---

Mr. Plunkett,

As requested in your July 27, 2009 letter, the 383 11th Street site (RO0002947) has been claimed in the Geotracker database by the city of Oakland Redevelopment Agency. Attached is a copy of the Geotracker page showing our claim request was received by the SWRCB.

Please note for your files that this site was formerly part of the Chinatown Redevelopment Area project. The adjacent Pacific Renaissance Plaza site (RO0000037) was also part of the Chinatown Redevelopment Area project. Since the two sites were both part of the same project and the work for both sites was completed by the early 1990's, the remaining wells for both sites were recently closed as documented in the well closure report for Pacific Renaissance Plaza. The concurrent closure of the wells for both sites was recommended by Barney Chan of ACEH in 2007. The well closure report is presently available in the Geotracker database under Pacific Renaissance Plaza (Global ID# T0600101036) and will be added to Geotracker for the 383 11th Street site. Closure of the wells for Pacific Renaissance Plaza has been coordinated with Paresh Khatri at ACEH. The well closures and Geotracker reporting complete the remaining tasks for both former fuel leak sites. Please let us know when we will receive confirmation that the 383 11th Street site is closed.

Thank you,

Mark Arniola, P.G., R.E.A.
