Duration: 0 hours

Phone call with Forrest Cook of Almar Environmental (831-420-7923) who was drilling four soil borings at the site as per the July 2012 work plan; he requested clarification RE discrepancy between WP and my 9/2012 Directive Letter RE analyzing soil & GW samples for Waste Oil (WO) & TPH Diesel; he said the 4 soil borings lacked obvious signs of contamination; GW was encountered at approximately 4 feet bgs; I suggested choosing one GW and one soil sample from each boring for analyses for both WO & TPH Diesel.
