Hello Athan and Mansour:

Below is the only public comment I received during the public comment period which ended May 13, 2014. I did not receive a response from Evan and the site wells were decommissioned on May 27, 2014, so we are proceeding with case closure.

Thank you,

Karel Detterman, PG

Hello Evan:

I understand that you have now been able to access the numerous technical reports available to the public on Alameda County's ftp site and that your main concern with closing this case is that there is insufficient remediation of groundwater contamination. To address this concern, please review Table 1, *Groundwater Analytical Results*, in the document called "GWM_R_2014-03-25", the *First Quarter 2014 Groundwater Monitoring Report*. This report is the most recent groundwater monitoring report and the table contains all historic site groundwater analytical data. The three site groundwater monitoring wells have been consistently sampled for water quality for seven quarters. This data indicates that remedial efforts at the site were successful, the site meets the State Water Resources Control Boards (SWRCBs) Low Threat Closure Policy (LTCP), and the case should be closed.

Please contact me with any questions.

Thank you,

Karel Detterman, PG

Yes, because I was looking at the page when I wrote to you. Look at the first sentence of the top paragraph and you will see the underlined phrase on "For the Public" – click on that hyperlink then follow the rest of my directions.

Thank you, but I could not find a link labeled "For the Public" on that page. Are we looking at the same thing?

Hello Evan and Caitlin:

Please click on the link at the bottom of my e-mail address, then on the right side of the new page, click on "For the Public" then within the first sentence click on "Find a Site". A map of Alameda County will come up with a window on the right side that says "LOP Document Search" (LOP stands for Local Oversight Program); click on the pull down menu that says "Search Fields" and change to "Street Number", type in 6501 and hit "enter" and all the documents will and search by case address; you'll find numerous documents (50+) that are readily available to the public.

Thank you,

Subject: cannot find fuel leak site on ACEH website

re: ACEH case #RO0003066

I am a neighbor of this property. Leak site is 6501 Shattuck St., and I reside at 6516 Whitney Street, Oakland.

We are concerned that there was insufficient remediation of groundwater contamination at this site. However, the site and its remediation documents were not accessible from the ACEH website through search or maps. We request that the case not be closed until sufficient information is available to the public.

Thank you.

Evan Magers & Caitlin Stuart
