Subject: Sunny Piedmont Cleaners - Supplementary Soil Vapor Sampling

Barb:

Just wanted to keep you updated. The first of two rounds of soil vapor sampling was completed on November 1, 2012. Soil vapor samples indicated VOC concentrations below their respective commercial/industrial ESLs. The second round of soil vapor sampling is scheduled for January 2013. Our report documenting the supplementary soil vapor sampling will be prepared and uploaded onto the ftp browser and geotracker following the completion of the January 2013 sampling activities.
