Donna

My client has had a contingency placed on his loan. He bought a dry cleaners, the Phase II had 4 SBs, and one sample came back with a little PCE. The consultant said that they had to open a file with the County, and the Bank said that until the file is closed they are not going to give up the money. So we need to open a file, and see if it can be closed right away – if you agree that there is not a significant problem.

Could you please tell me how I can start this process. I have the Phase II on my computer.
