Matt,

I wanted to inform you that the drilling at the high school will be performed on Tuesday June 12 starting at about 8 am. Work is anticipated to take just one or two days. Please call if you have any questions.

Lee Dooley/ 408 656-2505

Susan,

That would be fine. Please use this email as ACEH approval the requested extension. I'll update Geotracker shortly.

Best,

Hi Mark,

We are in receipt of your letter for San Lorenzo High School dated April 11, 2012, requesting a technical report be submitted by June 15, 2012 (Fuel Case No. RO0003082). San Lorenzo Unified High School District is requesting a 30 day extension be granted. The last day of school at this facility is June 7, 2012. Because of safety and access issues, the District would prefer to conduct field work after the campus is closed for the school year.

We would plan to conduct the Geoprobe field work the week of June 11th, with a new report submittal date of July 16, 2012.

Looking forward to your response.

Sincerely,

Susan Garner PG, CEG  
Principal Geologist  
The EquoLogic Group
