

7/11/2016 Phone Log- RO2981 Red Hanger Kleaners, 6235-6239 College Ave., Oakland

Duration: Approximately 15 minutes

Received a phone call from P&D Environmental regarding case status. Mr. King indicated the property owner has retained counsel and that counsel has retained his own expert to review work at the site. The report documenting the implementation of the SVE startup is out for review. The expert is Merhdad Javaherian of LRM.

Mr. King said the SVE system has been operational since the afternoon of June 10th and that he reported good vacuum near the apartment complex on 63rd.

Mr. King outlined an indoor air sampling event for an evaluation of the effect of SVE implementation on the air quality on the three floors of the building. I requested submittal of a brief work plan for my review.
