Client Ref. No. NONE
Clayton Project No. 90112.41

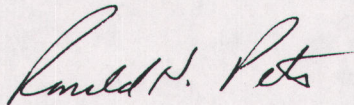

Dear Ms. Rike:

Attached is our analytical laboratory report for the samples received on November 28, 1990. A copy of the Chain-of-Custody form acknowledging receipt of these samples is attached.

Please note that any unused portion of the samples will be disposed of 30 days after the date of this report, unless you have requested otherwise.

We appreciate the opportunity to be of assistance to you. If you have any questions, please contact Maryann Gambino, Client Services Supervisor, at (415) 426-2657.

Sincerely,

Ronald H. Peters, CIH

Re: Soil contaminated with diesel

Dear Mr. Sherman:

Enclosed please find a questionnaire from the disposal facility. They are requiring further analysis of your sample before they will accept the soil. This facility is the least expensive disposal alternative.

I have highlighted the tests necessitated by this request. Clayton has retained your sample, and should be able to perform these tests. I suggest that you get an estimate from Clayton prior to authorizing the analysis. If you call me with this estimate, I can advise you as to the feasibility of the additional expense. If it is not feasible we will redirect the soil to another facility.

If you would like me to intercede on your behalf with Clayton. I will need your written authorization to do so.

Sincerely yours,

A handwritten signature in cursive script that reads 'Bruce A. Hopkins'.

Bruce A. Hopkins
Director of Technical Services

-2-

The Following will serve as the minimum test requirements for acceptance for the Reed & Graham process:

Please enclose the following test results for review. All test results must be current and from an E.P.A. and D.H.S. approved test laboratory. All test results must be submitted on laboratory letterhead stationary.

1. T.C.L.P. Test

Minimum of eight (8) metals (*PRIORITY*)

NOTE: The generator is responsible and is the sole party liable for choosing the proper T.C.L.P. test to be performed. The generator under penalty of law hereby warrants that either he or his representatives have personally examined the generated waste proposed to be processed, and based on this knowledge have chosen the proper T.C.L.P. test. The generator is aware that there are significantly penalties for submitting false information including the possibility of a fine and imprisonment.

(Initial) _____

* 2. T.P.N. Total Hydrocarbon

E.P.A. #8015

Type of hydrocarbon (gas, diesel, jet fuel, lube oil, other)

If other please specify: _____

3. B.T.X. (If generator has knowledge)

E.P.A. #8020 _____

4. P.C.B. less than 5 PPM

E.P.A. #8080 _____

5. Volatile Organics

E.P.A. #8240 _____

6. Corrosivity

P.H. Less than 2 or greater than 12.5 not accepted

P.H.: _____

* THIS ANALYSIS WAS ALREADY PERFORMED BY CLAYTON

.../3

7. Toxicity

The characteristic of toxicity as defined in California Administrative Code Title 22, 66696. The sample has been subjected to an approved fish assay.

A. Enclose test results Passed _____ Failed _____

8. Reactivity

If the sample exhibits the characteristics of reactivity as defined in 40 CFR CH. I (7-1-89 Edition) 261.23

A. The sample normally unstable and readily undergoes violent change without detonating?

Yes _____ No _____

B. The sample reacts violently with water?

Yes _____ No _____

C. The sample forms potentially explosive mixture with water?

Yes _____ No _____

D. The sample when mixed with water, generates toxic gases, vapors or fumes in a quantity sufficient to present a danger to human health or the environment?

Yes _____ No _____

E. The sample is cyanide or sulfide bearing waste which, when exposed to pH conditions between 2 and 12.5, can generate toxic gases, vapors or fumes in a quantity sufficient to present a danger to human health or the environment? A sample has been analyzed for sulfide by gaseous transfer.

Yes _____ No _____

F. The sample is capable of detonation or explosive reaction if it is subjected to a strong initiating source or if heated under confinement?

Yes _____ No _____

G. The sample is a forbidden explosive as defined in 49 CFR 173.53.

Yes _____ No _____

If the answer to any of the above (A-G) is yes, then the sample will not be accepted.
