Memo to file

3-26-91

Gene Painter of Urich, Inc. called today. He indicated that work has proceeded according to the June 9, 1990 workplan. Thin film chromatography (TFC) screening of the amended and treated soil, performed in-house, has suggested that the soil is ready for confirmation sampling following CA-accepted methodology. I FAXed a copy of the Jan. 1990 RWQCB document regarding sampling of soils associated w/ UST cleanups to Mr. Painter.

7-9-92

Ron Sadler (Watson Communications) called today requesting authorization to backfill biotreated soil. He said soil was "ND", and that sampling followed RWQCB protocol. I gave a verbal "OK" for backfilling. However, when viewing the report, the results were not ND, but rather up to 71 ppm TPH-D. A letter will be written addressing this point.

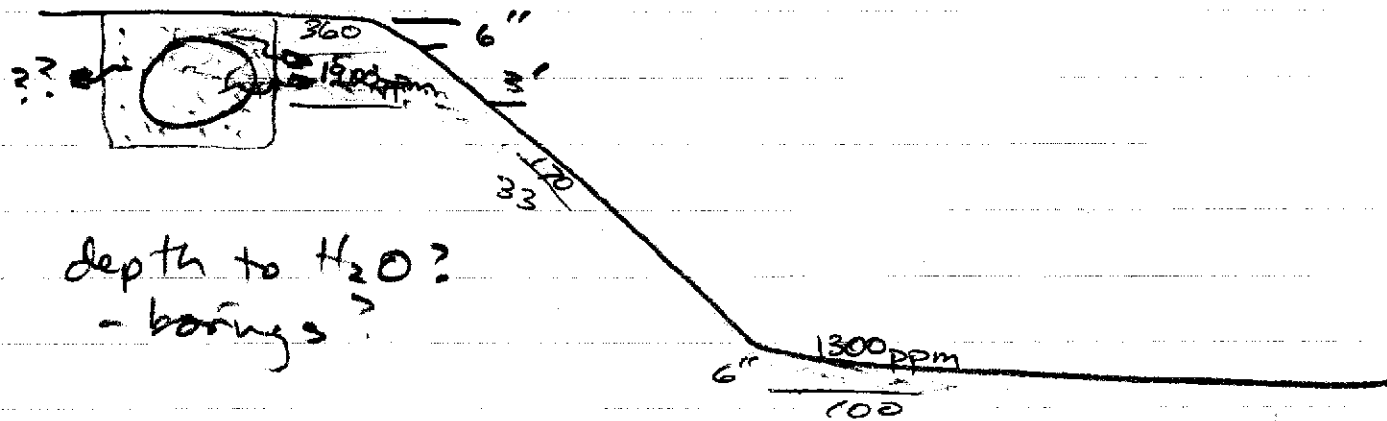

SOS

- when will UST be removed?

Are borings possible?

Discrete samples needed in future work

likely "soaked" through sidewall of excavation causing high HC conc. @ 3' depth in sample #4

depth to H<sub>2</sub>O?  
- borings?

additional excavation <sup>removal</sup> may occur near UST pit during tank removal; need strict schedule

- maybe the other impacted soils (slope, lower plateau) can be disked or rototilled in place to promote bio degradation along w/ augmentation w/ inoculum

12-6-90

Called and left message for new proj. mgr. to give me a call.

TC1

3700 Palomares Rd.

MEMO to file

5-30-90

Ms. Vivian Corbin is reportedly in partnership with Jay Watson in ownership of Watson Communications, Inc.

505

I spoke w/ Helen Mawhinney of Uriah today re: the review of The June 9, 1990 workplan. I advised her that Sunol Comm. Center still owes the Department \$\$ for oversight of the project, now to cost \$ 375. (instead of the original \$ 333)

MEMO TO FILE

5-18-90

I called & left a message for Ron Sadler today

SOS

Ron called back later today. He indicated that the Business Plan will be forthcoming next week (May 20).

SOS

5-22-90

Ron Sadler of TCL and I spoke today. He indicated that TCL owns Watson Communications Systems, Inc., who in turn owns Sunol Development Company. (!!) Sunol Development Co. owns the UST at this site. MCI leases another portion of this site from Sunol Development Co. MCI, in turn, owns yet another UST on their portion of the site, for which there is a separate record.

SOS

MEMO to file:

April 19, 1990

I spoke with Ron Sadler today regarding the Feb. 2, 1990 letter from this office which requested the following items:

- 1) UST registration forms;
- 2) Business Plan; and,
- 3) Site Remediation proposal.

He indicated that he will be meeting reps from Uriah Environmental at the site today to discuss the scope of work.

I requested a letter discussing the status of this element of the 2 Feb 90 letter, including a schedule for submittal of such a proposal. He said he would have the letter sent by late this week.

Further, I requested he submit UST registration forms & Business Plan ASAP.

I advised him of penalties imposed by the H&SC and Title 23 CCR for failure to submit the requested info.
