Subject: Response to Request For Information and a Work Plan
City of Alameda Maintenance Services– Fuel Leak Case No. RO0003011 and
Geo Tracker Global ID T010000001614
1616 Fortmann Way
Alameda, California

Dear Ms. Detterman:

On behalf of the City of Alameda Public Works Department (the City), AMEC Environment & Infrastructure, Inc. (AMEC) has prepared this letter to respond to the Alameda County Environmental Health Department (the County's) Request For Information and a Work Plan for the City of Alameda Maintenance Services facility located at 1616 Fortmann Way, Alameda, California (the Site). This request was detailed in the County's letter to the City dated October 12, 2012.

BACKGROUND

On March 5, 2009, the City experienced an overflow of an onsite diesel tank. At the time of the incident (approximately 9:15 AM), it was estimated that approximately 200 gallons of diesel spilled to the asphalt and cement surface. The City subsequently contacted NRC Environmental Services (NRC) to respond to the incident. As detailed in the attached NRC Spill Report, NRC arrived onsite with a vacuum truck and support staff to clean up the spill by approximately 10:30 AM. Under the direction of the City, NRC staff decontaminated the building roof, gutters, and sides (the overflow pipe emanated from the Maintenance Building Roof) and cleaned out sumps, street sidewalks, gutters, and the City's fueling station and equipment parking lot. Upon completion of the cleanup, 16 55-gallon drums of oily debris were generated and approximately 1,000 gallons of diesel fuel mixed with oily water was vacuumed and subsequently transported to a licensed disposal facility.

Based on inspections completed by NRC during the cleanup, no diesel made it to the storm drains and based on the volume of fluids collected during the cleanup process, it was determined that all the released diesel fuel was captured.

Response to Request For Information and a Work Plan

The County's letter requested the Site be claimed in Geotracker, that information/additional documents regarding the release be submitted and also requested submittal of a Site Conceptual Model (SCM) and Data Gap Work Plan. The City claimed the Site on Geotracker on November 2, 2012 (Geo Tracker Global ID T010000001614) and information regarding the details of the release and subsequent cleanup as well as the cleanup documentation are attached to this letter.

Since the release occurred in 2009, there have been no investigations conducted at the Site to assess the impact of the diesel spill in the soil below the asphalt and cement surface. The City and AMEC propose to submit a work plan, including the SCM, to investigate the shallow soil in the release area. We are requesting a 45 day extension to submit work plan on January 25, 2013.

We appreciate the County's consideration of this request look forward to working with you on closing out this Site. If you have any questions or need additional information, please call Mr. Lieberman at (707) 793-3858 or Jesse Barajas at the City (510) 747-7924.

Sincerely yours,
AMEC Environment & Infrastructure, Inc.

Emergency Response
1-800-33-SPILL (77455)

SPILL REPORT:

Date 03/05/09

Customer: City of Alameda P.O. # F56309

Customer Rep: Todd Williams Facility Supervisor - phone # 510 -747-7900

Site Name: City of Public Work Maintenance yard - EPA ID # CAL000082284

Site Location: City of Alameda Public Works Maintenance Yard 1616 Fortman Way

Site Contact Person: Todd Williams Facility Supervisor Matthew Tunney Fire Chief

Release Material: Diesel (red) from over filled fuel storage tank by Valley Oil Company

09:22 Receive a call from Matthew Tunney Alameda Fire Department

09:27 Receive a call from Bob Buck with Valley Oil Company stating that his driver had over fill a diesel fuel storage tank and that there was a possibility that 200 gallon of diesel had spill on the ground, I then ask Bob if he had a emergency response contract with NRCES he stated he did not think so. I then fax him an emergency response service contract. Fax # 650-967-2288 phone # 650-967-2253

09:45 Tyron Carter arrive at Alameda Public Works Maintenance Yard met with Todd Williams and Matthew Tunney I was then brief on what had happen.

09:55 Walk through of the area where the diesel had spill

10:00 I receive call from Ryan Ward NRCES dispatcher, saying that the driver would be onsite by 10:30 and the rest of the crew by 1300 (no other personal available at this time)

10:25 Ray Campbell NRCES driver arrive on site with 120bbl vacuum truck.

10:35 Tyron Carter and Ray Campbell were requested by fire chief and Todd William to start the clean process at the south side of the maintenance facility to avoid the diesel from going down the storm drain.

12:00 Yuri Trebotich NRCES Health and Safety Manager, began taking air samples and pictures of the area.

13:30 The rest of the crew arrive onsite at that time Yuri conduct a tailgate safety meeting

13:45 Started the decontamination and cleaning process of the roof, gutters and the sides of the building, clean out all sumps, drum all solid waste and debris, than pressure wash sumps, streets side walks, city trucks and equipment fueling station and the facility equipment parking area.

22:30 Once the final cleaning was completed a walk through of the area was performed with Tyron Carter of NRCES and Todd William of the City Alameda to ensure the area was clean to their specifications.

23:15 Crew return to NRC Alameda Home Base, Waste Material was off- loaded into a transport trailer. For delivery to the designated TDSF, equipment secured, material replenished.

24:00 Operation Completed

Waste Disposal

Generator certifies that it has established a program to reduce the volume or quantity & toxicity of the hazardous waste to the degree determined by generator to be economically practicable.

I hereby certify that I have read and have the authority to bind the above listed generator to the terms on the reverse side of this form.

Retain sample # _____

IMPORTANT NOTICE REGARDING THE DISPOSITION OF YOUR OIL.

Per California Health and Safety Code Section 25250.9, Evergreen hereby advises customer that customer's shipment of used oil may be transported to a facility that is required to comply with federal regulations applicable to management of used oil, but that is not required to comply with the more stringent requirements applicable to hazardous waste management facilities. California facilities that handle or process used oil are required to meet those more stringent requirements, and some out-of-state facilities that process used oil also meet those requirements. These include more stringent leak detection and prevention requirements, engineering certifications of tank integrity, and financial assurances for closure and accidental releases. It is lawful to send used oil to out-of-state facilities that comply only with federal used oil management standards and not these more stringent requirements. This notification is for information purposes only.

Certificate of Recycling

Dear Valued Customer:

Evergreen certifies that the **used oil, used antifreeze, oily water, and used oil filters** collected from your facility were fully recycled in accordance with all applicable state and federal regulations.

Evergreen Environmental Services also provides emergency spill response: vacuum cleaning of tanks, clarifiers, and sumps; transportation of hazardous waste, steam cleaning, management of oily solids, and treatment of non-hazardous wastewater.

For more information regarding the services Evergreen provides, please call:

1-800-972-5284

We appreciate your business!

This certificate also serves as notification, as required by Title 22, Section 66264.12, that Evergreen Oil, Inc. has the appropriate permits for, and will accept the wastes manifested to Evergreen facilities.
