Re Salvation Army- RO3084

I returned a phone mail message from Mr. Mike Sonke re the Salvation Army site. In his phone message Mr. Sonke indicated that it has been more than 60 days since the revised work plan for site investigation has been uploaded, he wants my input and suggestions to the work plan, and ATC wishes to implement the revised work plan as soon as possible. I responded that the revised work plan had been reviewed and that the revised work plan did not incorporate several of the items ACEH identified in our May directive letter. As presented the revised work plan would be rejected. Mr. Sonke said he had not review the revised work plan against the May directive letter and that the person who prepared the work plan was out in the field today. The one specific item I identified was the transects ACEH recommended in our letter. Mr. Sonke recalled some transect language and indicated there may be some confusion as to what the transect was about.

I recommended I speak with the person who prepared the work plan. Mr. Sonke suggested a conference call with he, the work plan preparer, and myself. The call schedule was open due to conflicting schedule. The most probable time would be for next Tuesday, 11/ 23.
