

Meeting Notes RO3013

July 14, 2011

Introductions, (See attendees list)

Mention about RWQCB process for disputes since Mark Johnson of the Board was there. The consultants said this was not a dispute but that Mark was just there for help.

Management not aware of Mark's involvement

Technical issues:

Boring was performed at a thirty degree angle to horizontal and the log was corrected for depth along the way.

Derek and Peng say that soil vapor is not required to collect vapor samples after source removal. We need a reference for this. Our stance is that soil vapor should be collected even if soil is low since there is no ESL for soil to vapor, the laest requirement is to actually sample soil vapor.

Mention that water samples along the sewer lines needed since perc water is often dumped down the drain.

They will submit a work plan for remediation and ask that we turn it around quickly.

Donna mentions that we have a 60 day turnaround time but that we will try to turn it around sooner.

Health Care Services

Alameda County Environmental Health Meeting Sign-In Sheet

RO0003013, 4364 Piedmont Ave., Oakland Meeting

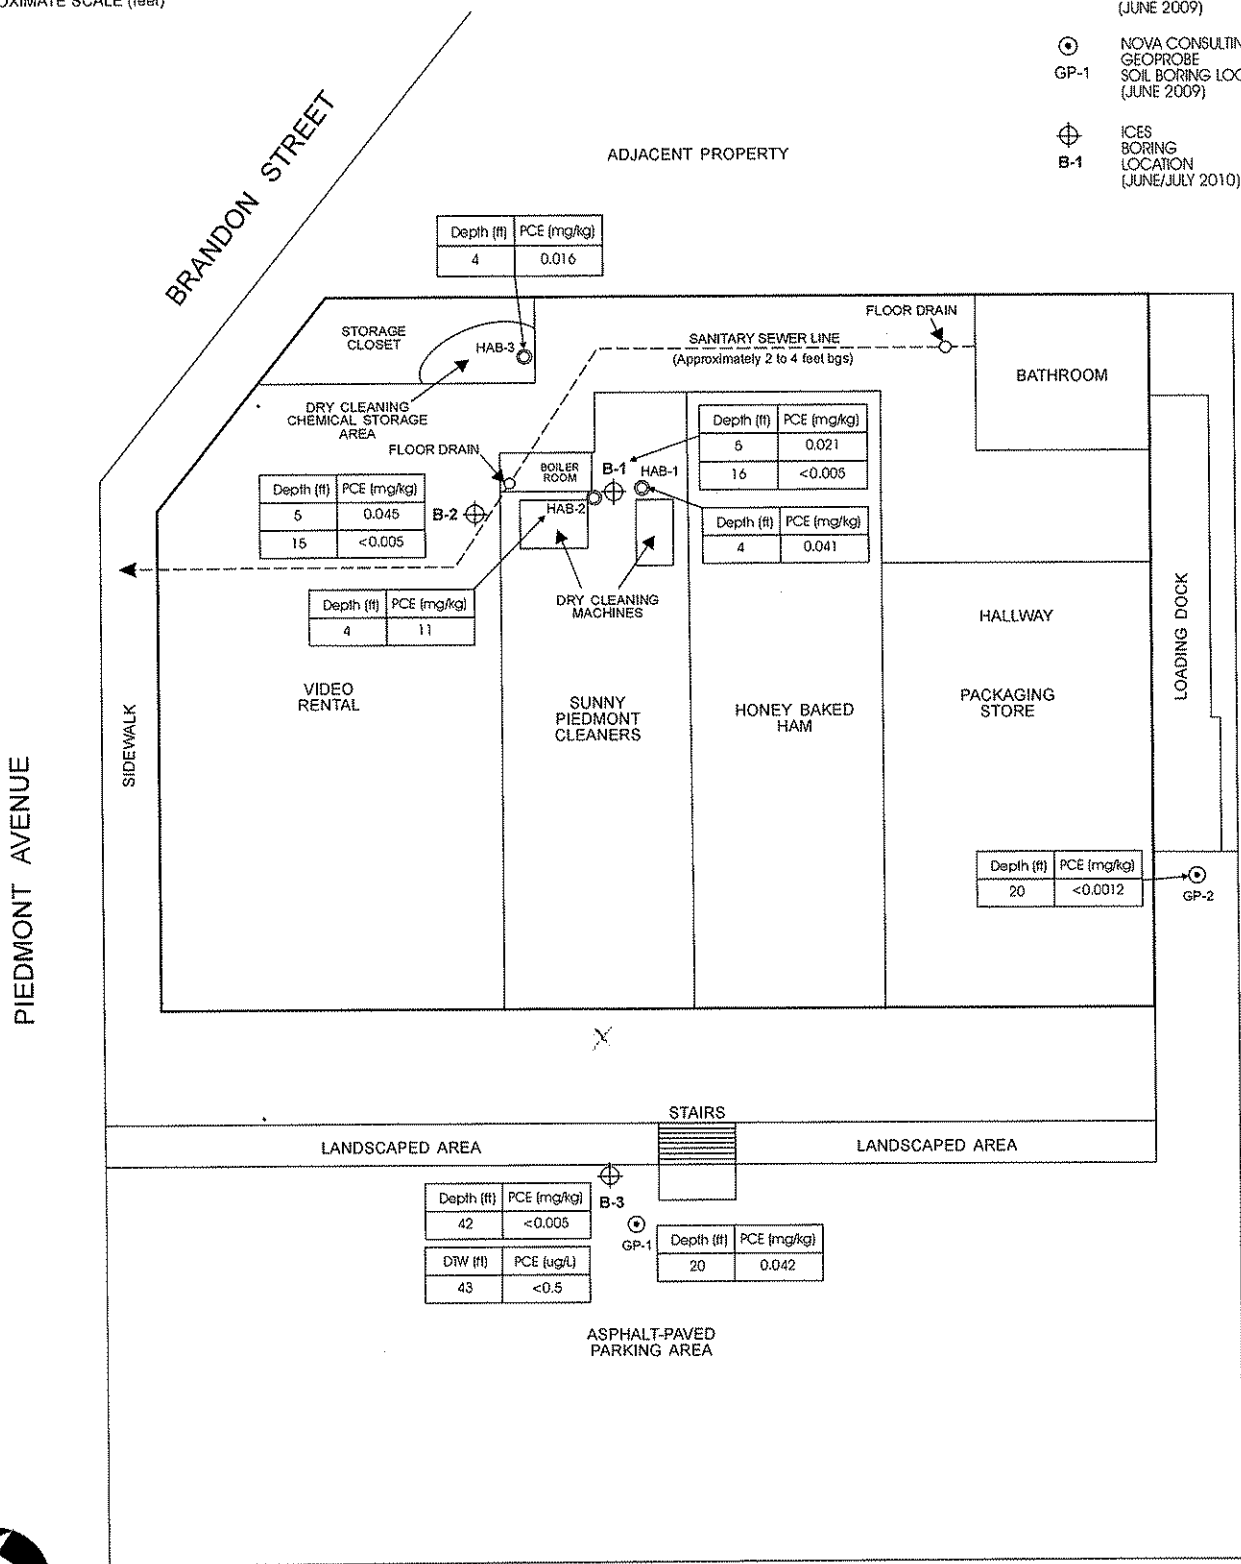

Thursday July 14, 2011
1:30 PM
