Subject: SVC Remediation Startup

Mark,

Great news...as of 11 November 2016, the remediation system at the Swiss Valley Cleaners site is operational. We are getting extraordinary flow out with all wells turn on at 164 SCFM!....and the initial PID reading was 16 ppm! We are pulling some nice mass! I will keep you posted on the startup week and once completed will generate the required report.

Let me know if you have any immediate questions.

Regards,

Daniel Villanueva
