Hi Jerry

I wanted to touch base with you on this project. We are currently planning to perform the approved scope of work this month, which includes borings inside the building, vapor point monitoring, monitoring well sampling, and geophysical survey to rule out unknown tanks. I realize that the report for this work is due November 7, 2013. On behalf of Terradev Jefferson LLC, I respectfully request that the due date be extended to January 7, 2014, as this will allow us time to receive the data and prepare the report.

Please feel free to contact me with any questions.

Thanks – Brian
