Yes go ahead. I'll place this in the file for future reference.

Regards,
Barb Jakub

Okay I will relocate borings SV-1 and B-4 as you requested. That being said, can we proceed with the sampling activities?

I'd like to see the one soil vapor sample (SV-1) a little closer to the area excavated and between the two dry cleaning machines and sample B-4 closer to the sewer line (within the sewer backfill if possible- without hitting the sewer, of course). I'll be looking forward to the final report.

Regards,

Barb Jakub

Barbara:

Wanted to check in with you to see if our addendum to our Work Plan was approved and if we can proceed with the soil sampling along the sewer line and the collection of the soil vapor samples within the Site.

To date, the soil removal activities to remove the PCE-impacted soil identified from a previous site

investigation have been successfully completed. Confirmation soil samples collected from the excavation indicated that the residual PCE concentrations detected in the soil samples are below the remedial goal approved in the Work Plan.

Barbara:

This email is to notify you that we are planning to begin the soil removal activities this Friday, January 13.
