

1/28/2016 **Phone Log-** RO2981 Red Hanger Kleaners Voicemail duration: <5 minutes

Returned to office and reviewed voice mail from Paul King. Paul indicated the soil gas analytical data was in and, based on his review, he would like a hold of the sub slab depressurization work plan and perform another round of soil gas sampling. Paul's review of the recent data leads him to believe a soil vapor extraction system may be more appropriate.

I returned the call and left a message.
