Phone call with Peter Langtry or Cornerstone Earth Group. The Excavation Report is in review with GSA. He is considering a scope of work consisting of installing one to two soil vapor probes. I indicated my original assumption was on order to 2 to 4 probes but have not reviewed the conditions in detail and have not reviewed Excavation Report. Construction is ongoing and they may consider installing the probes in one to two months to avoid damage during construction. This seemed reasonable to me.

Jerry Wickham
