the City of Livermore, the schedule is extended to April 30, 2013 based upon your request.

Jerry-

As discussed during our January 9, 2013 telephone call regarding ACEH's November 26, 2012 letter, a soil management plan will be submitted in lieu of a work plan for interim removal action. The soil management plan will contain provisions for mitigating surface exposure to soils containing lead greater than 80 mg/kg (such as removing the top 1-foot of soil where accessible or covering with fabric and bark where removal is not feasible).

Due to ongoing coordination/meetings with the City of Livermore and the pending renovations to the park (in the initial stages at this point in time), CRA requests a 3 month extension on the submittal of the soil management plan. This will allow for coordination and review/approval of the City prior to submittal of the soil management plan. Upon ACEH approval, the new due date for submittal of the soil management plan will be April 30, 2013.

Please let me know if you have any questions.

Thank you,

---
