Subject: City of Piedmont; 120 Vista; Case RO3047; Sewer Connection Analytical

Mark,
I picked up you voice mail a bit ago. Thanks for the update.

Rather than just send the analytical data, please also provide a letter to document the status of the work, including progress in obtaining the EBMUD permit, the analytical results, and expected time to completion of the task (obtaining the discharge permit). I presume it will still be required, as contaminant concentrations may reappear, and the sewer connection is permanent, but if you want to discuss that, let me know.
