Re: 1424 Harrison Street, Oakland, CA 94612
Fuel Leak Case No. RO0002992 and GeoTracker Global ID T10000000619

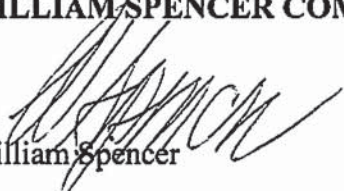

Dear Mr. Wickham:

We would like to request an extension to comply with your request for submitting a work plan regarding the two closed-in-place tanks at 1424 Harrison Street, Oakland. After speaking with you on the phone, our consultant, Rebecca Sterbentz of Aquifer Sciences, has suggested to us that it would be beneficial to compile all the existing soil and groundwater data onto schematic diagrams or cross sections before attempting to drill and collect additional samples in the field.

The existing data reports were authored by different consultants at different times. The maps and scales do not match, and it will take time to properly reconcile the boring locations, sampling depths, and data. Please grant us a six-month extension of time to November 30, 2009.

Sincerely,

WILLIAM SPENCER COMPANY

William Spencer
