

5/24/2016 Phone Log- RO2981 Red Hanger Kleaners, 6235-6239 College Ave., Oakland

Duration: Approximately 5 minutes

Following leaving a voice mail message with Mr. Mike Patten, I called Paul King to learn the status of site activities. Mr. King said trenching had been completed yesterday and a crew was out laying pipe today. He also mentioned he had a crew out sampling drums. I asked if there was a PID on site today. Mr. King did not know but would find out. I also asked if there were any soil disturbance activities that would in the near future. He said no.

When discussing yesterday's activities, Mr. King said they kept the door to the suite closed as they were operating an electric saw. I mentioned the jack hammering of the thicker portion of the slab- it increased in thickness from 6 to 9 inches and was too thick for the saw to cut through- Mr. King made no mention to the status of the doors during the jack hammer operation.
