Subject: RE: Ashland Housing Project Stockpile SPC

Thanks Jerry, stockpile SPC will be disposed off-site.

I'll have the in-situ samples analyzed for naphthalene in addition to the analyses previously discussed.

Subject: RE: Ashland Housing Project Stockpile SPC

Peter,

Alameda County Environmental Health has reviewed the submitted information and finds that the second soil stockpile (SPC) does not appear to be suitable for reuse on site. Although the concentration of TPH as motor oil (430 mg/kg) is below the IRAP Cleanup Goal of 500 mg/kg, it is above the current ESL ceiling level of 100 mg/kg and the concentration of TPH as diesel (85 mg/kg) is near the ESL ceiling level of 100 mg/kg.

There is one item that I missed in reviewing the proposed analytes for the in-situ soil sampling in Kent Avenue. Please include naphthalene as an analyte for the discrete soil samples using EPA Method 8260.

Regards,
Jerry Wickham

Subject: Ashland Housing Project Stockpile SPC

Hi Jerry

The lab results are in for the second stockpile (SPC) we sampled and it is acceptable for reuse based on the site cleanup goals (ESLs included in the IRAP). Please confirm that the soil is acceptable for reuse and/or provide comments based on the below information.

- 1) A map or aerial photo showing the general area where the fill came from. See attached figure showing the location of stockpile SPC and the trench in Kent Avenue where the fill came from.
- 2) The volume of the stockpiles and volume that each sample represents and which sample goes with which stockpile. The stockpile SPC is approximately 9 cubic yards, each discrete sample represents approximately 2.2 cubic yards.
- 3) The type of samples - composite or discrete. Composite sample COMP C was analyzed by TPHd, TPHmo, and Title 22 Metals. Discrete sample SPC-3 was analyzed for TPHg and BTEX.
- 4) The type of fill and the heterogeneity. The fill was observed to be dark brown, moist, silty sand and was generally homogenous.
- 5) Whether the fill contains any debris or construction material. No debris or construction material was observed in the stockpiled soil.
- 6) Whether any staining or odor was observed. No staining or odor was observed in the stockpiled soil.
- 7) Confirmation of where the soil is to be reused. Soil is to be reused as backfill beneath Building A.
- 8) Laboratory analytical results. See Attached.

Thanks,

Peter D. Sims, LEED AP

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
D	Surrogate or matrix spike recoveries were not obtained because the extract was diluted for analysis; also compounds analyzed at a dilution may be flagged with a D.
X	Surrogate is outside control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
▫	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Comments

No additional comments.

Receipt

The samples were received on 11/7/2014 3:41 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.9° C.

GC/MS VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC Semi VOA

Method 8015B: The following sample required a dilution due to the nature of the sample matrix: COMP C (720-61118-5). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

Method 6010B: The following sample was diluted due to the abundance of non-target analyte: COMP C (720-61118-5). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is <=/ background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A
