SUBJECT Notification of Scheduled Environmental Activities
Former Exxon Service Station 79374
990 San Pablo Avenue, Albany, California

Mr. Langbin:

At the request of ExxonMobil Environmental Services (EMES), on behalf of Exxon Mobil Corporation, Cardno ERI is notifying you of upcoming on-site activities scheduled for the week of January 30, 2012. Cardno ERI will be conducting an air sparge/soil vapor extraction feasibility test on the newly installed wells (SVE1 through SVE3, and AS1). This work is expected to take approximately two to three days to complete and will require a truck, remediation trailer, and holding tank to be on site. The locations of the proposed wells are shown on the attached Generalized Site Plan.

Waste generated during field activities will be removed following the feasibility test and transported to an EMES-approved disposal facility.

Cardno ERI will make every attempt to minimize disruptions to business operations. Cardno ERI will employ various pedestrian and vehicular traffic control measures (i.e., cones, delineators, and caution tape) to limit access to the work zones as necessary. These traffic control measures are designed to ensure the safety of our personnel, station personnel, and the general public.

Thank you for your cooperation. Please contact Ms. Paula Sime, Cardno ERI's project manager for this site, at paula.sime@cardno.com or at (707) 766-2000 with questions regarding the scheduled work.

Sincerely,

SCANNED
