**Subject:** RE: ACEH Correspondence for RO2969

Mr. Dettloff,

Alameda County Environmental Health would like to see the results of one more groundwater monitoring event. The most recent event, performed on 5/10/2012, countered the decreasing trend of gasoline range petroleum hydrocarbons observed for well MW-7. Should the next event show the May 2012 result as not indicative to the overall trend, sampling can be discontinued.

Regards,  
Keith Nowell

**Importance:** High

Mr. Nowell:

I sent to you the email below last Friday and as of today I've yet to receive any reply to my request. I am requesting that groundwater monitoring and sampling be terminated as the ACEH has already agreed to close this site. Antea Group believes that our time and efforts would be better served working on other sites that have significant soil and groundwater impact issues. In addition, the termination of groundwater monitoring and sampling at this site would save our client money. Please get back to me at your earliest convenience concerning my request.

Regards,

**Dennis S. Dettloff, P.G. | Project Manager**

Mr. Nowell:

Would it be acceptable to you for Antea Group to terminate the quarterly groundwater monitoring and sampling activities at this site, due to the pending site closure? Let me know.

Regards,

Mr. Dettloff,

My case closure summary is in its final review period. You will be contacted when it is approved.

Regards,  
Keith Nowell

Mr. Nowell:

Could you please let me know what the status is of this site and the path to closure? To my knowledge and according to the letter that was attached to the email below, the ACHCSA indicated that you were prepared to proceed with the case closure and begin the public participation process. That was more than two months ago and as far as I can tell, nothing has been done to move this case to closure. Please get back to me at your earliest convenience with the site status and the path forward.

Regards,
