SUBJECT Notification of Scheduled Environmental Activities
Former Exxon Service Station 79374
990 San Pablo Avenue, Albany, California

Mr. Langbin:

At the request of ExxonMobil Environmental Services (EMES), on behalf of Exxon Mobil Corporation, Cardno ERI is notifying you of upcoming on-site and off-site activities scheduled to begin Tuesday, February 25, 2014. Cardno ERI will be installing three soil vapor sampling wells (SVS1 through SVS3) and drilling 11 soil borings (B5 through B15) for the collection of soil and groundwater samples. This work is expected to take approximately four days to complete and will require approximately two trucks and a direct-push rig on site. The locations of the proposed wells and soil borings are shown on the attached Generalized Site Plan.

Waste generated during field activities will be stored on site in 55-gallon drums. Following characterization, the drums will be removed and transported to an EMES-approved disposal facility.

Cardno ERI will make every attempt to minimize disruptions to business operations. Cardno ERI will employ various pedestrian and vehicular traffic control measures (i.e., cones, delineators, and caution tape) to limit access to the work zones as necessary. These traffic control measures are designed to ensure the safety of our personnel, station personnel, and the general public.

Thank you for your cooperation. Please contact Ms. Rebekah A. Westrup, Cardno ERI's project manager for this site, at rebekah.westrup@cardno.com or at (707) 766-2000 with questions regarding the scheduled work.

Sincerely,
