Duration: 0 hours

Phone call with Jeff Adams of Engeo 925-395-2506. They have been getting TPHdiesel and motor oil at concentrations exceeding cleanup goals in confirmation soil samples from the two smaller excavations. The soil used for backfill includes Class II recycled material and may have asphaltic material. Asphalt is not visible in sides of excavation. No to minimal BTEX, no naphthalene, and no TPHg. I suggested PAH data using SIM as missing analytical data.
