**Start:** Wed 7/18/2012 5:13 PM  
**End:** Wed 7/18/2012 5:13 PM  
**Duration:** 0 hours

Phone call with Michelle Heckle of Children's Hospital (510-xxx-xxxx or 510-xxx-xxxx cell). Staff from the 645 4<sup>th</sup> Avenue site have complained of headaches, nausea, etc. since the HVDP unit was started. The complaints have come from employees in only one section of the building. No one has reported an odor. I provided background on the investigation and remediation activities at the site. I also described the operation of the HVDPE unit and indicated that system was scheduled to operate until Tuesday am . Children's Hospital is advising employees to contact their in-house medical facility if they have symptoms or to call 911 if they have more severe symptoms. They are considering other possible options such as indoor air sampling to investigate complaints. Children's Hospital will continue their efforts to evaluate the employees complaints. If new information comes up, we agreed to alert each other of the new information. Shut down of the HVDPE system will be considered if situation changes or new information becomes available.
