Frank,

Based on my field inspection on July 25, 2013 and our records, there are 12 monitoring wells at your site at 3000 Busch Road in Pleasanton (See the attached map and well list). Well 3S/1E-15F3 was a water supply well that was converted into a monitoring well. This well is part of Zone 7's groundwater monitoring program. Please preserve this well if possible. If any other wells are found within the project limits, they should be reported to Zone 7. All other unused or "abandoned" wells must be properly destroyed under a Zone 7 permit. Well permit applications can be obtained by contacting me at (925) 454-5056 or downloaded from our web site at [www.zone7water.com](http://www.zone7water.com). There are currently no fees for Zone 7 drilling permits.

Wyman,

Good afternoon, I was wondering if you have any comments I can pass on for the proposed demolition. Please let me know, I'm waiting on yours so I can give the engineer of record all the comments at once.

Thank you

Steve,

I would like to meet with you today at the excavation site to do a field inspection of the wells and go over some details. Let me know what time works for you. Thanks.

**Subject:** RE: Hanson Aggregate Work Location

The wells have already been identified and surrounded with orange fencing to make them visible to equipment operators, etc.

Planned soil excavation and building demolition can be accomplished without impacting the wells.

Should I submit a summary of this communication to the City of Pleasanton Building Dept, or will you respond directly?

Thanks for your prompt response.

Steve,

The Zone 7 monitoring well is actually **3S/1E-15F3** not 3S/1E-15F8. **Well 3S/1E-15F3 needs to be preserved.** All other wells on the site that are not being used should be destroyed. Destruction permits can be obtained from me.

Mr. Hong,

Please see the attached.

I've imposed the approximate property boundary on one of the well location figures. All of our site work will be within this boundary.

I've also called out what I believe to be the nearest municipal well—Pleasanton #8.

Finally, as I mentioned, this location is listed on your "Zone 7 Water Agency Toxic Sites Surveillance Annual Report" (2012) as number 149.
