Refinancing property, bank wants evidence that they are in USTCF to refinance property
To complete application need case number & caseworker according to Clearwater. Told him he likely needs NOR
indicating case in LOP program.

He is only refinancing the property not redeveloping it.

Told him I worked on listing his case but Clearwater did not provide context maps allowing me to identify location of UST
so address of UST location could not be identified. Have not gone back to complete case listing. Verified that reports &
info submitted by Clearwater.

Discussed property history. He has researched. PG&E owned USTs & property, last owned in 1950s. His family
purchased in 1960s. His family did not use the USTs. He closed them in place this year. 5 USTs 2 PHC & cluster of 3
were cresote. PG&E confirmed they owned PHC USTs to him & his attorney & accepted liability. PG&E deny's owning
cresote USTs. PG&E facility directly across the street from USTs (former RO50, now DTSC lead).

Requested he send me documentation that PG&E owned & operated USTs. Need that info to complete case listing &
identify them as RPs. Also give me full contact info for their contact at PG&E. He will have his attorney e-mail me the
documentation.

Told him if he sends me that information I will complete case listing on Monday & have his case worker assigned next
week. Estimate 3 NORs issued in 2 weeks.

Told him contamination detected. Additional investigation and potentially cleanup will be req'd at his site.
