**Subject:** RO0002962, Port of Oakland / Downtown Oakland CNG Station, 205 Brush Street, Oakland CA,

Dear Ms. Blosser,

It is unclear to Alameda County Environmental Health (ACEH) that the work plan submitted to ACEH on January 20, 2014, for the proposed investigation entitled *Port of Oakland Phase II Environmental Site Investigation Workplan 205-209 Brush Street* (work plan), and dated January 16, 2014 prepared by your office (ERM-West) for PG&E, is the property for the ACEH Site Cleanup Program case for Port of Oakland / Downtown Oakland CNG Station located at 205 Brush Street, Oakland CA, ACEH case file number RO0002962. Work plans for site investigation for cases under ACEH oversight should have the approval of our agency prior to implementation. ACEH is in the process of determining if the work plan was prepared for the case under ACEH oversight. ACEH has not reviewed or approved the work plan and requests that you do not implement the work plan until such time as oversight jurisdiction determination has been made.

Regards,  
Keith Nowell
