Subject: UST REMOVAL PERMIT CONDITIONS

The following items are included in the Conditions of Approval:

This list is in addition to the items listed in the approved plans

1. A site safety plan shall be maintained on-site during all construction activities.
2. All stockpiled backfill/soil shall be placed on plastic tarp and covered to prevent runoff.
3. All stockpiled backfill/soil shall be properly sampled and disposal method/location approved by ACEH prior to disposal.
4. All equipment previously in contact with petroleum shall be properly cleaned or properly disposed.
5. All equipment previously in contact with petroleum shall be placed on a plastic tarp and covered to prevent runoff.
6. All sampling analytical results, manifests, and disposal invoices will be submitted to ACEH
7. Construction site shall limit access to authorized personnel.
8. All removal of UST components and sampling activities shall be witnessed by a representative of this office. Notify this inspector at least 48 hours prior to testing.

6. Contractor KRB CONSTRUCTION INC
 Address 18440 VIETTA CANYON Rd.
 City, State Salinas Zip 93907 Phone 408-690-6407
 License Type B, ICC, HAZ ID# 864502/ICC 5250391
7. Consultant (if applicable) COMPLIANCE AND CLOSURE
 Address 4115 BLACKHAWK Plaza Cir. Suite 100
 City, State DANVILLE, CA Zip 94506 Phone 925-580-2258
8. Main Contact Person for Investigation (if applicable)
 Name GARY MUIKEY Title OWNER
 Company COMPLIANCE AND CLOSURE
 Phone 925-580-2258
9. Number of underground tanks being closed with this plan 1
 Length of piping being removed under this plan Ø
 Total number underground tanks at this facility (**confirmed with owner or operator) _____
10. State Registered Hazardous Waste Transporters/Facilities (See Instructions).
- a) Product/Residual Sludge/Rinsate Transporter
 Name ECOLOGY CONTROL INDUSTRIES EPA I.D. No. CAD982030113

City, State RICHMOND, CA Zip 94801

11. Sample Collector

Name GARY MUIKEY

Company COMPLIANCE AND CLOSURE

Address 4115 BLACKHAWK PLAZA Cir

City, State DANVILLE, CA Zip 94506 Phone 925-580-2258

12. Laboratory

Name _____

Company ACUTEST

Address 2105 Lundy AVE

City, State SAN JOSE, CA Zip 95113

State Certification No. 08258 CA

13. Have tank(s) or piping leaked in the past? Yes [] No [X] Unknown []

If yes, describe: _____

14. Describe method(s) to be used for rendering tank(s) inert:

TANK will be pumped DRY AND 75lbs of DRY ICE
inserted to INERT THE TANK

Before tank(s) are pumped out and inerted, all associated piping must be flushed back into the tank(s). All accessible piping must then be removed. Inaccessible piping must be permanently plugged using grout.

The Bay Area Air Quality Management District, (415) 771-6000, along with local Fire and Building Departments, must also be contacted for tank removal permits. Fire departments typically require the use of a combustible gas indicator to verify tank inertness. **It is the contractor's responsibility to have a functional combustible gas indicator on-site to verify that the tank(s) is inerted.**

15. Tank History and Sampling Information ***** (See Instructions) *****

Tank		Material to be sampled (tank contents, soil, groundwater)	Location and Depth of Sample(s)
Capacity (gallons)	Use History include date last used (estimated)		
1000	WASTE OIL	SOIL	EA END OF TANK @ 7'

One soil sample must be collected for every 20 linear feet of underground piping that is removed. A groundwater sample must be collected if any groundwater is present in the excavation.

Excavated/Stockpiled Soil	
Stockpiled Soil Volume (estimated) 18 cu yds	Sampling Plan SEE 16 TABLE 2

Stockpiled soil must be placed on bermed plastic and must be completely covered by plastic sheeting.

Will the excavated soil be returned to the excavation immediately after tank removal? yes [] no [] unknown

If yes, explain reasoning DUE TO LOT SIZE WE WOULD LIKE TO RETURN SOIL TO EXCAVATION UNTIL SOILS REPORT IS ISSUED

If unknown at this point in time, please be aware that excavated soil may not be returned to the excavation without prior approval from this office. This means that the contractor, consultant, or responsible party must communicate with the Specialist IN ADVANCE of backfilling activities.

16. Chemical methods and associated detection limits to be used for analyzing sample(s):

The Tri-Regional Board recommended minimum verification analyses and practical quantitation reporting limits shall be followed.

See Table 2, Recommended Minimum Verification Analyses for Underground Tank Leaks.

Contaminant Sought	EPA or Other Sample Preparation Method Number	EPA or Other Analysis Method Number	Method Detection Limit
Gasoline - TPH _g /BTEX		8260 -	50 ppb
Diesel - TPH _d		80154	100 ppb
chlorinated solvents		8260	1 ppb
Fuel oxygenates (MTBE, TAME, ETBE, DIPR & TBA)		8260	1 ppb
Can 13 metals		200.7/7000/6070 B	1 ppm
wash oil		9070	1 ppm

17. Submit Site Health and Safety Plan (See Instructions)

18. Submit Worker's Compensation Certificate copy

Name of Insurer KRB CONST INC IS EXEMPT

19. Submit Plot Plan ***** (See Instructions) *****

20. Enclose Deposit (See Instructions)

21. **Report all leaks or contamination to this office within 5 days of discovery.**
The written report shall be made on an Underground Storage Tank Unauthorized Leak/Contamination Site Report (URL) form.

22. **Submit a closure report to this office within 60 days of the tank removal. The closure report must contain all information listed in item 22 of the instructions.**

23. Submit State (Underground Storage Tank Permit Application) Forms A and B (one-B form for each UST to be removed) (mark box 8 for "tank removed" in the upper right hand corner).

**UNIFIED PROGRAM CONSOLIDATED FORM

SITE SAFETY PLAN

Bockman 76 18501 Hesperian Blvd.

San Lorenzo, CA 94580

Waste Oil tank removal

1. Secure work area from public with barricades caution tape.
2. Provide 40-b fire extinguisher within 25' of work area.
3. All site personnel shall have and wear safety shoes, safety vests, eye protection, hard hats, and hearing protection thru-out the course of the project.
4. All concrete spoils shall be removed daily to prevent tripping hazard.
5. NO SMOKING within 300' of the excavation.
6. NO firearms, drugs, or alcohol are to be brought onto the Bockman 76 site.
7. There shall be at minimum one first aid kit onsite.
8. There shall be at a minimum 5 gals. of drinking water onsite for personnel.
9. All personnel and site employee's shall attend a pre-construction safety meeting.
10. All personnel shall be responsible as fire watch.
11. All personnel shall familiarize themselves with the driving directions and location of nearest American Medical Response location.

UST Program - Local Guidance (LG) 48-5

LG 48-5 - CONTRACTORS' LICENSING AND CERTIFICATION REQUIREMENTS FOR INSTALLATION, REMOVAL, AND UPGRADE OF UNDERGROUND STORAGE TANKS

June 14, 1998

To: Local Agencies and Interested Parties

LG 48-5 CONTRACTORS' LICENSING AND CERTIFICATION REQUIREMENTS FOR INSTALLATION, REMOVAL, AND UPGRADE OF UNDERGROUND STORAGE TANKS

This letter combines and updates LG 48-4 with LG 75-3, "Licensing Requirements for Hazardous Substance Removal and Remedial Action." Together, this letter serves to provide contractors' licensing and certification requirements for installation, removal, or upgrading of USTs. This update covers:

1. licenses required to apply interior lining in a UST;
2. licenses required to install a bladder system in a UST;
3. licenses required to install corrosion protection systems onto USTs; and
4. change in policy regarding the hazardous substance certification requirement for interior lining contractors.

Licensing

Any work to upgrade, install, or remove USTs is subject to contractor licensing if the total cost of such work is \$300 or more. Under current Contractors State License Board (CSLB) policy only those contractors holding one of the following classifications are properly licensed to contract for such work:

General Engineering Contractor (A) - General engineering contractors may work on underground storage tanks for any purpose whatsoever at any location.

General Building Contractor (B) - General building contractors may work on an underground storage tank only if such work is performed under contract to construct or remodel a building that houses people, animals or chattels, and the work involves the use of at least 2 or more unrelated trades or is subcontracted to the appropriate license.

Plumbing Contractor (C-36) - Plumbing contractors may work on any underground storage tank that provides a service to a building. This includes storage tanks for service stations. Any other type of underground storage tank may only be worked on by a General Engineering Contractor (A).

Limited Specialty Contractor (C-61-D-40) - Service station equipment contractors may work on fuel underground storage tanks at service stations or any other site where storage capacity does not exceed 20,000 gallons. This license is not currently being issued by CSLB.

A contractor possessing any one of the above licenses may contract to apply interior lining to a UST. In accordance with LG 136-1, "Interior Lining and Cathodic Protection of Underground Storage Tanks," a contractor may also apply interior lining if possessing one of these licenses:

- Painting and Decorating (C-33)
- Limited Specialty/Synthetic Products (C-61/D12)
- Limited Specialty/Protective Coating (C-61/D51)

Only those contractors holding one of the following classifications are properly licensed to contract for installation of bladders:

- General Engineering Contractor (A)
- Plumbing Contractor (C-36)
- Limited Specialty/Protective Coating (C-61/D51)

For information regarding the qualifications necessary to design, certify, install, and test corrosion protection systems see LG 145, "Clarification of Corrosion Specialist and Cathodic Protection Tester."

Summary of Licensing Requirements

	General Engineering (A)	General Building (B)	Painting and Decorating (C-33)	Plumbing (C-36)	Limited Specialty/Synthetic Products (C-61/D12)	Limited Specialty (C-61/D-40)	Limited Specialty/Protective Coating (C-61/D-51)
To upgrade, install, or remove USTs if the aggregate costs of such work is \$300 or more	X	X		X		X	
To contract to apply interior lining	X	X	X	X	X	X	X
To contract for installation of bladders	X			X			X

Hazardous Substance Certification

In accordance with the provisions of Business and Professions Code (B&P) Section 7058.7, a contractor must possess a Hazardous Substance Certification issued by the CSLB to:

install or remove an underground storage tank. However, a contractor who is not certified may bid on or contract for the installation or removal, as long as the work is performed by a contractor who is certified.

upgrade an underground storage tank. Upgrading means installation of a bladder system, application of interior lining, and installation of striker plates that are permanent bonded to the tank bottom. A contractor does not need to possess this certification to install spill containment or overfill prevention devices, fill pipes, vapor recovery systems, or leak detection equipment. Again, a contractor who is not certified may bid on or contract for the installation or removal, as long as the work is performed by a contractor who is certified.

engage in **removing or remedying the release of a hazardous substance** at the site or to correct the conditions that threaten the release of a hazardous substance (pursuant to Sections 25355.5 and 25356 Health and Safety Code). Per Section 7058.7, "removal or remedial action" refers to work in which the contractor digs into the surface of the earth and removes the dug material and the work is at a hazardous substance release site as identified in Section 25356 H&SC. These provisions of the Health and Safety Code apply to hazardous substances other than petroleum. Therefore, the hazardous substance certification is not required for corrective action at petroleum UST sites.

If you have any questions, please call the licensing staff of the CSLB at (916) 255-3900, or write to:

P.O. Box 26000

CONTRACTOR AGREEMENT

THIS AGREEMENT made the 15th day of August 2011 by and between KRB Construction Inc. hereinafter called the Contractor and Abdul Noor Mayar hereinafter called the Owner. Witnesseth, that the Contractor and the Owner for the considerations named agree as follows:

Article 1. Scope of the Work

The Contractor shall furnish all of the labor and perform all of the work shown on the Drawings and/or described in the Specifications entitled Exhibit A, as annexed hereto as it pertains to work to be performed on property at 18500 Hesperian Blvd. Hayward, CA

Exhibit A

1. Apply for tank removal permit (Fees paid for by owner).
2. Break, remove and dispose of concrete tank Pad.
3. Furnish backhoe to excavate and stockpile overburden for reuse to backfill excavation.
4. Take 2 soils samples one from ea end of tank pit and take to lab for analysis.
5. Furnish soils report.
6. Remove tank and load onto ECI truck for disposal with manifest.
7. Furnish additional backfill material to bring excavation to -6" from finish grade.
8. Re pour concrete at area of excavation.
9. Leave site broom clean.

Exclusions

1. Over excavation.
2. Pumping of water if encountered.
3. Shoring of excavation if needed.
4. Disposal of any soil or solids from tank excavation or tank.(tank needs to be completely empty).

Article 2. Time of Completion

The work to be performed under this Contract shall be commenced within 14 days of receipt of equipment and shall be substantially completed within 18 working days. Time is of the essence. The following constitutes substantial completion of work pursuant to this proposal.

Article 3 Contract Price

The Owner shall pay the Contractor for the material and labor to be performed under the Contract the sum of (11,058.00) and deductions pursuant to authorized change orders.

Article 4. Progress Payments

Payments of the Contract Price shall be paid in the manner following:

1. \$9,000.00 upon removal and disposal of tank.
2. \$2,058.00 upon completion of backfill and concrete placement.

Article 5. General Provisions

Any alteration or deviation from the above specifications, including but not limited to any such alteration or deviation involving additional material and/or labor costs, will be executed only upon a written order for same, signed by Owner and Contractor, and if there is any charge for such alteration or deviation, the additional charge will be added to the contract price of this contract.

In addition, the following general provisions apply:
If payment is not made when due, Contractor may suspend work on the job until such time as all payments due have been made. A failure to make payment for a period in excess of 5 days from the due date of the payment shall be deemed a material breach of this contract.

1. All work shall be completed in a workman-like manner and in compliance with all building codes and other applicable laws.
2. The owner shall furnish a plan and scale drawing showing the shape, size dimensions, and construction and equipment specifications for improvements, a description of the work to be done and description of

- materials to be used and the equipment to be used or installed, and the agreed consideration for the extent required by law all work shall be performed by individuals duly licensed and authorized by Contractor to perform said work.
- Contractor may at its discretion engage subcontractors to perform work hereunder, provided Contractor fully pay said subcontractor and in all instances remain responsible for the proper completion of this contract.
- Contractor shall furnish Owner appropriate releases or waivers of lien for all work performed or materials provided at the time the next periodic payment shall be due.
- Change orders shall be in writing and signed both by Owner and Contractor, and shall be incorporated in, and become a part of the contract if contractor supplies the required materials.
- Contractor shall obtain all permits necessary for the work to be performed at owner's expense.
- Contractor agrees to remove all debris and leave the premises in broom clean condition.
- Contractor shall not be liable for any delay due to circumstances beyond its control including strikes, labor disputes, or general unavailability of materials.
- Contractor warrants all work for a period of 12 months following completion.
- Contractor shall not be held liable or responsible for transportation, protection during transportation or installation of any items or materials furnished by owner. Contractor exercises right to install items without warranty on those items or materials furnished by owner.
- If owner furnished items are not available for what ever reason causing a delay in construction project master schedule will no longer be binding.
11. All disputes hereunder shall be resolved by binding arbitration in accordance with rules of the American Arbitration Association.
12. Contractor shall not be liable for any delay due to circumstances beyond its control including strikes, labor disputes, or general unavailability of materials.
13. Contractor warrants all work for a period of 12 months following completion.
14. Contractor shall not be held liable or responsible for transportation, protection during transportation or installation of any items or materials furnished by owner. Contractor exercises right to install items without warranty on those items or materials furnished by owner.
15. If owner furnished items are not available for what ever reason causing a delay in construction project master schedule will no longer be binding.
- FAILURE BY CONTRACTOR WITHOUT LAWFUL EXCUSE TO SUBSTANTIALLY COMMENCE WORK WITHIN TWENTY (20) DAYS FROM THE APPROXIMATE DATE SPECIFIED IN THE PROPOSAL AND CONTRACT WHEN WORK WILL BEGIN IS A VIOLATION OF THE CONTRACTOR'S LICENSE LAW.**

Article 6. Other Terms

1. The following terms and conditions apply to the payment schedule in Article 4:

- a. In no event shall the payment schedule provide for Contractor to receive, nor shall Contractor actually receive, payment in excess of 100% of the value of the work performed on the project at any time, excluding finance charges, except that Contractor may receive an initial down payment authorized by condition as described under Article 4 Payment schedule
- b. A failure by Contractor without lawful excuse to substantially commence work within twenty (20) days of the approximate date specified in this Contract when work will begin shall postpone the next succeeding payment to Contractor for that period of time equivalent to the time between when substantial commencement was to have occurred and when it did occur.
- c. If the contract provides for a payment of a salesperson's commission out of the contract price, that payment shall be made on a pro rata basis in proportion to the schedule of payments made to the contractor by the disbursing party.

- a. Do not use this form if the Owner is going to pay interest or any finance charge. A Contract with finance charges must comply both with the California Retail Installment Sales (Unruh) Act and the Federal Truth in Lending Act. The Federal Truth in Lending Act also applies if the contract price is payable in more than four installments, even if there are no interest or finance charges. (Note: Progress payments are not installment payments.)
- b. Do not use this form if this is a contract for construction of a swimming pool.

NOTICE TO OWNER

(Section 7018.5—Contractors License Law)

THE LAW REQUIRES THAT, BEFORE A LICENSED CONTRACTOR CAN ENTER INTO A CONTRACT WITH YOU FOR A WORK OF IMPROVEMENT ON YOUR PROPERTY, HE MUST GIVE YOU A COPY OF THIS NOTICE.

Under the California Mechanics' Lien Law, any contractor, subcontractor, laborer, supplier, or other person or entity who helps to improve your property, but is not paid for his or her work or supplies, has a right to place a lien on your home, land, or property where the work was performed and to sue you in court to obtain payment.

This means that after a court hearing, your home, land, and property could be sold by a court officer and the proceeds of the sale used to satisfy what you owe. This can happen even if you have paid your contractor in full if the contractor's subcontractors, laborers, or suppliers remain unpaid.

To preserve their rights to file a claim or lien against your property, certain claimants such as subcontractors or material suppliers are each required to provide you with a document called a "Preliminary Notice." Contractors and laborers who contract with owners directly do not have to provide such notice since you are aware of their existence as an owner. A preliminary notice is not a lien against your property. Its purpose is to notify you of persons or entities that may have a right to file a lien against your property if they are not paid. In order to perfect their lien rights, a contractor, subcontractor, supplier, or laborer must file a mechanics' lien with the county recorder which then becomes a recorded lien against your property. Generally, the maximum time allowed for filing a mechanics' lien against your property is 90 days after substantial completion of your project.

(1) Upon making payment on any completed phase of the project, and before making any further payments, require your contractor to provide you with unconditional "Waiver and Release" forms signed by each material supplier, subcontractor, and laborer involved in that portion of the work for which payment was made. The statutory lien releases are set forth in exact language in Section 3262 of the Civil Code. Most stationery stores will sell the "Waiver and Release" forms if your contractor does not have them. The material suppliers, subcontractors, and laborers that you obtain releases from are those persons or entities who have filed preliminary notices with you. If you are not certain of the material suppliers, subcontractors, and laborers working on your project, you may obtain a list from your contractor. On projects involving improvements to a single-family residence or a duplex owned by individuals, the persons signing these releases lose the right to file a mechanics'

lien claim against your property. In other types of construction, this protection may still be important, but may not be as complete.

To protect yourself under this option, you must be certain that all material suppliers, subcontractors, and laborers have signed the "Waiver and Release" form. If a mechanics' lien has been filed against your property, it can only be voluntarily released by a recorded "Release of Mechanics' Lien" signed by the person or entity that filed the mechanics' lien against your property unless the lawsuit to enforce the lien was not timely filed. You should not make any final payments until any and all such liens are removed. You should consult an attorney if a lien is filed against your property.

Each contractor licensed under this chapter, prior to entering into a contract with an owner for work

Pursuant to Section 7159, shall give a copy of this "Notice to Owner" to the owner, the owner's agent, or the payer. The failure to provide this notice as required shall constitute grounds for disciplinary action.

Contractors are required by law to be licensed and regulated by the Contractors' State License Board, which has jurisdiction to investigate complaints against contractors if a complaint regarding a patent act or omission is filed within four years of the date of the alleged violation. A complaint regarding a latent act or omission pertaining to structural defects must be filed within 10 years of the date of the alleged violation. Any questions concerning a contractor may be referred to the Registrar, Contractors' State License Board, P.O. Box 26000, Sacramento, CA 95826.

Subject: RE:

Chris, I have everything set for 1:00 p.m. on Tuesday 11/29/2011 One hr prior to your arrival we will inert the tank with 50 lbs of dry ice. ECI will be on site to transport the tank to their facility in Richmond and Compliance and Closure will be onsite for the sampling and transport to the lab. I have notified the dealer to have all contents of the tank to be removed prior to our arrival. If this meets with your approval please confirm our appointment via e-mail or if you have any questions please give me a call, Thanks Kerry Brenton KRB Const. Inc.

Chris here is Fuller Excavatings Lic# and certifications. He will do the removal, and KRB will remove the concrete the day prior to the removal. The tank contents to be removed and disposed of by the dealer. ECI of Richmond will pickup and dispose of tank, Compliance and closure will do the soil sampling as per our permit application. Once we have the ok from you KRB will do the backfill and repour the concrete. We would like to do the work the 1st tuesday after Thanksgiving which is 11-29-2011. If this meets with your approval please let me know so I can get everyone scheduled and let the dealer know. Thanks Kerry

UST USED OIL REMOVED UNDER PERMIT SR#0019660

ONSITE TO WITNESS USED OIL UST REMOVAL AND SOIL SAMPLING.

MET WITH ONSITE CONTRACTORS KERRY BRENTON (OVERALL SITE CONTRACTOR), MIKE FULLER (UST REMOVAL CONTRACTOR), AND GARY MULKEY (SOIL SAMPLING). PRIOR TO MY ARRIVAL 80 POUNDS OF DRY ICE WAS PLACED INTO THE UST. A COMBUSTIBLE GAS INDICATOR WAS USED TO DETERMINE THAT THE LEL (LOWER EXPLOSIVE LIMIT) AND O2 LEVELS AT TWO POINTS (TOP AND BOTTOM) IN THE TANK WERE AT ACCEPTABLE LEVELS. THE USED OIL UST WAS REMOVED FROM THE EXCAVATION AND PLACED ONTO THE PAVEMENT. NO VISIBLE HOLES OR CRACKS WERE OBSERVED ON THE TANK EXTERIOR. THE REMOVED TANK WAS PLACED ON TO AN ECI VEHICLE AND TRANSPORTED UNDER MANIFEST 002135905JJK. SOIL SAMPLES WERE TAKEN AT APPROXIMATELY 7 FEET DOWN IN THE TANK PIT INTO NATIVE SOIL. SAMPLES WERE THEN TAKEN UNDER CHAIN OF CUSTODY TO ACUTEST IN SAN JOSE, CA. SAMPLES WILL HAVE A NORMAL TURN AROUND TIME OF 5-7 DAYS.

TANK PIT WAS SECURED BY FENCING
REMOVED BACKFILL WAS PLACED ON PLASTIC AND COVERED.

Generator certifies that it has established a program to reduce the volume or quantity & toxicity of the hazardous waste to the degree determined by generator to be economically practicable.
I hereby certify that I have read and have the authority to bind the above listed generator to the terms on the reverse side of this form.

IMPORTANT NOTICE REGARDING THE DISPOSITION OF YOUR OIL.

Per California Health and Safety Code Section 25250.9, Evergreen hereby advises customer that customer's shipment of used oil may be transported to a facility that is required to comply with federal regulations applicable to management of used oil, but that is not required to comply with the more stringent requirements applicable to hazardous waste management facilities. California facilities that handle or process used oil are required to meet those more stringent requirements, and some out-of-state facilities that process used oil also meet those requirements. These include more stringent leak detection and prevention requirements, engineering certifications of tank integrity, and financial assurances for closure and accidental releases. It is lawful to send used oil to out-of-state facilities that comply only with federal used oil management standards and not these more stringent requirements. This notification is for information purposes only.
