Subject: ACEH case file RO2981 and GeoTracker Global ID T10000000416, Red Hanger Kleeners, 6235-6239 College Ave., Oakland

I received clarification regarding the interim cleanup proposed for the site. The SVE implementation is considered an interim mitigation measure, not a corrective action. Therefore, a 30-day public comment period does not apply. However, a fact sheet (FS) will be distributed addressing this activity. The FS will need to identify the fact the contaminant plume is not defined and appears to have traveled off site in the down gradient direction.

A figure showing the extraction well locations may be included in addition to an arrow depicting the groundwater flow direction. As previously indicated, ACEH will provide the distribution list for the FS.

Regards,
Keith Nowell
