Andrew and Dave,

I have extended the due date to February 5th due to the relatively short period of time (less than the standard of 60 days) I allowed for the submittal. This was done in an effort to allow Mr. Murray to meet his financing timelines, which he has expressed continuing concern about. ACEH is exceptionally busy, and while I can try to get reviews done quicker, I have less ability to do so due to the work load. The date has been updated on Geotracker already. Should it be needed, please use this email to document the extension approval.

Mark,

We have been working on the Vapor Mitigation System Document but it appears that tomorrows due date of January 22, 2015 may be hard to reach. We will have it completed shortly but were wondering if we could have at least a 1-2 week extension to wrap up the plan and make sure that everything is addressed in the plan.
