Mark-

I just wanted to give you an update on this project. As the site has no parking lot (nor any offsite property) and the City of Emeryville will not let us store any drums on the sidewalk or street parking, we have to get an EPA ID number so that we can ship any waste the day it is generated. As such, we are at a standstill until we get the EPA ID issued. We have completed the utility locate and will schedule the work once we have the EPA ID. I will update you once I have more information.

Thank you,

Brian Silva

Hi Brian,

Please use this email to document general ACEH acceptance of an extension request; however, my intent was to keep the time short to hopefully indicate that an extensive SCM was not requested, just a preliminary conceptual model that would / could be modified based ultimately on the findings. I'll update Geotracker with a slightly shorter extension, to April 1; hopefully that will be sufficient.

In regards to the Geotracker uploads, you're in good shape at this point. Please do continue to seek the missing site data from Northgate, or where- or who-ever. I'd like to think it'll help the site move forward down this path.

Thanks,

Mark Detterman

Mark-

As I mentioned in my voice mail to you this morning, I have a couple of questions about the above referenced sites.

RO0003068

I am requesting a 6-week extension for the submittal of the SCM and work plan addendum so that I have time to review the file and prepare the requested documents. If this is acceptable to ACEH, the requested document will now be submitted by April 12, 2013.

I would also like to confirm that we met your 2/25/13 deadline for the Geotracker uploads. As I stated in my last e-mail, CRA on behalf of Chevron has uploaded all of the information that is available to us at this time. I have contacted Stuart Rickard of Placeworks and he stated that there are no further documents or maps and that no EDDs were ever produced. I will be contacting Northgate shortly to see if they at least have any field notes that show where the 20 soil borings were located.

RO0000466

In ACEH's 2/8/13 letter, Technical Comment 1 indicates that the Geotracker LTCP Checklist and the ACEH *Data Gap Identification Tool* (DGIT) are attached. However, neither of these documents was included with the letter that was sent to Chevron and CRA. Can you please provide them?

Please give me a call if you have any questions.

Thank you,

Brian Silva
