Subject: New RO 3108 - At Last a Name

I've updated Envision with a name for the site; it's the same as the PCB site that will be transferred to DTSC, Emeryville Parkside LLC. While it uses a second address for the site, it is the same large parcel and same redevelopment. DTSC is not interested in managing this portion of contamination as it is petroleum (even though their site VCA states there is petroleum contamination they'll be overseeing as part of the VCA...). Chris (CUPA) is still waiting for a UST removal report.

The "new case" tracking spreadsheet is read only right now (you're in), if you can copy and paste the name, it would be appreciated.
