Hello Herma,

The UST closure report that was attached to your e-mail has been previously submitted. The site has been opened as a "Leaking Underground Storage Tank case" (RO0003005) as a result of the report submittal and initial supervisory review. Therefore, the site must be "claimed" in GeoTracker and the UST closure report must be uploaded, per GeoTracker regulations, as stated in the Notice to Comply.

At this time, the case review has not been completed. Therefore, the need for additional site characterization work, if any, is unknown.

Please contact me should you have any questions or concerns regarding this case

Sincerely,

Paresh C. Khatri

Hi Paresh,

I have all my paperwork together and have read through the letter again. The site did not and does not have monitoring wells. Before I upload information can you let me know if it is necessary? As noted we removed very old tanks (most likely from the 1930's) and did not find contamination moving through the soil. I have attached the executive summary from the closure report for your review...

Can you let me know, Thanks Herma
