Gabe,

Yes. Based on previous analytical results, you may eliminate the TO-17 analysis.

Regards,
Keith Nowell

Hi Keith,

As a follow-up to my phone message regarding RO3084, ATC is requesting your approval to discontinue sampling/analysis for naphthalene via method TO-17. We have performed that analysis for a few quarters now and had not detections above reporting limits. Please let me if you approve of the discontinuation.

Best regards,
