

12/13/2016 Phone Log- RO2981 Red Hanger Kleaners, 6235-6239 College Ave., Oakland

Duration: Approximately 10 minutes

Received a phone call from Jonathon Redding regarding possible conference call today. I checked the calendar and noted that Dilan had not responded to call e-vite, though she had just returned to the office after being out ill for several days. Mr. Redding wished to discuss a path forward. I asked him to send out an email requesting a conference call- making sure to include Dilan on the request. I reviewed my calendar with Mr. Redding, indicating I would be out for the Christmas holidays.

I verified I had sent out a meeting e-vite for January 5th, 2017. Following our phone conversation I checked the responses to my e-vite and noted Mr. Redding was the only respondent.

As we discussed the case, Mr. Redding indicated he has a 3 page proposal for additional work. I told him he should send it to me send for review and comment. Mr. Redding said the vapor extraction system is depressurizing the subslab, a good thing, but the system is sucking water, trips out, and it is not removing contaminant mass.
