Re: **SLIC Case #RO0003085; GeoTracker Global ID #T10000003431**
Former CEMEX Construction Materials Pacific - Sunol Aggregate Plant
6527 Calaveras Road, Sunol

Mr. Wickham:

Please find enclosed our submittal of documents for the above-referenced SLIC case letter dated December 27, 2011. Information pertaining to the spill and CEMEX's cleanup are as follows:

- Date and cause of spill; September 7, 2010 by Williams Trucking (CMAC #37112), a haul-truck for Oliver deSilva, Inc., the leaseholder of the subject property. *On the date of the spill CEMEX was operating at the site under a contractual agreement with the leaseholder to produce aggregate materials. That agreement was completed and CEMEX ceased all of its production at the site as of November 1, 2011.
- Date of phone report by CEMEX to Alameda County informing that the spill occurred; September 7, 2010.
- CEMEX's cleanup of the spill location and placement of all contaminated material onto impervious plastic sheeting for the leaseholder; September 7, 2010.
- Date of written report submittal to Alameda County and CalEMA; September 9, 2010. Photos included in the report show that the site cleanup was thorough by ensuring that scraping with loader equipment continued down to clean, unaffected, soil.
- CEMEX's date of removal of the contaminated cleanup material by Evergreen Oil Inc., under manifest #005764896JJK, was January 10, 2011. We enclose a copy of the hazardous waste bill-of-lading and invoice for transfer and disposal of four 55-gallon drums of used absorbent and soil material generated to clean up the reported spill.

CEMEX submits that the location of the spill is not a contamination concern. The extent of cleanup of the spill was very quick and thorough. In addition, because the spill occurred in an area immediately adjacent to active aggregate piles there is no residual contamination;

since the date of the spill the spot has been in a near-constant state of scraped removal for loadout along with fresh aggregate material into contractor haul trucks.

We can be contacted at (925) 426-2261 if you need further clarification about the report.

Regards

IMPORTANT NOTICE REGARDING THE DISPOSITION OF YOUR OIL.

Per California Health and Safety Code Section 25250.9, Evergreen hereby advises customer that customer's shipment of used oil may be transported to a facility that is required to comply with federal regulations applicable to management of used oil, but that is not required to comply with the more stringent requirements applicable to hazardous waste management facilities. California facilities that handle or process used oil are required to meet those more stringent requirements, and some out-of-state facilities that process used oil also meet those requirements. These include more stringent leak detection and prevention requirements, engineering certifications of tank integrity, and financial assurances for closure and accidental releases. It is lawful to send used oil to out-of-state facilities that comply only with federal used oil management standards and not these more stringent requirements. This notification is for information purposes only.
