**Subject:** Revision of Site Management Plan for RO3136, 6800 Overlake Place, Newark  
**Date:** Wednesday, February 11, 2015 2:30:00 PM

---

Eileen,

Public Storage, the responsible party for case RO3136 has agreed to revise the Site Management Plan for capping of the slag and construction of a storage facility. In order to maintain a buffer between the slag and groundwater, no slag will be placed at a depth below the current depth of the slag. The overall grade of the project will be increased by between 6 inches and one foot to accommodate placement of slag that will be removed from the northern portion of the site. Therefore, the thickness of slag will be increased but the distance from slag to groundwater will be maintained. We expect to receive a revised Site Management Plan by Tuesday, February 17.

Thank you for your comments and working with us to improve the project.

Regards,  
Jerry Wickham
