Returned Bill Mitchell's call about Ambassador Laundry. He is the consultant for a developer that is considering purchasing the property to put residential units on the site. He was looking for the reports for the site that were not available on Geotracker. I informed him about our website and how we should have everything available, including the June report. He also wanted to know the status of the site and if cleanup was going to be necessary. I told him that Mark is the new caseworker and would review the site. He also informed me that the site is a brownfields site.
