Subject: Fuel Leak Case No. RO0002977 and Geotracker Global ID SLT19749067, FCI DUBLIN 5701 8TH ST,
DUBLIN CA 94568– Groundwater Monitoring Requirements

Dear Responsible Party:

The purpose of this correspondence is to inform you of changes to groundwater monitoring requirements for all fuel leak cases in California. The California State Water Resources Control Board (State Water Board) has approved Resolution No. 2009-0042 (*Actions to Improve Administration of the UST Cleanup Fund and UST Cleanup Program*). Resolution No. 2009-0042 states that, "Regional Water Board and LOP agencies shall reduce quarterly groundwater monitoring requirements to semiannual or less frequent monitoring at all sites unless site-specific needs warrant otherwise and shall notify all responsible parties of the new requirements no later than August 1, 2009. If more than semiannual monitoring is required for a case, the responsible party and State Water board shall be notified of the rationale and the notice shall be posted on Geotracker."

Upon review of your site, we find the following site-specific conditions that warrant continuation of quarterly groundwater monitoring:

- Proposal to install groundwater monitoring wells to evaluate water quality conditions beneath the site, and wells being sampled within first year of being installed.

If you believe that quarterly groundwater monitoring for your site is not warranted, you may submit a proposal for a revised sampling and analysis schedule along with your technical rationale supporting the proposal.

If you have any questions, please call me at (510) 383-1767 or send me an electronic mail message at steven.plunkett@acgov.org.

Sincerely,

Steven Plunkett
Hazardous Materials Specialist
