Steve,

Please see the attached plan check comments for the demolition of the six building at the site and permit number above. Please do not resubmit until all comments have been addressed. Please provide five response letters indicating where these items can be found on the revised plan. If you have any questions please let me know.

Thank you

Steve,

I would like to meet with you today at the excavation site to do a field inspection of the wells and go over some details. Let me know what time works for you. Thanks.

The wells have already been identified and surrounded with orange fencing to make them visible to equipment operators, etc.

Planned soil excavation and building demolition can be accomplished without impacting the wells.

Should I submit a summary of this communication to the City of Pleasanton Building Dept, or will you respond directly?

Thanks for your prompt response.

Steve,

The Zone 7 monitoring well is actually **3S/1E-15F3** not 3S/1E-15F8. **Well 3S/1E-15F3 needs to be preserved.** All other wells on the site that are not being used should be destroyed. Destruction permits can be obtained from me.

Mr. Hong,

Please see the attached.

I've imposed the approximate property boundary on one of the well location figures. All of our site work will be within this boundary.

I've also called out what I believe to be the nearest municipal well—Pleasanton #8.

Finally, as I mentioned, this location is listed on your "Zone 7 Water Agency Toxic Sites Surveillance Annual Report" (2012) as number 149.
