Mark-

As discussed earlier today, we are uploading the following reports to Geotracker by COB today:

- Ninyo and Moore, Phase I, 2/6/02
- Ninyo and Moore, Limited Phase II, 3/30/04
- Northgate Environmental, UST Sampling Test Results, 11/9/09
- Northgate Environmental, Remedial Action Report, 7/1/10

Additionally, only the 2004 Phase II report had any boring logs; we will get them uploaded today or Monday. We are also uploading a geo\_map file. Any remaining information needing to be uploaded to Geotracker will have to be produced by Placeworks or Northgate as we do not have it in our files and it is not on the ACEH FTP site. I have a message in to Stuart Rickard of Placeworks inquiring about the remaining missing information. I will update you once I hear back from him regarding EDDs for the analytical data collected to date, missing boring logs, figure showing the 20 soil borings, etc.

Please let me know if you have any questions.

Thank you,

---
