**SUBJECT: REVISED WELL INSTALLATION AND INTERIM  
REMEDIAL CORRECTIVE ACTION REPORT**  
1501 Martin Luther King Junior Way, Oakland, CA

Dear Mr. Nowell:

Enclosed is the July 27, 2016, subject Revised Well Installation and Interim Remedial Corrective Action report prepared by my consultant, Enviro Soil Tech Consultants.

I declare, under penalty of perjury, that the information and/or recommendations contained in the attached report are true and correct to the best of my knowledge.

Sincerely,

A handwritten signature in black ink, appearing to read 'ED HEMMAT', written in a cursive style with several loops.

**SUBJECT: REVISED WELL INSTALLATION AND INTERIM  
REMEDIAL CORRECTIVE ACTION ON THE PROPERTY**

Located at 1501 Martin Luther King Jr. Way, in  
Oakland, California

Dear Mr. Hemmat:

Enclosed is our report summarizing the activities and results of interim remedial corrective action on the property located at 1501 Martin Luther King Jr. Way, in Oakland, California. The work was performed in accordance with your acceptance of our *SOIL AND GROUNDWATER CLEANUP PROPOSAL* dated January 21, 2014.

The environmental work that was conducted included: underground tank removal; soil & groundwater sampling; installation of 6wells (3 extraction, 2 vapor and 1 air sparging); and installation and operation of a groundwater remediation system.

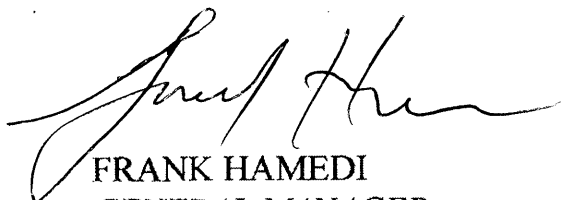

The remediation system was in operation from August 2, 2014 through April 30, 2015. During this period, approximately 1,198,380-gallons of groundwater were extracted and remediated. The results of laboratory testing indicated that the site has been remediated and is ready for site closure if Alameda County Health Care Services Agency (ACHCSA) has no objection.

File No. 6-13-858-SA  
July 27, 2016

If you have any questions or require additional information, please feel free to contact our office at 408-297-1500 or via email at [info@envirosoiltech.com](mailto:info@envirosoiltech.com).

Sincerely,

**ENVIRO SOIL TECH CONSULTANTS**

FRANK HAMEDI  
GENERAL MANAGER

VICTOR B. CHERVEN, Ph. D.  
R. G. #3475

## **GENERAL SITE DESCRIPTION**

The site is located on the northwest corner of Martin Luther King Junior Way and 15<sup>th</sup> Street. The site has two parcel numbers that are identified as 003-0073-004 and 003-0073-005. However according to the Alameda County Assessor Office (ACAO), the side of the building facing Martin Luther King Junior Way is 1501 with parcel number 3-73-4 is listed as a commercial repair garage. The side that is facing 15<sup>th</sup> Street is 660 15<sup>th</sup> Street (parcel number 3-73-5) is listed as vacant commercial building and land.

The property lot has an approximately 13,750 square feet one-story, free standing brick building/warehouse with 3 roll-up doors and a locked chain link fence around a 7,500 square feet parking lot for 22 vehicles. The building was erected in the 1930's.

## **INITIAL INVESTIGATION**

In June 2013, ESTC conducted a Level 1 environmental site assessment with limited soil and groundwater sampling. Four borings were drilled and soil and groundwater samples were collected during drilling for chemical analysis. The sample results are summarized in Tables 1 and 2. Low to elevated levels of petroleum-related hydrocarbons were detected. These contaminants were above levels that normally require remediation.

During the assessment investigation, ESTC's engineer noticed that there was a vent line pipe for an underground storage tank (UST) on the sidewalk at 15<sup>th</sup> Street. The pipe was attached to the southeast wall of the building. ESTC recommended removing the UST and conducting additional assessment.

## **TANK REMOVAL**

On December 3, 2013, after obtaining all necessary permits from the City of Oakland Fire Department-Fire Prevention Bureau (COFD), CEECON, Inc. excavated and removed one 1,000-gallon underground storage gasoline tank under the supervision of Mr. Cesar Avila with COFD. Ecology Control Industries (ECI) transported the removed UST under Uniform Hazardous Waste Manifest to their facility in Richmond for proper disposal. Details of the removal were reported in ESTC's report entitled *SOIL SAMPLING BENEATH REMOVED UST* dated December 26, 2013.

During tank removal activities, ESTC collected 2 soil samples at approximately 8 feet below surface from the excavation, 1 soil sample from the midpoint of the fuel line at approximately 2 feet below surface and 4 soil samples from the stockpile of excavated soil. The stockpile samples were composited into one sample at the laboratory for chemical analysis. Sampling was conducted under the supervision of Mr. Avila. Analytical results of the tank and stockpile 1 samples are summarized in Table 3.

Due to the evidence that both soil and groundwater were contaminated and the building was slated for redevelopment as soon as possible, the owner elected to authorize ESTC to proceed with expedited investigation and remediation rather than wait for a regulatory agency directive. After consultation with ESTC personnel, the owner decided that additional drilling, including the installation of extraction wells for removal of vapor and groundwater, would be the most cost-effective and feasible method of addressing the problem.

## **REMEDIATION SYSTEM INSTALLATION**

In order to comply with the client's request to expedite site cleanup, ESTC drilled six exploratory boreholes inside the building and converted the boreholes into 4-inch diameter groundwater-extraction and 2-inch diameter vapor extraction and air sparging wells. The vapor wells and sparging well were installed in case they were needed for remediation.

### *INSTALLATION AND CONSTRUCTION OF WELLS*

After obtaining the necessary drilling permits from Alameda County Public Works Agency (ACPWA) (see Appendix "D"), ESTC installed the wells in March 25, 26, and 27, 2014. Well drilling was conducted in accordance with ESTC's Standard Operation Procedures (SOP) (Appendix "C") [except these newly installed wells are not groundwater monitoring wells but they are groundwater and vapor extraction wells]. The detailed construction of these wells is shown in the boring logs (Appendix "E"). Table 6 summarizes the well construction details.

Three groundwater-extraction wells were drilled and installed by Vironex, Inc. Wells STEW-1, STEW-2 and STEW-3 were constructed of 4-inch diameter PVC Schedule 40, flush threaded casing with threaded bottom cap with screen of 15-feet from bottom of wells up.

Vironex, Inc. installed two vapor-extraction wells (STVW-1 and STVW-2). They were constructed of 2-inch diameter PVC Schedule 40, flush-threaded casing with threaded bottom cap with screen of 15-feet from bottom of wells.

The air-sparging well STASW-6 was installed on March 27, 2014, and was constructed of 2-inch PVC Schedule 40, flush threaded casing with threaded bottom cap with screen of 5-feet from bottom of well.

All the wells were installed inside the building within a radius of 5 to 50 feet from the former location of the UST.

### *WELL DEVELOPMENT*

The wells were developed using the surge-and-purge method on April 16, 2014. A bailer was lowered into each well and repeatedly raised and lowered to mobilize any sediment that may have collected within the casing. After the water had been surged for approximately 5-minutes, the bailer was used to purge approximately 50 gallons from each well. The purged water was collected in the bucket and stored in the large purge tank that was located on site.

### *WELL SURVEYING*

Muir Consulting was retained to survey the new wells. The survey was performed on April 23, 2015 and the surveyor's report is included as Appendix "B".

### *GROUNDWATER EXTRACTION TREATMENT SYSTEM CONSTRUCTION*

Downhole groundwater pumps were installed in the extraction wells and the wells were connected to a treatment unit for groundwater remediation. The treatment system consisted of PVC piping from the wells to 2000-gallon holding tanks for both treated and untreated water, two 1,000-pound canisters of granulated activated carbon (GAC) for filtering contaminants, transfer pumps from the untreated holding tank to the GAC vessel and from the GAC to the treated holding tank, and a flow meter to measure the rate of extraction and total volume removed.

### **REMEDIATION SYSTEM OPERATION**

Groundwater extraction began in early August 2014, and by August 4 approximately 15,000 gallons of groundwater had been extracted (Appendix "G"). When the holding tank for untreated water was approximately 80% full, the transfer pump was automatically set to pump

approximately 10 gallons per minute untreated water to the first GAC vessel. After flowing through the first GAC vessel, the partially treated water flowed to the second GAC vessel for final treatment. From there, the treated water flowed to the second holding tank. Samples of the effluent were collected from this holding tank on two occasions: July 7, 2014 and November 3, 2014 (Appendix "A", Table 5). When this tank was full, the water was released to the floor drain for disposal in the sanitary sewer line. A process flow diagram of the extraction and treatment system is in Appendix "B".

## **WELL SAMPLING DURING REMEDIATION SYSTEM OPERATION**

On May 20, 2014, ESTC conducted initial groundwater sampling of the extraction wells prior to startup of the remediation system. Elevated concentrations of Total Petroleum Hydrocarbon as gasoline were detected in wells STEW-1 at 11,000 microgram per liter ( $\mu\text{g/L}$ ) and STEW-3 at 7,200  $\mu\text{g/L}$ . Levels in STEW-2 were below detection limits. Samples from STEW-1 and STEW-3 detected Benzene, Toluene, Ethylbenzene and Total Xylenes (BTEX) ranging from low to moderate levels. BTEX were not detected in STEW-2, but a low Xylenes concentration was reported.

To check the efficiency of the remedial system, water samplings were conducted periodically. The second groundwater-sampling event was on September 18, 2014 after approximately 2 months of operation. Groundwater samples continued to detect elevated TPHg in wells STEW-1 (at 11,000  $\mu\text{g/L}$ ) and STEW-3 (at 7,000  $\mu\text{g/L}$ ) with BTEX ranging from low to moderate levels. No changes were detected in STEW-2.

The third groundwater-sampling event was on March 17, 2015. By this time, TPHg concentrations in STEW-1 and STEW-3 had declined to 410  $\mu\text{g/L}$  and 840  $\mu\text{g/L}$ . BTEX concentrations had also declined (Table 4). The sample from well STEW-2 was below laboratory detection limits for all analytes.

The fourth groundwater-sampling event was on May 18, 2015. Hydrocarbons were only detected in the sample from extraction well STEW-1.

A fifth groundwater-sampling event was on June 29, 2015. TPHg and BTEX were below laboratory detection limits in water samples from STEW-2 and STEW-3. Well STEW-1 detected very low levels of Ethylbenzene and Total Xylenes while TPHg, Benzene and Toluene were below the laboratory detection limit.

Methyl Tertiary Butyl Ether (MTBE) was below the laboratory detection limit in all extraction well samples during all sampling events.

Chemical analytical tests results of groundwater samples from extraction wells are tabulated in Table 4 (Appendix "A").

Based on the improvement of water quality, it was deemed unnecessary to use the vapor extraction wells for soil vapor extraction.

## **DISPOSAL OF TREATED GROUNDWATER**

A special discharge permit was approved by EBMUD on May 1, 2014. Disposal began at the beginning of August, and between August 2, 2014 and April 30, 2015, ESTC had pumped and treated approximately 1,198,380 gallons. The water was piped to the floor drain that was connected to the sanitary sewer line at a rate that varied from 2 to 7 gallons per minute (see Appendix "G"). The groundwater extraction remediation system was shut down on April 30, 2015.

## **WELL ABANDONMENT**

In preparation for new construction at the site, some of the wells were abandoned under permit from Alameda County Public Works Agency (ACPWA), ESTC abandoned two of the groundwater extraction wells (STEW-1 and STEW-3), one of the vapor extraction wells (STVW-5), and the sparging well (STASW-6) on November 12, 2015.

Also, all the remediation system such as downhole pumps, holding tanks, GAC vessel and all plumbing and electrical had been removed due to the new construction of the building.

## **RECOMMENDATION**

It was not necessary to abandon extraction well STEW-2 or vapor well STVW-4 in order to begin the new construction in the building. However, because no hydrocarbons have been detected in STEW-2 and vapor extraction well STVW-4 was never used, there is no need to keep them in place. We recommend abandoning these wells as soon as it becomes feasible.

## **LIMITATION**

This report and the associated work have been provided in accordance with the general principles and practices currently employed in the environmental consulting profession. The contents of this report reflect the conditions of the site at this particular time. The findings of this report are based on:

1. The observations of field personnel.
2. The results of laboratory analyses performed by a state-certified laboratory.

### **STANDARD OPERATION PROCEDURES**

**ENVIRO SOIL TECH CONSULTANTS**

## **MONITORING WELL INSTALLATION**

A direct push technology (Geoprobe) tool with hollow-stem auger was used in drilling the soil borings to the desired depths.

Prior to drilling, all drilling equipment was thoroughly steam-cleaned to minimize the possibility of cross-contamination and/or vertical migration of possible contaminants.

The boreholes for the monitoring wells were hand augered to the depth of 5-feet in order to detect any buried underground lines with a diameter of at least two inches larger than the casing outside diameter (O.D.).

The monitoring wells were cased with threaded, factory-perforated and blank, schedule 40 PVC. The perforated interval consisted of slotted casing, generally 0.010 to 0.040 inch wide by 1.5-inch long slot size, with 42 slots per foot (slots which match formation grain size as determined by field grain-size distribution analysis). A PVC cap was fastened to the bottom of the casing (no solvents, adhesive, or cements were used), the well casing was thoroughly washed and steam-cleaned.

After setting the casing inside the borehole, kiln-dried sand or gravel-filter material was poured into the annular space to fill from the bottom of the boring to two feet above the perforated interval. A half-a-foot to two feet thick bentonite plug was placed above this filter material to prevent grout from infiltrating down into the filter material. Approximately one to two gallons of distilled water was added to hydrate the bentonite pellets. Then the well was sealed from the top of the bentonite seal to the surface with concrete or neat cement containing about 5% bentonite (see Well Construction Detail).

To protect the well from vandalism and surface water contamination, Christy box with a special type of Allen screw was installed around the wellhead, (for wells in parking lots, driveways and building areas). Steel stove pipes with padlocks were usually set over wellheads in landscaped areas.

In general, groundwater-monitoring wells extend to the base of the upper aquifer, as defined by the consistent (less than 5 feet thick) clay layer below the upper aquifer, or at least 10 to 15 feet below the top of the upper aquifer, whichever is shallower. The wells do not extend through the laterally extensive clay layer below the upper aquifer. The wells are terminated one to two feet into such a clay layer.

## **WELL DEVELOPMENT**

For all newly installed groundwater-monitoring wells, the well casing, filter pack and adjacent formations were cleared of disturbed sediment and water.

Well development techniques including pumping, bailing, surging, swabbing, jetting, flushing or air lifting by using a stainless steel or Teflon bailer, a submersible stainless steel pump, or air lift pump. The well development was continued until the discharged water appeared to be relatively free of all turbidity.

All water and sediment generated by well development was collected in 55-gallon steel drums (Department of Transportation approved), closed head (17-H) for temporarily storage, and then was disposed of properly, depending on analytical results.

To assure that cross-contamination did not occur between wells, all well development tools were steam-cleaned or thoroughly washed in a Trisodium Phosphate (TSP) solution followed by a rinse in distilled water before each well development.

## **GROUNDWATER SAMPLING**

Prior to collection of groundwater samples, all of the sampling equipment (i.e. bailer, cables, bladder pump, discharge lines and etc...) was cleaned by pumping TSP water solution followed by distilled water.

Prior to purging, the well “Water Sampling Field Survey Forms” was filled out (depth to water and total depth of water column will be measured and recorded). The well then was bailed or pumped to remove four to ten well volumes or until the discharged water temperature, conductivity and pH stabilized. “Stabilized” is defined as three consecutive readings within 15% of one another.

The groundwater sample was collected when the water level in the well recovered to 80% of its static level.

Forty-milliliter (ml.) glass volatile organic analysis (VOA) vials with Teflon septa were used as sample containers. The groundwater sample was decanted into each VOA vial in such a manner that there was a meniscus at the top. The cap quickly was placed over the top of the vial and securely tightened. The VOA vial was then be inverted and tapped to see if air bubbles are present. If none is present, then the sample was labeled and refrigerated for delivery under chain-of-custody to the laboratory. The label information has included a sample identification number, job identification number, date, time, type of analysis requested and the sampler’s name.

**Specific Work Permit Conditions**

1. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost, liability in connection with or resulting from the exercise of this Permit including, but not limited to, properly damage, personal injury and wrongful death.
2. Permittee, permittee's contractors, consultants or agents shall be responsible to assure that all material or waters generated during drilling, boring destruction, and/or other activities associated with this Permit will be safely handled, properly managed, and disposed of according to all applicable federal, state, and local statutes regulating such. In no case shall these materials and/or waters be allowed to enter, or potentially enter, on or off-site storm sewers, dry wells, or waterways or be allowed to move off the property where work is being completed.
3. Compliance with the well-sealing specifications shall not exempt the well-sealing contractor from complying with appropriate State reporting-requirements related to well construction or destruction (Sections 13750 through 13755 (Division 7, Chapter 10, Article 3) of the California Water Code). Contractor must complete State DWR Form 188 and mail original to the Alameda County Public Works Agency, Water Resources Section, within 60 days. Include permit number and site map.

## Alameda County Public Works Agency - Water Resources Well Permit

4. Applicant shall submit the copies of the approved encroachment permit to this office within 60 days.
5. Applicant shall contact Steve Miller for an inspection time at (510) 670-5517 or email to [stevem@acpwa.org](mailto:stevem@acpwa.org) at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.
6. Wells shall have a Christy box or similar structure with a locking cap or cover. Well(s) shall be kept locked at all times. Well(s) that become damaged by traffic or construction shall be repaired in a timely manner or destroyed immediately (through permit process). No well(s) shall be left in a manner to act as a conduit at any time.
7. Minimum seal depth (Neat Cement Seal) is 2 feet below ground surface (BGS).
8. Minimum surface seal thickness is two inches of cement grout placed by tremie.
9. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.
10. Prior to any drilling activities onto any public right-of-ways, it shall be the applicants responsibilities to contact and coordinate a Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits required for that City or to the County and follow all City or County Ordinances. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County a Traffic Safety Plan for any lane closures or detours planned. No work shall begin until all the permits and requirements have been approved or obtained.

### Specific Work Permit Conditions

1. Drilling Permit(s) can be voided/ cancelled only in writing. It is the applicant's responsibility to notify Alameda County Public Works Agency, Water Resources Section in writing for an extension or to cancel the drilling permit application. No drilling permit application(s) shall be extended beyond ninety (90) days from the original start date. Applicants may not cancel a drilling permit application after the completion date of the permit issued has passed.
2. Compliance with the above well-sealing specifications shall not exempt the well-sealing contractor from complying with appropriate state reporting-requirements related to well destruction (Sections 13750 through 13755 (Division 7, Chapter 10, Article 3) of the California Water Code). Contractor must complete State DWR Form 188 and mail original to the Alameda County Public Works Agency, Water Resources Section, within 60 days, including permit number and site map.
3. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost, liability in connection with or resulting from the exercise of this Permit including, but not limited to, properly damage, personal injury and wrongful death.

## Alameda County Public Works Agency - Water Resources Well Permit

4. Permittee, permittee's contractors, consultants or agents shall be responsible to assure that all material or waters generated during drilling, boring destruction, and/or other activities associated with this Permit will be safely handled, properly managed, and disposed of according to all applicable federal, state, and local statutes regulating such. In no case shall these materials and/or waters be allowed to enter, or potentially enter, on or off-site storm sewers, dry wells, or waterways or be allowed to move off the property where work is being completed.
  5. Prior to any drilling activities, it shall be the applicant's responsibility to contact and coordinate an Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits or agreements required for that Federal, State, County or City, and follow all City or County Ordinances. No work shall begin until all the permits and requirements have been approved or obtained. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County an Traffic Safety Plan for any lane closures or detours planned. No work shall begin until all the permits and requirements have been approved or obtained.
  6. No changes in construction procedures or well type shall change, as described on this permit application. This permit may be voided if it contains incorrect information.
  7. Applicant shall submit the copies of the approved encroachment permit to this office within 60 days.
  8. Applicant shall contact Steve Miller for an inspection time at (510) 670-5517 or email to [stevem@acpwa.org](mailto:stevem@acpwa.org) at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.
  9. Wells shall have a Christy box or similar structure with a locking cap or cover. Well(s) shall be kept locked at all times. Well(s) that become damaged by traffic or construction shall be repaired in a timely manner or destroyed immediately (through permit process). No well(s) shall be left in a manner to act as a conduit at any time.
  10. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.
  11. Vapor monitoring wells above water level constructed with tubing maybe be backfilled with pancake-batter consistency bentonite. Minimum surface seal thickness is two inches of cement grout around well box.
- Vapor monitoring wells above water level constructed with pvc pipe shall have a minimum seal depth (Neat Cement Seal) of 2 feet below ground surface (BGS). Minimum surface seal thickness is two inches of cement grout around well box. All other conditions for monitoring well construction shall apply.

**CERTIFIED MAIL**  
**(Return Receipt Requested)**  
**Certified Mail No. 7004 1160 0007 3431 4445**

Mr. Frank Hamed  
Enviro Soil Tech Consultants  
131 Tully Road  
San Jose, CA 95111

Dear Mr. Hamed:

Re: Wastewater Discharge Permit No. 83389682

Enclosed is the Enviro Soil Tech Consultants Special Discharge Permit (Permit) for your information and records. Please read the Permit terms and conditions and the enclosed *EBMUD Special Discharge Permit Standard Terms and Conditions*, March 2014 Edition. A copy of *EBMUD Wastewater Control Ordinance* is available at [www.ebmud.com](http://www.ebmud.com). As a Permit Holder, you are legally responsible for complying with all Permit conditions and requirements.

Enviro Soil Tech Consultants shall report to the Environmental Services Division any changes to the site operations that affect the quality or volume of the permitted discharge or deviate from the terms and conditions under which the Permit was granted.

If you have any questions regarding this Permit, please contact Deirdre Mena of the Environmental Services Division at (510) 287-1559.

Sincerely,

JACQUELINE KEPKE  
Manager of Environmental Services

Enclosures

# SPECIAL DISCHARGE PERMIT Terms and Conditions

Permit Number: 83389682

## SELF-MONITORING REPORTING REQUIREMENTS

Enviro Soil Tech Consultants shall:

- Obtain representative samples of the pretreated/managed Special Discharge Wastewater from the source described under *General Conditions* Paragraph III. Parameters to be monitored, sample types, and analytical test methods shall be in accordance with the following table:

Parameter	Sample Type	Method
Volatile Organic Compounds	Grab	EPA 624
Total Metals	Grab	EPA 200.7

- Submit a self-monitoring report within 30 days of sample collection. The self-monitoring report shall include:
  - A signed analytical report
  - The chain of custody documentation
  - The authorized signature and certification statement

Discharge of Special Discharge Wastewater to the community sewer is prohibited until the District reviews the self-monitoring report and approves start-up of the discharge. The District reserves the right to require additional self-monitoring if deemed necessary.

## INSPECTIONS

The District may conduct random, unannounced inspections to verify compliance with the terms and conditions of this Special Discharge Permit. Enviro Soil Tech Consultants shall grant District personnel site access to conduct inspections and collect Special Discharge Wastewater samples.

## ENFORCEMENT AND PENALTIES

Failure to comply with the terms and conditions of this Special Discharge Permit may result in enforcement actions, including violation follow-up fees, civil enforcement penalties, and administrative fines of up to \$5,000 per day.

## RATES AND CHARGES

This Special Discharge Permit may be amended to include changes to rates and charges that may be established by the District during the term of this Special Discharge Permit. The current treatment charge is \$0.02 per gallon of Special Discharge Wastewater discharged to the community sewer. The Special Discharge Permit fee is \$995 per year.

## AUTHORIZATION

Enviro Soil Tech Consultants is hereby authorized to discharge Special Discharge Wastewater to the community sewer, subject to compliance with the *Wastewater Control Ordinance, Special Discharge Permit Standard Terms and Conditions*, and established billing conditions.

Effective:

May 1, 2014

Expiration:

April 30, 2015

Director, Wastewater Department

5/1/14

Date

# SPECIAL DISCHARGE PERMIT Terms and Conditions

PERMIT NUMBER: 83389682

## GENERAL CONDITIONS

- I. Enviro Soil Tech Consultants shall comply with the provisions of the following two documents:
  - East Bay Municipal Utility District Wastewater Control Ordinance (Wastewater Control Ordinance)
  - EBMUD Special Discharge Permit Standard Terms and Conditions, most recent edition
- II. This Special Discharge Permit is a waiver of Wastewater Control Ordinance, Title I, Section 5, which prohibits the discharge of stormwater, drainage water, and groundwater to the community sewer.
- III. Enviro Soil Tech Consultants shall discharge Special Discharge Wastewater only from the site described in the *Special Discharge Permit Applicant Form* –1501 Martin Luther King Junior Way, Oakland, CA 94612 as depicted on the site map titled *Figure 4, Floor Plan for Location of Treatment System & Discharge Point*.
- IV. Enviro Soil Tech Consultants shall immediately cease discharge of treated or managed Special Discharge Wastewater if not in compliance with any of the terms and conditions of this Special Discharge Permit.
- V. Enviro Soil Tech Consultants shall not discharge Special Discharge Wastewater authorized by this Special Discharge Permit after the expiration date.

## COMPLIANCE REQUIREMENTS

- I. Enviro Soil Tech Consultants shall pretreat/manage, including sediment control, all Special Discharge Wastewater prior to discharge to the community sewer. Pretreatment or management shall be sufficient to achieve compliance with the benchmark values and discharge limits established in this Special Discharge Permit.
- II. Enviro Soil Tech Consultants shall post a sign in the work area stating "All Wastewater Discharge must comply with the Special Discharge Permit."
- III. Enviro Soil Tech Consultants shall not discharge Special Discharge Wastewater to the community sewer during a rain event or within 24 hours after a rain event, which is defined as any precipitation greater than a drizzle.
- IV. Enviro Soil Tech Consultants shall not discharge Special Discharge Wastewater to the community sewer at a flow rate greater than 100 gallons per minute.
- V. Enviro Soil Tech Consultants shall obtain permission from the applicable city agency to discharge Special Discharge Wastewater to the community sewer.
- VI. Enviro Soil Tech Consultants shall discharge all Special Discharge Wastewater to the community sewer through a totalizing flow meter.
- VII. Enviro Soil Tech Consultants shall maintain a discharge logbook for the Special Discharge Wastewater described under *General Conditions* Paragraph III. Each entry shall include the date, time, source, and total volume of all Special Discharge Wastewater discharged to the community sewer.

## REPORTING REQUIREMENTS

Enviro Soil Tech Consultants shall submit a discharge log report, including:

- A copy of all entries recorded in the discharge logbook described under *Compliance Requirements*, Paragraph VII up to 30 days prior to the report due date.
- The authorized signature and certification statement.

The discharge log report is due quarterly with the initial report due by August 31, 2014. The final discharge log report is due within ten days of the final discharge to the community sewer. Submit all reports, including self-monitoring, through U.S. Postal Service to East Bay Municipal Utility District, c/o Deirdre Mena, Environmental Services Division MS 702, P.O. Box 24055, Oakland, CA 94623, or electronic mail to [dmena@ebmud.com](mailto:dmena@ebmud.com).

## WASTEWATER DISCHARGE LIMITS

Enviro Soil Tech Consultants shall not discharge Special Discharge Wastewater to the community sewer if the strength of the wastewater exceeds:

- Wastewater Control Ordinance Discharge Limits
- BTEX benchmark value of 5 ug/L for each component - benzene, toluene, ethylbenzene, and total xylenes

It is the applicant's responsibility to notify Alameda County Public Works Agency, Water Resources Section in writing for an extension or to cancel the drilling permit application. No drilling permit application(s) shall be extended beyond ninety (90) days from the original start date. Applicants may not cancel a drilling permit application after the completion date of the permit issued has passed.

2. Sound the well to measure depth and to ensure no obstructions exist.

Excavate and remove existing casing 3 to 5 foot below ground surface (bgs), including vent cap and well or vault cover.

Grout neat cement with a tremie to the bottom of the well and by filling with neat cement to three (3-5) feet below surface grade.

## Alameda County Public Works Agency - Water Resources Well Permit

After the seal has set, backfill the remaining hole with concrete or compacted material to match existing conditions.

3. Compliance with the well-sealing specifications shall not exempt the well-sealing contractor from complying with appropriate State reporting-requirements related to well construction or destruction (Sections 13750 through 13755 (Division 7, Chapter 10, Article 3) of the California Water Code). Contractor must complete State DWR Form 188 and mail original to the Alameda County Public Works Agency, Water Resources Section, within 60 days. Include permit number and site map.
  4. Applicant shall submit the copies of the approved encroachment permit to this office within 10 days.
  5. Applicant shall contact assigned inspector listed on the top of the permit at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.
  6. Remove the Christy box or similar structure. Destroy well(s) by overdrilling the upper 5ft. below ground surface (bgs) and then tremie grouting with neat cement. Allow the sealing material to spill over the top of the casing to fill any annular space between casing and soil. After the seal has set, backfill the remaining hole by approved encroachment permit concrete material and asphalt material by Caltrans Spec or County/City Codes.
  7. Remove the Christy box or similar structure. Pressure Grout with Cement (Less than 30 ft in depth). After the seal has set, backfill the remaining hole with concrete or compacted material to match existing.
  8. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.
  9. Remove well by excavation. After the seal has set, backfill the remaining hole with concrete or compacted material to match existing.
  10. Electronic Reporting Regulations (Chapter 30, Division 3 of Title 23 & Division 3 of Title 27, CCR) require electronic submission of any report or data required by a regulatory agency from a cleanup site. Submission dates are set by a Regional Water Board or by a regulatory agency. Once a report/data is successfully uploaded, as required, you have met the reporting requirement (i.e. the compliance measure for electronic submittals is the actual upload itself). The upload date should be on or prior to the regulatory due date.
  11. Prior to any drilling activities onto any public right-of-ways, it shall be the applicants responsibilities to contact and coordinate a Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits required for that City or to the County and follow all City or County Ordinances. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County a Traffic Safety Plan for any lane closures or detours planned. No work shall begin until all the permits and requirements have been approved or obtained.
  12. Remove the Christy box or similar structure. Tremie Grout with Cement (More than 30 ft in depth). After the seal has set, backfill the remaining hole with concrete or compacted material to match existing.

## Accutest Laboratories Sample Receipt Summary

**Accutest Job Number:** C28241      **Client:** ENVIRO SOIL      **Project:** 1501 MLK JR WAY, OAKLAND, CA  
**Date / Time Received:** 6/13/2013      **Delivery Method:** Accutest Courier      **Airbill #s:**

**Cooler Temps (Initial/Adjusted):** #1: (4.6/4.6): 0

<u>Cooler Security</u>	<u>Y or N</u>				<u>Y or N</u>	
1. Custody Seals Present:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	3. COC Present:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
2. Custody Seals Intact:	<input type="checkbox"/>	<input type="checkbox"/>	4. SmpI Dates/Time OK	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

<u>Cooler Temperature</u>	<u>Y or N</u>	
1. Temp criteria achieved:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Cooler temp verification:	IR Gun	
3. Cooler media:	Ice (Bag)	
4. No. Coolers:	1	

<u>Quality Control Preservation</u>	<u>Y</u>	<u>or</u>	<u>N</u>	<u>N/A</u>
1. Trip Blank present / cooler:	<input type="checkbox"/>		<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Trip Blank listed on COC:	<input type="checkbox"/>		<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Samples preserved properly:	<input checked="" type="checkbox"/>		<input type="checkbox"/>	<input type="checkbox"/>
4. VOCs headspace free:	<input checked="" type="checkbox"/>		<input type="checkbox"/>	<input type="checkbox"/>

<u>Sample Integrity - Documentation</u>	<u>Y</u>	<u>or</u>	<u>N</u>
1. Sample labels present on bottles:	<input checked="" type="checkbox"/>		<input type="checkbox"/>
2. Container labeling complete:	<input checked="" type="checkbox"/>		<input type="checkbox"/>
3. Sample container label / COC agree:	<input checked="" type="checkbox"/>		<input type="checkbox"/>

<u>Sample Integrity - Condition</u>	<u>Y</u>	<u>or</u>	<u>N</u>
1. Sample recvd within HT:	<input checked="" type="checkbox"/>		<input type="checkbox"/>
2. All containers accounted for:	<input checked="" type="checkbox"/>		<input type="checkbox"/>
3. Condition of sample:	Intact		

<u>Sample Integrity - Instructions</u>	<u>Y</u>	<u>or</u>	<u>N</u>	<u>N/A</u>
1. Analysis requested is clear:	<input checked="" type="checkbox"/>		<input type="checkbox"/>	
2. Bottles received for unspecified tests	<input type="checkbox"/>		<input checked="" type="checkbox"/>	
3. Sufficient volume recvd for analysis:	<input checked="" type="checkbox"/>		<input type="checkbox"/>	
4. Compositing instructions clear:	<input type="checkbox"/>		<input type="checkbox"/>	<input checked="" type="checkbox"/>
5. Filtering instructions clear:	<input type="checkbox"/>		<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Accutest Laboratories Sample Receipt Summary

**Accutest Job Number:** C28242      **Client:** ENVIRO SOIL      **Project:** 1501 MLK JR. WAY  
**Date / Time Received:** 6/13/2013      **Delivery Method:** Accutest Courier      **Airbill #s:**

**Cooler Temps (Initial/Adjusted):** #1: (4.6/4.6): 0

<u>Cooler Security</u>	<u>Y or N</u>		<u>Y or N</u>	
1. Custody Seals Present:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	3. COC Present:	<input checked="" type="checkbox"/> <input type="checkbox"/>
2. Custody Seals Intact:	<input type="checkbox"/>	<input type="checkbox"/>	4. Smp'l Dates/Time OK	<input checked="" type="checkbox"/> <input type="checkbox"/>

<u>Cooler Temperature</u>	<u>Y or N</u>	
1. Temp criteria achieved:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Cooler temp verification:	IR Gun	
3. Cooler media:	Ice (Bag)	
4. No. Coolers:	1	

<u>Quality Control Preservation</u>	<u>Y</u>	<u>or</u>	<u>N</u>	<u>N/A</u>
1. Trip Blank present / cooler:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
2. Trip Blank listed on COC:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
3. Samples preserved properly:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
4. VOCs headspace free:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

<u>Sample Integrity - Documentation</u>	<u>Y or N</u>	
1. Sample labels present on bottles:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Container labeling complete:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Sample container label / COC agree:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

<u>Sample Integrity - Condition</u>	<u>Y or N</u>	
1. Sample recvd within HT:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. All containers accounted for:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Condition of sample:	Intact	

<u>Sample Integrity - Instructions</u>	<u>Y</u>	<u>or</u>	<u>N</u>	<u>N/A</u>
1. Analysis requested is clear:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
2. Bottles received for unspecified tests	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
3. Sufficient volume recvd for analysis:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
4. Compositing instructions clear:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5. Filtering instructions clear:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## Accutest Laboratories Sample Receipt Summary

**Accutest Job Number:** C31221      **Client:** ENVIRO SOIL TECH CONSULTANTS      **Project:** 1501 MARTIN LUTHER KING. JR. WAY, Oakland,  
**Date / Time Received:** 12/4/2013      **Delivery Method:** Accutest Courier      **Airbill #s:** \_\_\_\_\_  
**Cooler Temps (Initial/Adjusted):** #1: (5.3/3.8): 0

**Cooler Security**

	<u>Y or N</u>			<u>Y or N</u>	
1. Custody Seals Present:	<input type="checkbox"/>	<input checked="" type="checkbox"/>	3. COC Present:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Custody Seals Intact:	<input type="checkbox"/>	<input type="checkbox"/>	4. SmpI Dates/Time OK	<input checked="" type="checkbox"/>	<input type="checkbox"/>

**Cooler Temperature**

	<u>Y or N</u>	
1. Temp criteria achieved:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Cooler temp verification:	IR1 Plastic;	
3. Cooler media:	Ice (Bag)	
4. No. Coolers:	1	

**Quality Control Preservation**

	<u>Y</u>	<u>or</u>	<u>N</u>	<u>N/A</u>
1. Trip Blank present / cooler:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
2. Trip Blank listed on COC:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
3. Samples preserved properly:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
4. VOCs headspace free:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

**Sample Integrity - Documentation**

	<u>Y or N</u>	
1. Sample labels present on bottles:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Container labeling complete:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Sample container label / COC agree:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

**Sample Integrity - Condition**

	<u>Y or N</u>	
1. Sample recvd within HT:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. All containers accounted for:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3. Condition of sample:	Intact	

**Sample Integrity - Instructions**

	<u>Y</u>	<u>or</u>	<u>N</u>	<u>N/A</u>
1. Analysis requested is clear:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
2. Bottles received for unspecified tests	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
3. Sufficient volume recvd for analysis:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
4. Compositing instructions clear:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Filtering instructions clear:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

### CASE NARRATIVE

Laboratory number: 257056  
Client: Enviro Soil Tech Consultants  
Project: 6-13-858-SA  
Location: 1501 Martin Luther King Jr. Way, Oakl  
Request Date: 05/20/14  
Samples Received: 05/20/14

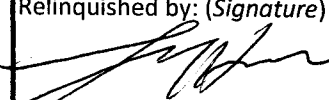

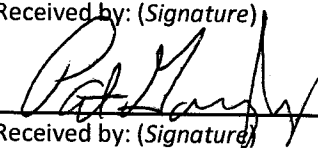

This data package contains sample and QC results for six water samples, requested for the above referenced project on 05/20/14. The samples were received cold and intact.

**TPH-Purgeables and/or BTXE by GC (EPA 8015B and EPA 8021B):**

High surrogate recoveries were observed for bromofluorobenzene (FID) in STVW-4 (lab # 257056-004) and the MS/MSD for batch 211480. No other analytical problems were encountered.

257056

### CASE NARRATIVE

Laboratory number: 260991  
Client: Enviro Soil Tech Consultants  
Project: 6-13-858-SA  
Location: 1501 Martin Luther King Jr. Way, Oakl  
Request Date: 09/18/14  
Samples Received: 09/18/14

This data package contains sample and QC results for three water samples, requested for the above referenced project on 09/18/14. The samples were received cold and intact.

**TPH-Purgeables and/or BTXE by GC (EPA 8015B and EPA 8021B):**

No analytical problems were encountered.

### CASE NARRATIVE

Laboratory number: 258774  
Client: Enviro Soil Tech Consultants  
Project: 6-13-858-SA  
Location: 1501 Martin Luther King Jr. Way, Oakl  
Request Date: 07/08/14  
Samples Received: 07/08/14

This data package contains sample and QC results for one water sample, requested for the above referenced project on 07/08/14. The sample was received cold and intact.

**Volatile Organics by GC/MS (EPA 624):**

High recoveries were observed for 1,1-dichloroethene in the MS/MSD for batch 213059; the parent sample was not a project sample, the BS/BSD were within limits, the associated RPD was within limits, and this analyte was not detected at or above the RL in the associated sample. No other analytical problems were encountered.

**Metals (EPA 200.7 and EPA 245.1):**

No analytical problems were encountered.

**Total Cyanide (SM4500CN-E):**

No analytical problems were encountered.

258774

- 1. Did cooler come with a shipping slip (airbill, etc) YES NO
2A. Were custody seals present? ... YES (circle) on cooler on samples X NO
2B. Were custody seals intact upon arrival? YES NO N/A
3. Were custody papers dry and intact when received? YES NO
4. Were custody papers filled out properly (ink, signed, etc)? YES NO
5. Is the project identifiable from custody papers? (If so fill out top of form) YES NO
6. Indicate the packing in cooler: (if other, describe)
7. Temperature documentation: \* Notify PM if temperature exceeds 6°C
8. Were Method 5035 sampling containers present? YES NO
9. Did all bottles arrive unbroken/unopened? YES NO
10. Are there any missing / extra samples? YES NO
11. Are samples in the appropriate containers for indicated tests? YES NO
12. Are sample labels present, in good condition and complete? YES NO
13. Do the sample labels agree with custody papers? YES NO
14. Was sufficient amount of sample sent for tests requested? YES NO
15. Are the samples appropriately preserved? YES NO N/A
16. Did you check preservatives for all bottles for each sample? YES NO N/A
17. Did you document your preservative check? YES NO N/A
18. Did you change the hold time in LIMS for unpreserved VOAs? YES NO N/A
19. Did you change the hold time in LIMS for preserved terracores? YES NO N/A
20. Are bubbles > 6mm absent in VOA samples? YES NO N/A
21. Was the client contacted concerning this sample delivery? YES NO

COMMENTS

#20) -001: 1 of 4 VOAs w/ bubble > 6mm

### CASE NARRATIVE

Laboratory number: 262247  
Client: Enviro Soil Tech Consultants  
Project: 6-13-858-SA  
Location: 1501 Martin Luther King Jr. Way, Oakl  
Request Date: 11/04/14  
Samples Received: 11/04/14

This data package contains sample and QC results for one water sample, requested for the above referenced project on 11/04/14. The sample was received cold and intact.

**Volatile Organics by GC/MS (EPA 624):**

No analytical problems were encountered.

**Metals (EPA 200.7 and EPA 245.1):**

No analytical problems were encountered.

**Total Cyanide (SM4500CN-E):**

High recovery was observed for cyanide in the MSD for batch 217151; the parent sample was not a project sample, the LCS was within limits, and the associated RPD was within limits. No other analytical problems were encountered.

 Client EMM to Scott Reh Project C-13-858-8A

Date Opened 11/03 By (print) [Signature] (sign) [Signature]  
 Date Logged in 11/04 By (print) [Signature] (sign) [Signature]

1. Did cooler come with a shipping slip (airbill, etc) \_\_\_\_\_ YES  NO  
 Shipping info \_\_\_\_\_

2A. Were custody seals present? ....  YES (circle) on cooler on samples  NO  
 How many \_\_\_\_\_ Name \_\_\_\_\_ Date \_\_\_\_\_

2B. Were custody seals intact upon arrival? \_\_\_\_\_ YES NO  N/A

3. Were custody papers dry and intact when received?  YES NO

4. Were custody papers filled out properly (ink, signed, etc)?  YES NO

5. Is the project identifiable from custody papers? (If so fill out top of form)  YES NO

6. Indicate the packing in cooler: (if other, describe) \_\_\_\_\_

- Bubble Wrap  Foam blocks  Bags  None
- Cloth material  Cardboard  Styrofoam  Paper towels

7. Temperature documentation: \* Notify PM if temperature exceeds 6°C

Type of ice used:  Wet  Blue/Gel  None Temp(°C) \_\_\_\_\_

Samples Received on ice & cold without a temperature blank; temp. taken with IR gun

Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? \_\_\_\_\_ YES  NO

If YES, what time were they transferred to freezer? \_\_\_\_\_

9. Did all bottles arrive unbroken/unopened?  YES NO

10. Are there any missing / extra samples? \_\_\_\_\_ YES  NO

11. Are samples in the appropriate containers for indicated tests?  YES NO

12. Are sample labels present, in good condition and complete?  YES NO

13. Do the sample labels agree with custody papers?  YES NO

14. Was sufficient amount of sample sent for tests requested?  YES NO

15. Are the samples appropriately preserved? \_\_\_\_\_ YES  NO N/A

16. Did you check preservatives for all bottles for each sample?  YES NO N/A

17. Did you document your preservative check?  YES NO N/A

18. Did you change the hold time in LIMS for unpreserved VOAs? \_\_\_\_\_ YES NO  N/A

19. Did you change the hold time in LIMS for preserved terracores? \_\_\_\_\_ YES NO  N/A

20. Are bubbles > 6mm absent in VOA samples?  YES NO N/A

21. Was the client contacted concerning this sample delivery? \_\_\_\_\_ YES  NO

If YES, Who was called? \_\_\_\_\_ By \_\_\_\_\_ Date: \_\_\_\_\_

# ENVIRO SOIL TECH CONSULTANTS

Environmental & Geotechnical Consultants

131 TULLY ROAD, SAN JOSE, CALIFORNIA 95111

Tel: (408) 297-1500

Email: [info@envirosoiltech.com](mailto:info@envirosoiltech.com)

FILE NO.: 6-13-858-SA

DATE: 6/29/15

DEPTH TO WELL: 33'

DEPTH TO WATER: 27'7" <sup>3</sup>/<sub>10</sub>

HEIGHT OF WATER COLUMN: \_\_\_\_\_

WELL NO.: STEW-1

SAMPLER: FRANK

1 WELL VOLUME: \_\_\_\_\_

5 WELL VOLUME: \_\_\_\_\_

ACTUAL PURGED VOLUME: \_\_\_\_\_

CASING DIAMETER: \_\_\_\_\_ 2"

\_\_\_\_\_ ✓ 4"

## CALCULATIONS:

2" - x 0.1632 \_\_\_\_\_

4" - x 0.653 \_\_\_\_\_

PURGED METHOD: \_\_\_\_\_ BAILER \_\_\_\_\_ DISPLACEMENT PUMP \_\_\_\_\_ OTHER

SAMPLE METHOD: \_\_\_\_\_ BAILER \_\_\_\_\_ OTHER

SHEEN: \_\_\_\_\_ NO \_\_\_\_\_ YES, DESCRIBE: \_\_\_\_\_

ODOR: \_\_\_\_\_ NO \_\_\_\_\_ YES, DESCRIBE: \_\_\_\_\_
