Delong and Gary,  
Interesting twist. I'd not thought of that.

Regardless, I've extended the due date for the deliverable until October 31, 2017 per your request. Should you need to document the extension, you can use this email. I've updated Geotracker already.

Mark:

It looks like I'm going to have to request another extension of the report due date for Delong Petroleum. Gregg Drilling is booked up until October 6<sup>th</sup>. I was going to do the hand auger myself but since the Dept. of Public Works requires a permit with C-57 license for both the hand auger boring and the soil vapor borings I'm going to have to have the drillers do the work. I need to request an extension to October 31<sup>st</sup> for submittal of the report.

Gary,  
James Yoo at public works is the most knowledgeable, but I believe anything over 3 feet needs a permit (actually I think for environmental sites it's anything over 18 inches, but check). In order to keep the site

compliant with USTCF regs requiring submittal of deliverables by an identified date, if you need an extension please let me know. It would need to be based on investigation based delays.

**Subject:** Delong Petroleum - Off-Site Access

Hello Mark:

I wanted to let you know I did receive permission from Mr. David Franklin owner of the property at 706 Buena Vista Avenue to do the hand auger boring. Because of my schedule, I will not be able to do the boring until the first or second week of September.

I know I need to get a boring permit for that work, does the County require boring permits for the 5 foot vapor samples?

Thanks and let me know if you have any questions.

Gary Mulkey
